Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q21-Q26):

NEW QUESTION # 21
What are the attributes of a successful OGL project's testing document?

- A. Is saved to your computer desktop
- B. Is missing the status of development for each content item
- C. Includes people responsible for review and sign-off

Answer: C

Explanation:
A successful OGL testing document must identify people responsible for review and sign-off to ensure accountability and completion. Saving to a desktop (option B) is irrelevant to success, and missing development status (option C) undermines tracking, making it a flaw, not an attribute.

NEW QUESTION # 22
What inputs should be considered when defining your OGL project scope and timelines?

- A. Fusion quarterly release schedule
- B. Availability of test user accounts
- C. Team member work schedules
- D. Email reminders from OGL console

Answer: A

Explanation:
The Fusion quarterly release schedule (option A) is a critical input for defining OGL project scope and timelines, as it dictates content updates and testing windows. Email reminders (option B), test user availability (option C), and team schedules (option D) are secondary or logistical, not scope-defining. The release schedule ensures alignment with application changes, anchoring the project's temporal framework.

NEW QUESTION # 23
What is the correct order of how key activities occur during the Oracle Cloud Fusion quarterly update cycle?

- A. Prepare, Test, Update, Publish
- B. Prepare, Update, Publish, Test
- C. Test, Publish, Update, Prepare
- D. Test, Publish, Prepare, Update

Answer: A

Explanation:
The Oracle Cloud Fusion quarterly update cycle follows: Prepare (assess changes), Test (validate content), Update (modify as needed), Publish (deploy to production) (option B). This logical sequence ensures readiness, verification, refinement, and final release, aligning with Oracle's structured approach to managing updates. Other options disrupt this flow, e.g., testing before preparing (option A) or publishing before updating (option C), making B the correct, systematic order.

NEW QUESTION # 24
Preparing end users to look for help in OGL and preparing support contacts to guide users with OGL are best practices during which activity?

- A. OGL kickoff

- B. Hypercare
- C. Refine phase

Answer: B

Explanation:
Hypercare, the post-launch support period, is when best practices like preparing end users to use OGL's help features and training support contacts to assist with OGL are implemented. This phase focuses on smoothing the transition to live use, ensuring users know where to find assistance and support staff are equipped to guide them. The Refine phase (option A) is for content optimization, not user preparation, and the OGL kickoff (option C) is for project initiation, not post-launch support. Hypercare's emphasis on immediate user enablement and support readiness makes it the ideal context for these activities, ensuring a seamless go-live experience.

NEW QUESTION # 25
Before provisioning OGL items to your content, what OGL feature allows you to provide a quick, visual summary of a process guide?

- A. Analytics report
- B. Step guide
- C. Flow chart
- D. Display group

Answer: C

Explanation:
A Flow chart (option A) provides a quick, visual summary of a process guide, illustrating steps and flow before provisioning. Display groups (option B) organize content, Step guides (option C) detail instructions, and Analytics reports (option D) analyze usage-none offer a visual process overview. Flow charts aid in planning and review, offering a clear, diagrammatic representation of workflows.
