100% Pass 2026 SAP C-TS470-2412: Valid SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Pdf Torrent

What's more, part of that PremiumVCEDump C-TS470-2412 dumps now are free: https://drive.google.com/open?id=19CNJ4o64tqysg_WoDA1NFZ3qYHcyIe57

The study material is made by professionals while thinking about our users. We have made the product user-friendly so it will be an easy-to-use learning material. We even guarantee our users that if they couldn't pass the SAP C-TS470-2412 Certification Exam on the first try with their efforts, they can claim a full refund of their payment from us (terms and conditions apply).

SAP C-TS470-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	• Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.
Topic 2	• Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.

Topic 3	• Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
Topic 4	• Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.

The Best Accurate C-TS470-2412 Pdf Torrent – Find Shortcut to Pass C-TS470-2412 Exam

By contrasting with other products in the industry, our C-TS470-2412 test guide really has a higher pass rate, which has been verified by many users. As long as you use our C-TS470-2412 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. C-TS470-2412 learning guide hopes to progress together with you and work together for their own future. The high passing rate of SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service exam training guide also requires your efforts. If you choose C-TS470-2412 test guide, I believe we can together contribute to this high pass rate.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q66-Q71):

NEW QUESTION # 66
What are the prerequisites when creating a configurable product? Note: There are 2 correct answers to this question.

- A. Creating a configuration profile
- B. Defining configurable characteristics
- C. Assigning a variant class to a product
- D. Assigning a characteristic to a serial number

Answer: A,C

Explanation:
A configurable product in SAP S/4HANA Cloud Private Edition, Service allows customization via variant configuration. The prerequisites are:
* Assigning a variant class to a product (A): A variant class defines the configurable characteristics (e.
g., size, color) and is assigned to the product master.
* Creating a configuration profile (D): The configuration profile links the product to its variant class and defines the configuration logic (e.g., dependencies).
* B: Characteristics are defined separately and linked via the variant class, not directly as a prerequisite.
* C: Characteristics are not assigned to serial numbers; serial numbers track instances, not configurations.
"Creating a configurable product requires assigning a variant class to the product and creating a configuration profile to enable variant configuration."

NEW QUESTION # 67
Which of the following can you assign to a service item category? Note: There are 2 correct answers to this question.

- A. Text determination procedure
- B. Rejection profile
- C. Date profile
- D. Status object profile

Answer: A,C

Explanation:
Service item categories in SAP S/4HANA Service (e.g., SRVI for service items) control the behavior of items in service documents. Assignable objects include:
* Text determination procedure: Defines how texts (e.g., descriptions, notes) are automatically populated or managed for the item, configured in Customizing.
* Date profile: Specifies date rules and milestones (e.g., start/end dates) for the service item, critical for scheduling and execution.
* Rejection profile: Not a standard assignment; rejection is managed via status or reason codes, not profiles at the item category level.
* Status object profile: Status profiles are typically assigned to transaction types or item categories for lifecycle management, but not as "status object profiles" in this context. These settings are part of service transaction Customizing. "Assign text determination procedures and date profiles to service item categories to control item behavior." (SAP Help Portal, Service Item Category Configuration).

NEW QUESTION # 68

Which of the following is the correct sequence when creating a hierarchical structure in organizational management?

- A. Position # User # Organizational unit # Holder
- B. Organizational unit # Holder # User # Position
- C. Position # Holder # User # Organizational unit
- D. Organizational unit # Position # Holder # User

Answer: D

Explanation:
In SAP S/4HANA Organizational Management (integrated with HCM or service structures):
* Organizational unit # Position # Holder # User: The sequence starts with defining an organizational unit (e.g., department), then positions within it (e.g., service technician), followed by assigning holders (employees) to positions, and finally linking users (system logins) to holders. This hierarchy is built using transaction PPOME or similar tools.
* Other sequences disrupt the logical top-down structure required for organizational management. This aligns with SAP's standard organizational setup process. "Create organizational units, then positions, assign holders, and link users in that order for a hierarchical structure." (SAP Help Portal, Organizational Management).

NEW QUESTION # 69

What options does a service planner have to influence the maintenance plan schedule? Note: There are 3 correct answers to this question.

- A. Freeze call
- B. Copy call
- C. Fix call
- D. Skip call
- E. Release call

Answer: A,C,D

Explanation:
In SAP S/4HANA Cloud Private Edition, Service, a service planner can influence the maintenance plan schedule using specific actions to manage service calls effectively. The maintenance plan schedule is part of the recurring services process, where maintenance plans generate service calls based on defined cycles (e.g., time-based or counter-based). The options available to influence this schedule include:
* Freeze call: This option allows the planner to lock a scheduled call, preventing it from being rescheduled or regenerated automatically until it is unfrozen. It ensures stability in planning for critical service events.
* Skip call: This allows the planner to bypass a specific scheduled call without affecting the overall schedule. It's useful when a service event is not required at a particular time (e.g., due to customer availability).
* Fix call: This option fixes a call at a specific date, ensuring it remains scheduled as planned and is not shifted by automatic rescheduling processes. It provides control over critical service timing.
* Copy call and Release call are not standard options for directly influencing the maintenance plan schedule. Copying a call might be a manual workaround in some scenarios, but it's not a documented feature for schedule influence. Releasing a call is part of execution

(e.g., releasing a service order), not schedule planning. These capabilities are detailed in the SAP S/4HANA Service documentation under recurring services and maintenance planning features, such as scope item 3MO (Service Contract Management)."In the maintenance plan scheduling, planners can freeze, skip, or fix calls to adjust the schedule according to operational needs." (SAP Signavio Process Navigator, Solution Process:
Recurring Services).

NEW QUESTION # 70

Why would you maintain price agreements in a service contract?

- A. To define the monthly contract price
- B. To automatically adjust the service order prices
- C. To select the price agreements in the service order
- D. To define the yearly contract price

Answer: B

Explanation:
In SAP S/4HANA Cloud Private Edition, Service, price agreements in a service contract define specific pricing conditions (e.g., discounts, fixed rates) for services or spare parts. The primary purpose is to automatically adjust the service order prices (Option D). When a service order is created and linked to a service contract, the system applies the price agreements from the contract to the order's items, ensuring consistent and contract-specific pricing without manual intervention. This automation enhances efficiency and accuracy in billing.
* A and B:Defining yearly or monthly prices might be part of the contract's billing plan, not the purpose of price agreements specifically.
* C:Price agreements are not "selected" in the service order; they are automatically applied based on the contract.
"Price agreements in a service contract are maintained to automatically adjust prices in associated service orders, ensuring that contract-specific conditions are consistently applied."

NEW QUESTION # 71
