## Start Exam Preparation with ActualVCE International Code Council M2 Practice Questions

Prepare for the International Code Council M2 exam with ease using ActualVCE International Code Council M2 exam questions in a convenient PDF format. Our PDF files can be easily downloaded and accessed on various devices, including PCs, laptops, Macs, tablets, and smartphones. With the Commercial Mechanical Inspector (M2) PDF questions, you have the flexibility to study anytime and anywhere, eliminating the need for additional classes. Our comprehensive PDF guide contains all the essential information required to pass the M2 in one shot.

## International Code Council Commercial Mechanical Inspector Sample Questions (Q39-Q44):

### NEW QUESTION # 39

The minimum rise required for a 10-foot run of vent connector is \_\_\_\_\_ inches.

- A. 2-1/2
- B. 1-1/4
- C. 0
- D. 1-1/2

**Answer: A**

Explanation:

Vent connectors must be installed with a minimum rise of 1/4 inch per foot . For a 10-foot run, the required rise is:  
 $10 \times 1/4 \text{ inch} = 2.5 \text{ inches}$  .

That equals 2-1/2 inches , so Option D is correct.

**NEW QUESTION # 40**

What is the minimum distance required between a combustion air opening at the exterior of a building and a lot line?

- A. 2 feet
- **B. 10 feet**
- C. 3 feet
- D. 8 feet

**Answer: B**

Explanation:

The ICC opening-location rule requires intake openings to be located not less than 10 feet from lot lines or buildings on the same lot . A combustion-air opening taken from the exterior follows that minimum separation rule, so 10 feet is the correct answer. Therefore, Option D is correct.

**NEW QUESTION # 41**

When a furnace is installed in a 66-inch-high attic, the maximum distance from the passageway access to the furnace shall be \_\_\_\_\_ ft., measured along the centerline of the passageway.

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

ICC mechanical access provisions for appliances in attics require the passageway to be not more than 20 feet in length , measured along the centerline of the passageway from the opening to the appliance, where the attic passageway is the standard reduced-height access condition. Since the attic height given is 66 inches, the standard maximum length applies, so Option C is correct. The 50-foot allowance applies only under a different exception where the passageway is unobstructed and at least 6 feet high for its entire length.

**NEW QUESTION # 42**

What type of cooking appliance is required to have its own independent hood and exhaust system?

- A. Light-duty
- **B. Extra-heavy-duty**
- C. Heavy-duty
- D. Medium-duty

**Answer: B**

Explanation:

The IMC specifically provides that Type I hoods used over extra-heavy-duty cooking appliances shall not cover other appliances requiring fire-extinguishing protection and shall discharge to an independent exhaust system . Therefore, D is correct.

**NEW QUESTION # 43**

The exhibit shows a \_\_\_\_\_ in. diameter gas line between unit heaters 5 and 8.

- A. 1-1/4
- B. 1-1/8
- C. 0
- D. 3/4

**Answer: C**

Explanation:

Based on the mechanical plan shown in the exhibit, the gas line between unit heaters 5 and 8 is labeled as 1 inch in diameter. Therefore, the correct answer is B.

## NEW QUESTION # 44

.....

Do you want to obtain the latest information for your exam timely? Then you can choose us, since we can do that for you. M2 study guide of us offers you free update for 365 days, so that you can get the latest information for the exam timely. And the latest version for M2 exam materials will be sent to your email automatically. In addition, M2 Exam Materials are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. We have online and offline service, and if you have any questions for M2 exam dumps, you can consult us.
