

CHOOSE THE BEST PLATFORM FOR ACING THE Microsoft PL-600 EXAM

P.S. Free & New PL-600 dumps are available on Google Drive shared by ExamsLabs: https://drive.google.com/open?id=1s2Id0t_itXvQFxm4NYJHUI-clk1RjyB

We have seen that candidates who study with outdated PL-600 practice material don't get success and lose their resources. To save you from loss of money and time, BrainDumpsStore is offering a product that is specially designed to help you pass the Microsoft Power Platform Solution Architect (PL-600) exam on the first try. The Microsoft PL-600 Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop PL-600 practice test software, web-based PL-600 practice exam, and PL-600 dumps PDF format.

Microsoft PL-600 certification exam is a specialized exam designed to test the skills and knowledge of individuals interested in becoming Microsoft Power Platform Solution Architects. PL-600 exam focuses on the design and implementation of solutions that leverage the Power Platform to improve business processes and drive innovation. Microsoft Power Platform Solution Architect certification exam is intended for individuals who have experience working with Power Apps, Power Automate, Power BI, and the Common Data Service, and who have demonstrated proficiency in designing and implementing solutions that utilize these technologies.

The Power Platform includes a set of tools and services offered by Microsoft that enable users to build custom solutions easily. The platform comprises Power BI, Power Apps, Power Automate, and Power Virtual Agents. Solution architects who are proficient in these tools and services can help organizations streamline their workflows, automate processes, and make data-driven decisions. The Microsoft PL-600 Exam Tests the knowledge and skills required to design and implement solutions that leverage these tools.

PL-600 Latest Exam Pdf - PL-600 Latest Exam Question

Never have we made our customers disappointed about our PL-600 study guide. So we have enjoyed good reputation in the market for about ten years. In the future, we will stay integrity and research more useful PL-600 learning materials for our customers. Please continue supporting our PL-600 Exam Questions and we will make a better job with your warm encouragements and suggestions. So if you have any opinions about our PL-600 learning quiz, just leave them for us.

Microsoft Power Platform Solution Architect Sample Questions (Q22-Q27):

NEW QUESTION # 22

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

Graphical user interface, application, table Description automatically generated

□ Box 1: Power Platform Local Business Owner Team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Scenario: Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

Box 2: Azure Active Directory Security Group Team

An Azure Active Directory (Azure AD) group team. Similar to owner team, an Azure AD group team can own records and can have security roles assigned to the team.

Note: The administration of app and data access for Microsoft Dataverse has been extended to allow administrators to use their organization's Azure Active Directory (Azure AD) groups to manage access rights for licensed Dataverse users.

Box 3: Azure Active Directory B2B Guest Access

An Azure AD B2B collaboration user is an external user, typically from a partner organization, that you invite to sign into your Azure AD organization using their own credentials. This B2B collaboration user (also generally referred to as a guest user) can then access the apps and resources you want to share with them. A user object is created for the B2B collaboration user in the same directory as your employees. B2B collaboration user objects have limited privileges in your directory by default, and they can be managed like employees, added to groups, and so on.

Scenario: Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device.

NEW QUESTION # 23

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users in different regions.

Users in some regions complain about slow load time of the customizations.

You need to architect a solution based on the main requirement.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□

NEW QUESTION # 24

You are performing a requirements analysis for a customer.

The customer provides the following requirements:

Power Platform storage capacity must remain under 100 percent.

Customer service representatives must be sent an email when they are assigned a case.

Help desk technicians must be shown an error message when they try to delete a task row.

The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation

□

Box 1: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 2: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 3: Functional

Box 4: Non-functional

Examples of common non-functional requirement types include:

Availability

Compliance/regulatory

Data retention/residency

Performance (response time, and so on)

Privacy

Recovery time

Security

Scalability

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

NEW QUESTION # 25

You are designing a database table for a client.

You have the following requirements:

- * Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.
- * Prevent the addition of duplicate colors based on the hexadecimal value for the color.

You need to recommend a design for the table.

Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure and schedule a recurring bulk record deletion job.
- B. Mark the hex value column as business required.
- C. Mark the RGB value column as business required.
- D. Create alternate keys for the table.

Answer: B,D

Explanation:

B: Setting a column to Business Required means that the default behavior of a model-driven or canvas app will enforce this requirement in the app.

C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys-entity>

NEW QUESTION # 26

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- * Users must follow the same set of steps each time they process opportunities
- * For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- * An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

NEW QUESTION # 27

.....

All kinds of exams are changing with dynamic society because the requirements are changing all the time. To keep up with the newest regulations of the PL-600 exam, our experts keep their eyes focusing on it. Our PL-600 practice materials are updating according to the precise of the real exam.
