Our website always checks the update of 1z0-1075-25 test questions to ensure the accuracy of our study materials and keep the most up-to-dated exam requirements. There are 1z0-1075-25 free demo in our exam page for your reference and one-year free update are waiting for you. Valid 1z0-1075-25 Real Dumps will be the guarantee of your success and make you more confident in your career.

Compared with other training materials, why ActualTestsIT's Oracle 1z0-1075-25 exam training materials is more welcomed by the majority of candidates? First, this is the problem of resonance. We truly understand the needs of the candidates, and comprehensively than any other site. Second, focus. In order to do the things we decided to complete, we have to give up all the unimportant opportunities. Third, the quality of the product. People always determine a good or bad thing based on the surface. We may have the best products of the highest quality, but if we show it with a shoddy manner, it naturally will be as shoddy product. However, if we show it with both creative and professional manner, then we will get the best result. The ActualTestsIT's Oracle 1z0-1075-25 Exam Training materials is so successful training materials. It is most suitable for you, quickly select it please.

100% Pass Quiz Oracle - High-quality 1z0-1075-25 - Oracle Manufacturing Cloud 2025 Implementation Professional Prep Guide

Time is very important for everyone. As the saying goes, time is life so spend it wisely. We believe that you also don't want to spend much time on preparing for your Oracle Manufacturing Cloud 2025 Implementation Professional exam. How can you pass your exam and get your certificate in a short time? Our 1z0-1075-25 exam torrent will be your best choice to help you achieve your aim. According to customers' needs, our product was revised by a lot of experts; the most functions of our Oracle Manufacturing Cloud 2025 Implementation Professional exam dumps are to help customers save more time, and make customers relaxed. If you choose to use our 1z0-1075-25 Test Quiz, you will find it is very easy for you to pass your exam in a short time. You just need to spend 20-30 hours on studying; you will have more free time to do other things.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q45-Q50):

NEW QUESTION # 45

You create a work order, in which some of the operations have components with the Push supply type. While reporting material consumption on the Report Material Transaction page, you want the Push components to default whenever the operator selects Show Components.

Which setup task must you perform in the Manage Plant Parameters section to achieve this?

- A. Set Default Transaction Mode to Entered and Default Transaction Quantity to Work Definition.
- B. Set Default Transaction Mode to Entered.
- C. Set Default Transaction Mode to ALL

- **D. Set Default Transaction Mode to Work Definition.**

Answer: D

Explanation:

To ensure that Push components are automatically defaulted when reporting material consumption on the Report Material Transaction page, you must configure the system to use the Work Definition as the default source for transactions.

* Setting Default Transaction Mode to Work Definition ensures that the system automatically pulls the component list and quantities as defined in the work order or work definition when operators perform material transactions. This setting streamlines the material consumption process for Push supply type components.

Oracle Manufacturing Cloud 's " Plant Parameters " configuration guide explains how to set the Default Transaction Mode to manage material transactions efficiently, particularly when dealing with Push components.

NEW QUESTION # 46

A manufacturing plant works in two shifts of eight hours each. A Manufacturing user wants four units of a work center resource, R1, to be available during nonworking time, outside the regular shift on a particular day.

Which is the correct sequence of steps to create a resource exception on the Manage Work Center Resource Calendar page?

- A. Click inside the existing shift time on a specific date > Go to the Actions menu > Select Create Resource Exception > Populate the Start and Duration Fields > Go to the Resource Availability region > Populate A units in the Default Availability column.
- B. Click outside the existing shift time on a specific date > Go to the Create Work Center page > Click the Resource Availability tab > Click the Add icon > Select R1 from the Resource drop-
- C. Click Inside the existing shift time on a specific date > Go to the Create Work Center page > Click the Resource Availability tab > Click the Add icon > Select R1 from the Resource dropdown list > Enter 4 in Default Units Available.
- **D. Click outside the existing shift time on a specific date > Go to the Actions menu > Select Create Resource Exception > Populate the Start and Duration fields > Go to the Resource Availability and Overrides region > Populate 4 units in the Availability Override column.**

Answer: D

Explanation:

In Oracle Manufacturing Cloud, to make a resource (R1) available outside the regular shift for a specific day, you need to create a resource exception . This allows you to override the default shift schedule and make additional units of the resource available.

* Click outside the existing shift time ensures that the exception applies to non-working hours.

* Select Create Resource Exception from the Actions menu to initiate the exception.

* Populate the Start and Duration fields to define the non-working period during which the resource will be available.

* Enter 4 units in the Availability Override column to ensure that 4 units of resource R1 are made available for use during the exception period.

Oracle Manufacturing Cloud guide on managing resource calendars explains how to override shift availability using the resource exception functionality to schedule resources outside of normal working hours.

NEW QUESTION # 47

You are implementing project-driven supply chain functionality. You need to set up movement requests to issue or transfer project material to manage the inventory associated with projects and tasks.

Which two are types of movement requests to issue or transfer project material?

