New C1000-173 Test Pass4sure | C1000-173 Reliable Test Answers

TestPassKing offers IBM C1000-173 exam dumps that every candidate can rely on to get success on the first take. The registration fee for the C1000-173 real certification test is considerably expensive. That is why a TestPassKing has launched a budget-friendly IBM C1000-173 updated study material compared to other brands in the market. We also save you money with up to 1 year of free IBM C1000-173 Exam Questions updates. For customer satisfaction, a free demo version of the IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam product is also available so that users may check its authenticity before even buying it. Don't miss this opportunity of buying an updated and affordable IBM Cloud Pak for Data v4.7 Architect (C1000-173) exam product.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	• Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes • OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	• Security Requirements: This domain targets a Security Architect and focuses on planning security for a Cloud Pak for Data deployment. It includes managing certificates that secure communications, identity management systems, and access and authorization controls to enforce secure and compliant user and service interactions. The auditing features and their integration with enterprise audit systems are crucial to ensure traceability and accountability. Asset interchange security involves safeguarding data movement between services.

Topic 3	• Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.
Topic 4	• Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.
Topic 5	• Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.

IBM - C1000-173 - IBM Cloud Pak for Data v4.7 Architect –Valid New Test Pass4sure

We guarantee that you can enjoy the premier certificate learning experience under our help with our C1000-173 prep guide since we put a high value on the sustainable relationship with our customers. First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer C1000-173 guide torrent to you online, which mean that you are able to study as soon as possible to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our C1000-173 Exam Torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time. As a result what we can do is to create the most comfortable and reliable customer services of our C1000-173 guide torrent to make sure you can be well-prepared for the coming exams.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q114-Q119):

NEW QUESTION # 114
What is used to monitor workloads when running Db2 Warehouse as a Cloud Pak for Data service?

- A. Db2 Control Center
- B. Db2 Graph server
- C. Db2 Administration Framework
- D. Db2 Data Management Console

Answer: D

NEW QUESTION # 115
How does the IBM Data Virtualization service virtualize files in shared directories?

- A. Users add shared file systems in the UI.
- B. A remote connector is installed and run on the source server.
- C. It scans its network for open file shares.
- D. Administrators configure FTP connections to the file source.

Answer: B

Explanation:
To virtualize files that reside in shared directories (e.g., NFS, SMB, or other on-premises sources), IBM Data Virtualization uses a

remote connector agent. This remote connector is installed and executed on the source server to enable secure access and metadata extraction. The service does not scan networks automatically nor rely on FTP. Directly adding file shares via the UI is not sufficient without the backend connector in place, which acts as a secure communication bridge.

NEW QUESTION # 116

What is the role of a "Connection" in the Cloud Pak for Data connectivity framework?

- A. Move and copy data between data sources using optimized communication protocols.
- B. Act as a reference to the data source environment without data movement.
- C. Provide metadata for data transformation.
- D. Store and mange data locally on the platform for data co-location.

Answer: B

Explanation:
In IBM Cloud Pak for Data, a "Connection" is a configuration object that defines how to access an external data source, such as Db2, Oracle, or an S3 bucket. It does not involve moving or copying data. Instead, it acts as a reference to the external data source environment, enabling users to browse, query, and analyze the data in place. This approach supports virtualized access and governance while avoiding data duplication and ensuring data stays within its source system, aligning with enterprise data security policies.

NEW QUESTION # 117

What is a key feature of Data Replication on Cloud Pak for Data?

- A. Difficult to use interface
- B. Lack of integration with platform security
- C. Agentless architecture
- D. Requires complex agent-based architectures

Answer: C

NEW QUESTION # 118

What is the primary goal of High Availability in computing environments?

- A. To maximize system downtime
- B. To ensure a system operates at its peak capacity
- C. To reduce the efficiency of backup processes
- D. To minimize downtime and prevent data loss

Answer: D

NEW QUESTION # 119

......

As the saying goes, to sensible men, every day is a day of reckoning. Time is very important to people. People often complain that they are wasting their time on study and work. They do not have time to look at the outside world. Now, C1000-173 exam guide gives you this opportunity. C1000-173 test prep helps you save time by improving your learning efficiency. With our study materials, you can efficiently use all your fragmented time to learn. You can use your mobile phone to practice whether on the bus or at the time you are queuing up for a meal or waiting for someone. C1000-173 learning question helps you to enjoy the joy of life while climbing the top of your career. What are you hesitating? Come and buy it.
