100% Pass NCP-CI-Azure - Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) –Professional Examcollection Questions Answers

If you want to pass an exam just one time, then choose. Our NCP-CI-Azure exam dumps will provide you such chance like this. NCP-CI-Azure exam braindumps are verified by experienced experts in the field, and they are quite familiar with the questions and answers of the exam center, therefore the quality of the NCP-CI-Azure Exam Dumps are guaranteed. Besides we offer free update

for 365 days after purchasing.

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q71-Q76):

NEW QUESTION # 71

An administrator is tasked with configuring connectivity between an on-premises datacenter and Azure. Which two connectivity options are supported? (Choose two.)

- A. Direct Connect
- B. Leased Line
- C. VPN
- D. ExpressRoute

Answer: C,D

Explanation:

For configuring connectivity between an on-premises datacenter and Azure, the two supported options are:

* VPN (Virtual Private Network): Site-to-Site VPN allows you to create a secure connection from your on-premises network to Azure over the public internet using IPsec/IKE protocols.

* ExpressRoute: Provides a private connection between your on-premises infrastructure and Azure, ensuring traffic does not traverse the public internet.

Both options provide secure and reliable connectivity, with ExpressRoute offering enhanced performance and security due to its private connection. References

NEW QUESTION # 72

A company has just adopted Nutanix as their technology of choice and is preparing to deploy Nutanix Cloud Clusters (NC@). Which step must be taken first to gain access to the NC2 console?

- A. Navigate to doud.nutanix.com.
- B. Start a free trial via Billing Portal.
- C. Open a support case with Nutanix.
- D. Create a My Nutanix account.

Answer: D

Explanation:

* Initial Access: To gain access to the NC2 console, users need to create an account on the Nutanix platform.

* My Nutanix Account: Creating a My Nutanix account provides access to the Nutanix console, support, and other resources.

* Free Trial and Billing Portal: Starting a free trial or accessing the billing portal can be subsequent steps but require an initial account.

* Support Case: Opening a support case is not necessary for initial access but might be needed for specific issues later.

* Conclusion: Creating a My Nutanix account is the first step to accessing the NC2 console and other Nutanix services.

NEW QUESTION # 73

An administrator needs the permission to create and manage multiple organizations and clusters in NC2, as well as manage user access for the entire company.

What role should be assigned to meet the minimum requirements of this task?

- A. Cluster Administrator
- B. Organization Administrator
- C. Customer Security Administrator
- D. Customer Administrator

Answer: D

Explanation:

* Role Requirements: The task involves creating and managing multiple organizations and clusters, along with managing user access across the company.

* Role Capabilities: The "Customer Administrator" role is designed to provide extensive administrative capabilities, including:

* Creating and managing organizations.

* Managing clusters.

* Handling user access and permissions.

* Comparison of Roles:

* Cluster Administrator: Primarily focuses on managing individual clusters but does not encompass organization-wide administrative tasks.

* Customer Security Administrator: Focuses on security-related tasks and does not have broad administrative capabilities across organizations and clusters.

* Organization Administrator: Manages organizational settings but might not cover all aspects needed for multiple clusters and user access management.

* Conclusion: The "Customer Administrator" role meets all the requirements for managing organizations, clusters, and user access comprehensively.

NEW QUESTION # 74

An organization wants to use a Jump Host to access Prism Element and Prism Central within an NC2 cluster on Azure.

Which statement is true?

- **A. Jump Host instance can be deployed in the Prism Central VNet or an external VNet.**
- B. Jump Host must not be used. Only VPN or ExpressRoute should be use.
- C. Jump Host instance must be deployed in the cluster VNet.
- D. Jump Host instance can only be deployed in the Prism Central VNet.

Answer: A

Explanation:

Jump Host Deployment: A Jump Host is a secure server used to access other systems in a network. In the context of an NC2 cluster on Azure, it serves as an intermediary for accessing Prism Element and Prism Central.

Flexible Deployment Options: The Jump Host can be deployed in either the Prism Central VNet or an external VNet, providing flexibility in network design and access strategies. This allows the organization to choose the most suitable network for deploying the Jump Host based on their security and connectivity requirements.

NEW QUESTION # 75

An administrator has setup a routed external network (No NAT) to use for workload running in NC2 clusters on Azure.

The applications are network intensive, so four gateways VMs have been deployed to meet the high demands. One application server on the NC2 clusters is sending traffic to an outside Azure service.

How many flow gateway VMs will be used to distribute the traffic?

- **A. All four Flow Gateway instances will be used based on the ECMP default route that points to the external subnets in the Nutanix Transit VPC for sending and receiving traffic.**
- B. All four Flow Gateway instances will be used based on the ECMP default route that points 3 the external subnets in the Nutanix Transit VPC, but only for sending traffic. Return traffic by use one Flow Gateway VM.
- C. Only one Flow Gateway instance will be used per source application running on NC2.
- D. two flow gateway instances will be used based on limitations from using MAC addresses to redistribute traffic.

Answer: A

Explanation:

Equal-Cost Multi-Path (ECMP) Routing: ECMP allows multiple gateways to be used simultaneously for load balancing traffic across multiple paths. In this scenario, ECMP is configured to point to the external subnets in the Nutanix Transit VPC.

Traffic Distribution: All four Flow Gateway instances will be used to distribute the outgoing traffic from the application server based on the ECMP default route configuration. This ensures efficient load balancing and utilization of all available gateway resources.

Bidirectional Traffic: Both sending and receiving traffic will utilize all four Flow Gateway instances, ensuring high availability and performance for network-intensive applications.
