## 100% Pass Peoplecert - DevOps-Foundation - PeopleCert DevOps Foundationv3.6Exam –High Pass-Rate Examcollection Dumps

If you are still hesitate to choose our ValidDumps, you can try to free download part of Peoplecert DevOps-Foundation exam certification exam questions and answers provided in our ValidDumps. So that you can know the high reliability of our ValidDumps. Our ValidDumps will be your best selection and guarantee to pass Peoplecert DevOps-Foundation Exam Certification. Your choose of our ValidDumps is equal to choose success.

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Which of The Three Ways increases the flow of work from left to right?

- A. The Second Way
- B. The Third Way
- C. All of the above
- D. **The First Way**

**Answer: D**

Explanation:

The "Three Ways" are foundational principles in DevOps:

\* The First Way focuses on increasing the flow of work from left (development) to right (operations). It is about optimizing the entire system for fast delivery, limiting bottlenecks, and enabling a rapid flow of features and fixes to customers.

\* The Second Way is about amplifying feedback loops so corrections can be made early.

\* The Third Way emphasizes continual learning and experimentation.

Extract-style reference:

"The First Way emphasizes the performance of the entire system, as opposed to the performance of a specific silo of work or department. The goal is to maximize the flow of work (value) from Development to Operations to the customer."

-Gene Kim, The Phoenix Project / DevOps Handbook

PeopleCert DevOps Foundation v3.6 highlights this in the section on "Principles and Practices," emphasizing The First Way as critical to accelerating flow.

**NEW QUESTION # 42**

What should we measure in preference to outputs and productivity?

- A. Lines of code and deployment frequency
- B. **Outcomes and value**
- C. Utilization and velocity
- D. Maturity and capability

**Answer: B**

Explanation:

DevOps shifts the focus from activity-based metrics(outputs) to impact-based metrics(outcomes and value).

Measuring outcomes means assessing whether work delivers the intended business or customer benefit.

Outputs like lines of code, number of deployments, or velocity measure activity but not whether value is being delivered. PeopleCert emphasizes that outcomes should align with business objectives-such as improved customer satisfaction, revenue growth, or reduced failure rates.

Therefore, B- Outcomes and value- is preferred for guiding meaningful improvements.

**NEW QUESTION # 43**

Which of the following is NOT a characteristic of DevOps?

- A. Working towards a common goal
- B. Ensuring overall organizational success
- C. World-class stability, reliability, availability and security
- D. **Fast flow of unplanned work into production**

**Answer: D**

Explanation:

A fast flow of unplanned work into production is not a characteristic of DevOps. In fact, DevOps practices strive to minimize unplanned work (like emergency changes or outages) through automation, testing, collaboration, and rigorous change control. The other options-ensuring organizational success, working toward a common goal, and world-class stability/reliability-are all key DevOps characteristics.

#### NEW QUESTION # 44

Which of the following of Continuous Delivery does NOT contribute positively to SDO Performance?

- A. Trunk-based development
- B. Culture of psychological safety
- **C. Heavyweight Change Process**
- D. Cloud

**Answer: C**

Explanation:

High-performing organizations use Continuous Delivery practices to improve Software Delivery and Operational (SDO) performance.

\* B: Psychological safety encourages open communication, incident reporting, and learning from failures.

\* C: Trunk-based development reduces integration issues and supports continuous integration/delivery.

\* D: Cloud technologies provide scalable, on-demand environments that speed up delivery and testing.

On the other hand, A-a heavyweight change process-slows down delivery, increases lead time, and often fails to improve change success rates. Research cited in Accelerateshows that manual, centralized change approvals correlate with lower performance, while automated, peer-reviewed changes produce better reliability and faster delivery.

#### NEW QUESTION # 45

Which of the following would enable an IT organization to consolidate gains from a DevOps pilot?

- A. Rewarding the people who participated in the pilot
- B. Introducing more advanced tools and techniques
- **C. Sharing lessons learned**
- D. Hiring new people to expand the DevOps program

**Answer: C**

Explanation:

After a DevOps pilot, consolidating gains requires capturing and sharing lessons learned so that other teams can benefit from successes and avoid repeating mistakes.

This practice supports scaling DevOps practices across the organization by creating a shared knowledge base and promoting continuous improvement.

A(rewards) can motivate but doesn't spread the learning. B(hiring) may expand resources but doesn't ensure knowledge transfer. D(advanced tools) may enhance capability but should come after understanding what worked in the pilot.

Thus, C is the most effective action for consolidating pilot gains.
