PassLeader is an excellent platform where you get relevant, credible, and unique Salesforce PDII exam dumps designed according to the specified pattern, material, and format as suggested by the Salesforce PDII exam. To make the Salesforce PDII Exam Questions content up-to-date for free of cost up to 1 year after buying them, our certified trainers work strenuously to formulate the exam questions in compliance with the Platform Developer II (PDII) dumps.

Once the candidate passes the PDII exam, they will be recognized as a Salesforce Certified Platform Developer II. Platform Developer II certification is a valuable asset to developers looking to showcase their advanced skills in Salesforce development. Platform Developer II certification demonstrates that the developer has the knowledge and expertise to design, develop, and maintain complex applications on the Salesforce platform. Platform Developer II certification can open doors to new opportunities and career advancements for developers looking to enhance their skills in Salesforce development.

The PDII exam covers a wide range of topics, including Apex programming, Lightning Components, Salesforce APIs, security, testing, and deployment. Developers are tested on their ability to design and implement solutions that meet specific business requirements, as well as their understanding of best practices and coding standards. PDII exam also includes scenario-based questions that require developers to apply their knowledge to real-world problems.

## How to study the PDII Exam

There are two main types of resources for preparation of certification exams first there are the study guides and the books that are detailed and suitable for building knowledge from ground up then there are video tutorial and lectures that can somehow ease the pain of through study and are comparatively less boring for some candidates yet these demand time and concentration from the learner. Smart Candidates who want to build a solid foundation in all exam topics and related technologies usually combine video lectures with study guides to reap the benefits of both but there is one crucial preparation tool as often overlooked by most candidates the practice exams. Practice exams are built to make students comfortable with the real exam environment. Statistics have shown that most students fail not due to that preparation but due to exam anxiety the fear of the unknown. PassLeader expert team recommends you to prepare some notes on these topics along with it don't forget to practice **Salesforce PDII Exam Dumps** which been written by our expert team, Both these will help you a lot to clear this exam with good marks.

### Salesforce Platform Developer II Sample Questions (Q39-Q44):

#### NEW QUESTION # 39

What is the correct order of execution for Visualforce Page "get" requests (initial page visit)

- A. 1) Evaluate constructors, extensions, and expression on attribute definitions on any custom components present  
2) Evaluate constructors on controller and extensions  
3) Evaluate expressions, <apex:page> attribute actions, and other method calls (getters/setters) on main page  
4) If there's a <apex:form> element, create the view state  
5) Send HTML to Browser
- B. 1) Evaluate constructors on controller and extensions  
2) Evaluate constructors, extensions, and expression on attribute definitions on any custom components present  
3) Evaluate expressions, <apex:page> attribute actions, and other method calls (getters/setters) on main page  
4) If there's a <apex:form> element, create the view state  
5) Send HTML to Browser
- C. 1) Evaluate constructors on controller and extensions  
2) If there's a <apex:form> element, create the view state  
3) Evaluate expressions, <apex:page> attribute actions, and other method calls (getters/setters) on main page  
4) Evaluate constructors, extensions, and expression on attribute definitions on any custom components present  
5) Send HTML to Browser

**Answer: B**

#### NEW QUESTION # 40

Universal Containers requested the addition of a third-party Map widget to an existing Lightning web component. Which two actions should the developer take to implement this requirement?

Choose 2 answers

- A. Use a content distribution network and Include <script> <script> tags In the component.
- B. Import the third-party JavaScript module directly Into the component.
- C. Import loadscript from lightning platformResourceLoader.
- D. Upload the third-party JavaScript library as a static resource that Imports Into the component.

**Answer: A,C**

#### NEW QUESTION # 41

A developer is developing a reusable Aura Component that will reside on an sObject Lightning Page with the following HTML snippet:

```
<aura:component implements="force:hasRecordId,flexipage:availableForAllPageTypesM">
<div>Hello!</div>
</aura:component>
```

How can the component's Controller get the context of the Lightning Page that the sObject is on without requiring additional test coverage?

- A. Set the sObject type as a component attribute.
- B. Create a design attribute and configure via App builder.
- **C. Add force:hasObjectName to the implements.**
- D. Use the getSObjectTypeQ method in an Apex class.

**Answer: C**

#### NEW QUESTION # 42

A developer wrote a class named accountHistoryManager that relies on field history tracking. The class has a static method called getAccountHistory that takes in an Account as a parameter and returns a list of associated accountHistory object records.

The following test fails:

What should be done to make this test pass?

- **A. Use @isTest (SeeAllData=true) to see historical data from the org and query for AccountHistory records.**
- B. Use Test.isRunningTest() in getAccountHistory() to conditionally return fake AccountHistory records.
- C. The test method should be deleted since this code cannot be tested.
- D. Create AccountHistory records manually in the test setup and write a query to get them.

**Answer: A**

Explanation:

To make the test pass, @isTest(SeeAllData=true) should be used to allow the test to access historical data from the org. This is required because field history tracking data is not copied to a test context, so you need to allow the test to access live data to assert against it. References: Apex Developer Guide - IsTest Annotation

#### NEW QUESTION # 43

Exhibit:

Consider the above trigger intended to assign the Account to the manager of the Account's region. Which two changes should a developer make in this trigger to adhere to best practices? Choose 2 answers

- A. Use a Map accountMap instead of List accountList.
- **B. Remove the last line updating accountList as it is not needed.**
- C. Use a Map to cache the results of the Region\_\_c query by Id.
- **D. Move the Region\_\_c query to outside the loop.**

**Answer: B,D**

#### NEW QUESTION # 44

.....

Dare to pursue, we will have a good future. Do you want to be successful people? Do you want to be IT talent? Do you want to pass Salesforce PDII certification?
