CDP-3002 Reliable Exam Simulations & Unlimited CDP-3002 Exam Practice

If you have registered Cloudera CDP-3002 test, you can enter our Itcerttest Cloudera CDP-3002. You may try our Itcerttest Cloudera CDP-3002 free demo to decide whether to buy or not. You can also download pdf real questions and answers. Itcerttest Cloudera CDP-3002 certification training must help you to pass the exam easily. Its practice test is the most effective. We promise to help you to get the certification. Without the certification, we will give you FULL REFUND of your purchase fees. On request we can provide you with another exam of your choice absolutely free of cost.

Cloudera CDP Data Engineer - Certification Exam Sample Questions (Q298-Q303):

NEW QUESTION # 298

Your team is integrating PySpark with a MySQL database. You need to read data from a table named 'employees'. Which of the following PySpark code snippets correctly accomplishes this task?

- A.
- B.
- C.
- D.

Answer: C

Explanation:

Option A is correct because it properly uses the JDBC format with all the necessary options including the URL, database table, and user credentials.

NEW QUESTION # 299

You need to read data from a Hive table into a Spark DataFrame. Which approach would be the most efficient?

- A. Convert the Hive table to a managed table and then use `spark.read.table("table_name")`
- B. Leverage Spark SQL capabilities with `SELECT FROM table_name`
- C. Use the `FROM table_name` method
- D. Use the `spark.read.parquet("/path/to/hive/table")` method directly

Answer: B

Explanation:

While other options might work, option C is the most efficient and recommended approach. Spark SQL can directly access data from Hive tables using standard SQL syntax, transparently handling schema translation and ensuring optimal performance.

NEW QUESTION # 300

When creating a data pipeline in the Cloudera Data Engineering service, what is the primary file format used to define the pipeline steps and configuration?

- A. YAML
- B. JSON
- C. Python script
- D. Shell script

Answer: A

Explanation:

YAML (YAML Ain't Markup Language) is the primary file format used to define data pipeline steps and configuration within the Cloudera Data Engineering service. It's chosen for its readability and ease of use compared to other options.

NEW QUESTION # 301

When monitoring a PySpark application in Kubernetes, you notice that Executor pods are frequently restarting. What is the most likely cause of this issue?

- A. Insufficient memory allocation for Executor pods.
- B. Too many tasks assigned to each Executor.
- C. Dynamic resource allocation is disabled.
- D. Executor pods are not configured to restart upon failure.

Answer: A

Explanation:

Frequent restarting of Executor pods in Kubernetes can be a sign of insufficient memory allocation. If Executors are allocated less memory than required for the tasks they are running, they may fail and restart frequently.

NEW QUESTION # 302

Which feature in Apache Airflow allows you to retry a data quality check task if it fails initially due to transient issues?

- A. catchup
- B. Branching
- C. retries parameter in the task definition
- D. SLAs

Answer: C

Explanation:

The retries parameter in an Airflow task's definition specifies how many times Airflow should retry the task in case of failure. This is particularly useful for handling transient issues that might cause a data quality check to fail, such as temporary network outages or database lock issues.

NEW QUESTION # 303

.....

You can enter a better company and improve your salary if you have certificate in this field. CDP-3002 training materials of us will help you obtain the certificate successfully. We have a professional team to collect the latest information for the exam, and if you choose us, you can know the latest information timely. In addition, we provide you with free update for 365 days after payment for CDP-3002 Exam Materials, and the latest version will be sent to your email address automatically.
