

Learn The Fortinet FCP_FGT_AD-7.6 Real Exam Dumps - To Gain Brilliant Result

P.S. Free & New FCP_FGT_AD-7.6 dumps are available on Google Drive shared by TestSimulate:
https://drive.google.com/open?id=1YiWGYwBTzTHlfJHcAPOc_T4wDfPoZ3zx

TestSimulate You can modify settings of practice test in terms of FCP - FortiGate 7.6 Administrator FCP_FGT_AD-7.6 Practice Questions types and mock exam duration. Both FCP_FGT_AD-7.6 exam practice tests (web-based and desktop) save your every attempt and present result of the attempt on the spot. Actual exam environments of web-based and desktop Fortinet practice test help you overcome exam fear. Our Fortinet desktop practice test software works after installation on Windows computers.

In order to meet your different needs for FCP_FGT_AD-7.6 exam dumps, three versions are available, and you can choose the most suitable one according to your own needs. All three version have free demo for you to have a try. FCP_FGT_AD-7.6 PDF version is printable, and you can print them, and you can study anywhere and anyplace. FCP_FGT_AD-7.6 Soft text engine has two modes to practice, and you can strengthen your memory to the answers through this way, and it can also install in more than 200 computers. FCP_FGT_AD-7.6 Online Test engine is convenient and easy to learn, and you can have a general review of what you have learned through the performance review.

FCP_FGT_AD-7.6 Dumps Vce & FCP_FGT_AD-7.6 Valid Exam Tutorial

This desktop practice exam software completely depicts the Fortinet FCP_FGT_AD-7.6 exam scenario with proper rules and regulations and any other plugins to access Fortinet FCP_FGT_AD-7.6 Practice Test. One such trustworthy point about exam preparation material is that it first gains your trust, and then asks you to purchase it.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 2	<ul style="list-style-type: none"> Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 3	<ul style="list-style-type: none"> Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 4	<ul style="list-style-type: none"> Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.
Topic 5	<ul style="list-style-type: none"> VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q97-Q102):

NEW QUESTION # 97

Refer to the exhibit. Which two statements about the FortiGuard connection are true? (Choose two.)

```

FortiGate # diagnose debug setting
Locale      : English

Service     : Web-filter
Status      : Enable
License     : Contract
\
Num. of servers : 1
Protocol    : https
Port        : 8888
Anycast     : Disable
Default servers : Not included

--- Server List (Wed Sep 20 09:22:42 2023) ---
IP           Weight RTT  Flags TZ  FortiGuard-requestsCurr  Lost Total Lost Updated Time
10.0.1.241   -244  2   I    0       122      0      0  Wed Sep 20 09:21:55 2023

```

- A. FortiGate is using the default port for FortiGuard communication.
- B. You can configure unreliable protocols to communicate with FortiGuard Server.
- C. FortiGate identified the FortiGuard Server using DNS lookup.
- D. The weight increases as the number of failed packets rises.

Answer: C,D

Explanation:

FortiGate identified the FortiGuard Server using DNS lookup → The server is shown with a private IP (10.0.1.241), which

indicates FortiGate resolved it via DNS or explicit override rather than using default FortiGuard anycast servers. The weight value reflects server reliability. It decreases with good performance and increases as packet loss or failures rise, meaning higher weight indicates more failures.

NEW QUESTION # 98

A remote user reports slow SSL VPN performance and frequent disconnections. The user is located in an area with poor internet connectivity.

What setting should the administrator adjust to improve the user's experience?

- A. Enable split tunneling to reduce VPN traffic.
- B. Change the SSL VPN port to a non-standard port.
- C. Increase the session timeout for inactive sessions.
- **D. Configure the DTLS timeout to accommodate high-latency connections.**

Answer: D

Explanation:

Adjusting the DTLS timeout helps maintain SSL VPN stability and performance in environments with poor or high-latency internet connectivity by allowing more time for packet retransmissions before dropping the connection.

NEW QUESTION # 99

A new administrator is configuring FSSO authentication on FortiGate using DC Agent Mode.

Which step is NOT part of the expected process?

- A. The user logs into the windows domain.
- **B. The DC agent sends login event data directly to FortiGate.**
- C. The collector agent forwards login event data to FortiGate.
- D. FortiGate determines user identity based on the IP address in the FSSO list.

Answer: B

Explanation:

In DC Agent Mode, the DC agent sends login event data directly to FortiGate without involving a collector agent.

NEW QUESTION # 100

You are analyzing connectivity problems caused by intermediate devices blocking traffic in SSL VPN environment.

In which two ways can you effectively resolve the problem? (Choose two.)

- **A. You can turn off IKE fragmentation to fix large certificate negotiation problems.**
- B. You should use IPsec to solve issues with fragment drops and large certificate exchanges.
- **C. You can use SSL VPN tunnel mode to prevent problems with blocked ESP and UDP ports (500 or 4500).**
- D. You can configure a hub-and-spoke topology with SSL VPN tunnels to bypass blocked UDP ports.

Answer: A,C

Explanation:

Disabling IKE fragmentation helps resolve issues caused by intermediate devices blocking large fragmented packets during certificate negotiation.

Using SSL VPN tunnel mode encapsulates traffic over HTTPS, bypassing blocks on ESP and UDP ports commonly used by IPsec.

NEW QUESTION # 101

Refer to the exhibit.

```
HQ-NGFW-1 # diagnose test application ipsmonitor 1
pid = 2044, engine count = 0 (+1)
0 - pid:2074:2074 cfg:1 master:0 run:1
```

As an administrator you have created an IPS profile, but it is not performing as expected. While testing you got the output as shown in the exhibit.

What could be the possible reason of the diagnose output shown in the exhibit?

- A. Administrator entered the command diagnose test application ipsmonitor 5.
- B. FortiGate entered into IPS fail open state.
- C. Administrator entered the command diagnose test application ipsmonitor 99.
- D. There is a no firewall policy configured with an IPS security profile.

Answer: D

Explanation:

The output shows the IPS engine count as 0, indicating no active IPS engines are running. This typically means no firewall policy is referencing the IPS security profile, so the IPS profile is not being applied or triggered.

NEW QUESTION # 102

.....

High efficiency service has won reputation for us among multitude of customers, so choosing our FCP_FGT_AD-7.6 real study dumps we guarantee that you won't be regret of your decision. Helping our candidates to pass the FCP_FGT_AD-7.6 exam and achieve their dream has always been our common ideal. We believe that your satisfactory on our FCP_FGT_AD-7.6 Exam Questions is the drive force for our company. Meanwhile, we adopt a reasonable price for you, ensures people whoever is rich or poor would have the equal access to buy our useful FCP_FGT_AD-7.6 real study dumps.
