## 最新Microsoft MB-820考古題，MB-820題庫資訊

最新的Microsoft MB-820考試是最受歡迎的認證之一，很多考生都沒有信心來獲得此認證，KaoGuTi保證我們最新的MB-820考古題是最適合您需求和學習的題庫資料。無論您是工作比較忙的上班族，還是急需認證考試的求職者，我們的Microsoft MB-820考古題都適合您們使用，保證100%通過考試。我們還提供一年免費更新服務，一年之內，您可以獲得您所購買的MB-820更新后的新版本，這是不錯的選擇！

## 最新的 Microsoft Dynamics 365 MB-820 免費考試真題 (Q123-Q128):

問題 #123

You create the following Vendor table and Item table in Business Central.

You require the following data set to assign vendors to items.

You need to create a query to assign the vendors.

Which three code blocks should you use to develop the solution? To answer, move the appropriate code blocks from the list of code blocks to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**答案：**

**解題說明：**

1 - dataitem(Vendor; Vendor)

2 - dataitem(Item; Item)

3 - DataItemLink = "Vendor No." = Item Vendor\_No;

#### **問題 #124**

You are developing an app that will be published to Microsoft AppSource.

The app requires code analyzers to enforce some rules. You plan to add the analyzers to the settings.json file.

You need to activate the analyzers for the project.

Which three code analyzers should you activate to develop the app for AppSource? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. a custom rule set
- B. PerTenantExtensionCop
- C. CodeCop
- D. AppSourceCop
- E. UICop

**答案： C,D,E**

**解題說明：**

PerTenantExtensionCop and AppSourceCop conflicts with each other. Code is for Appsource, so no need for PerTenantExtensionCop.

#### **問題 #125**

A company uses Azure Application Insights for Business Central online in its production environment.

A user observes that some job queues go into the failed state and require manual intervention.

You need to analyze job queue lifecycle telemetry.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**答案：**

**解題說明：**

Explanation:

KQL Code Segment:

\* First command (traces):

\* The query begins with traces to analyze telemetry data logs. The next command determines how the results are filtered or displayed.

\* take 100: This is the correct option to retrieve the top 100 rows from the traces table.

\* Command for selecting fields:

\* project: This command is used to select specific fields from the telemetry data, allowing you to retrieve and display only the fields relevant to the job queue telemetry.

\* The correct answer is project, as it allows you to choose fields like jobQueueObjectId, jobQueueObjectType, etc., from the customDimensions table.