- **A. Transfer project material from one subinventory to another.**
- B. Create a movement receipt line with the Project Costing widget.
- C. Pick transactions Interfaced by the project costing project and task using the project material, common Inventory, or Inventory from another project.
- **D. Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project.**

Answer: A,D

Explanation:

When setting up movement requests in a project-driven supply chain, you need to manage inventory associated with specific projects and tasks. The two correct types of movement requests in this context are:

* Statement A : Transfer project material from one subinventory to another - This is a standard type of movement request in Oracle Cloud, allowing project materials to be transferred between subinventories.

It is essential for managing inventory tied to specific projects and tasks, ensuring that materials are available where needed for project execution.

Oracle Fusion SCM Cloud: Inventory Management Guide describes how material transfers can be executed between subinventories, including project-based transfers.

Statement D : Perform manual pick for such movement requests using the project material, common inventory, or inventory from another project - Manual picking for project-specific material is another supported operation. It allows users to perform manual picks from various sources, such as project material, common inventory, or even inventory from other projects.

Reference : Oracle Project-Driven Supply Chain documentation explains how manual picks can be configured to source inventory based on project requirements.

Incorrect Statements:

Statement B : Pick transactions are not interfaced specifically by project costing. Although project costing is relevant for tracking costs, it is not the driving factor behind pick transactions.

Statement C : There is no concept of creating a movement receipt line with the " Project Costing widget " in Oracle Manufacturing Cloud.

NEW QUESTION # 48

Your customer runs two daily shifts in their plant: morning shift and evening shift. A resource, LATHE, is assigned to the work center W1. There are five units of LATHE available, of which three units are available for the morning shift and the remaining units for the evening shift.

Which two actions must the customer perform to associate LATHE with W1?

- A. Deselect the Available 24 Hours check box and, in the Resource Availability region, enter 3 against LATHE in the Morning Shift column.
- B. Select the Available 24 Hours check box and, in the Resource Availability region, enter 3 against LATHE In the Morning Shift column.
- C. Select the Available 24 Hours check box and, in the Resource Availability region, enter 2 against LATHE in the Evening Shift column.
- D. Deselect the Available 24 Hours check box and, in the Resource Availability region, enter 40% against LATHE In the Evening Shift column.
- E. Deselect the Available 24 Hours check box and, in the Resource Availability region, enter ~z against LATHE in the Evening Shift column,
- F. Deselect the Available 24 Hours check box and, in the Resource Availability region, enter 60% against LATHE in the Morning Shift column.

Answer: A,E

Explanation:

To allocate specific units of the LATHE resource to morning and evening shifts in Oracle Manufacturing Cloud, you need to configure the resource availability per shift as follows:

* Deselect the Available 24 Hours check box - This ensures that the resource availability is limited to specific shifts instead of being available 24/7.

* Enter 3 in the Morning Shift column - Assigning 3 units of LATHE to the morning shift allocates those units for use only during the morning.

* Enter 2 in the Evening Shift column - Assigning 2 units to the evening shift ensures that the remaining LATHE units are available for the evening shift.

Oracle Cloud SCM documentation details how to manage Resource Availability for specific shifts by configuring the number of units assigned to different shifts in a work center.

NEW QUESTION # 49

Two work definitions are created in the application: one for Engine Finished Good and the other for Pallet Finished Good. The Engine Finished Good item should have Pallet Finished Good as one of its components.

How can you establish the relationship between the Pallet and Engine work definitions?

- A. Create a subinventory to serve as the completion subinventory for yielding Pallet, and then use the same subinventory to serve as the supply subinventory of Pallet in the work definition created for Engine.
- B. Assign a higher priority to the work definition created for Engine and a lower one to the work definition for Pallet.

- C. Work definition versions can be used to tie the work orders.
- D. The two work definitions can be tied through Project or Selban numbers.

Answer: A

Explanation:

To establish a relationship between the work definitions of Engine Finished Good and Pallet Finished Good, you can create a common subinventory. This subinventory will serve as the completion subinventory for the Pallet Finished Good and the supply subinventory for the Engine Finished Good. This ensures that the Pallet Finished Good is completed in one process and is then available as a component for the Engine Finished Good.

* Subinventory Linking : Using a common subinventory ties the output from one work definition as an input to another. The Pallet becomes an inventory item that is consumed in the production of the Engine.

Oracle Manufacturing Cloud ' s documentation on work definitions and inventory setups explains how subinventories are used to link different stages of production.

NEW QUESTION # 50

.....

According to different kinds of questionnaires based on study condition among different age groups, we have drawn a conclusion that the majority learners have the same problems to a large extent, that is low-efficiency, low-productivity, and lack of plan and periodicity. As a consequence of these problem, our 1z0-1075-25 test prep is totally designed for these study groups to improve their capability and efficiency when preparing for 1z0-1075-25 Exams, thus inspiring them obtain the targeted 1z0-1075-25 certificate successfully. There are many advantages of our 1z0-1075-25 question torrent that we are happy to introduce you and you can pass the exam for sure.
