At the same time, the language in CDCS-001 test question is very simple and easy to understand. Even if you are a newcomer who has just entered the industry, you can learn all the knowledge points without any obstacles. We believe that CDCS-001 study tool will make you fall in love with learning. Come and buy it now.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q45-Q50):

NEW QUESTION # 45

_____ is a systematic variation of the voltage wave form or a series of random voltage changes of small dimensions.

- A. Standby variation
- B. Voltage fluctuation

- C. Voltage truncation
- D. Frequency variation

Answer: B

Explanation:

Voltage fluctuation is a systematic variation of the voltage waveform or a series of random voltage changes of small dimensions that occur over a period of time. Voltage fluctuation can be caused by a variety of factors, such as changes in demand, changes in the power system, faults on the power system, or the switching of large loads.

NEW QUESTION # 46

Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. Lowest installation cost
- B. It has more heat removal capacity per unit
- C. All components contain more than one unit
- D. It doesn't requires ductwork and/or dropped ceiling

Answer: D

Explanation:

Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled systems, making them more cost- effective in the long run.

NEW QUESTION # 47

Which of the following processes requires direct current (DC) and cannot function with alternating current (AC)?

- A. Lighting
- B. Heating
- C. Electrolysis
- D. Turning a motor

Answer: C

NEW QUESTION # 48

The distance that a signal's energy can travel in the time it takes for one cycle to occur is called the signal's:

- A. amplitude
- B. wavelength
- C. frequency
- D. period

Answer: B

Explanation:

Wavelength is a measure of the distance that a signal's energy can travel in the time it takes for one cycle of the signal to occur. It is calculated by dividing the speed of light by the frequency of the signal. Wavelength is generally expressed in meters (m).

NEW QUESTION # 49

Which type of outlet is used for non-computing devices?

- A. Harmonic
- B. Static
- C. Convenience
- D. Grounding

Answer: C

Explanation:

Explanation

Convenience outlets, also known as duplex receptacles or wall outlets, are used to provide power to non-computing devices, such as lamps, televisions, and other household appliances. They are typically found in residential and commercial buildings and are connected to a circuit breaker or fuse for protection against overloading and electrical fires.

NEW QUESTION # 50

• • • • •

Some people prefer to read paper materials rather than learning on computers. Of course, your wish can be fulfilled in our company. We have PDF version CDCS-001 exam guides, which are printable format. You can print it on papers after you have downloaded it successfully.
