Training Cloud-Digital-Leader Online, Reliable Cloud-Digital-Leader Dumps Pdf

Some people are worrying about that they cannot operate the windows software and the online test engine of the Cloud-Digital-Leader training engine smoothly. We ensure that you totally have no troubles in learning our Cloud-Digital-Leader study materials. All small buttons are designed to be easy to understand. Also, the layout is beautiful and simple. Complex designs do not exist in our Cloud-Digital-Leader Exam Guide. You can find that our content is easy to follow and practice.

Salary & Growth Opportunities with Google Cloud Digital Leader Exam

Achieving this Google Cloud Digital Leader Certification will have a major impact on your salary and growth opportunities. Earning this certification demonstrates that you know the content, strategies, and best practices needed to build an effective cloud computing architecture.

It is ideal for individuals looking to break into the cloud computing industry or advance their careers within the already established cloud computing industry.

This certification will also be of interest to:

- IT professionals who want to learn how they can use Google Cloud Platform to solve common business problems using cloud technology.
- Students who want hands-on experience working with cloud technologies.

- Developers who want to build high-performance applications that run on Google Cloud Platform.
- Testers who want a better understanding of cloud technologies and how they can be used in testing environments.

Google Cloud Digital Leader Sample Questions (Q54-Q59):

NEW QUESTION # 54

What are the different storage & database services in GCP? Which is Google cloud storage and database below the option

- A. Cloud Spanner
- B. Persistent Disk
- **C. All of the Above**
- D. Cloud SQL.
- E. Cloud Bigtable

Answer: C

Explanation:

NEW QUESTION # 55

A retail store has discovered a cost-effective solution for creating self-service kiosks. They can use existing check-out hardware and purchase a virtual customer service application. Why do they also need an API?

- A. To migrate all customer data for disaster recovery.
- B. To update the check-out hardware remotely.
- C. To connect the check-out hardware to the public cloud.
- **D. To connect the new application with the legacy system.**

Answer: D

Explanation:

Explanation

APIs can create new business value by connecting legacy systems (the checkout hardware) with new software (the virtual customer service application).

NEW QUESTION # 56

Your organization is on a critical path with recently developed applications. They are going into production in a month. A few million users are expected to use the new application. They want to ensure minimum disruption when the application goes live. Any issues have to be dealt with within minutes and resolved as quickly as possible. Which Support package should they take?

- **A. Premium Support**
- B. Standard Support
- C. Enhanced Support
- D. Basic Support

Answer: A

Explanation:

Explanation

Premium Support will have a 15-minute response time with 24/7 response for high & critical impact issues.

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION # 57

Your ed-tech start-up was originally launched in a small geography. Any user sign-ups, course progress, tests taken, etc. are captured on a self-managed MySQL database. Every user generates many such transactions.

Now you're taking the application globally and preparing for a much larger influx of users from all over the world. The existing

MySQL server is unlikely to be able to scale. Which convenient option can be considered?

- A. Migrate to Cloud SQL
- **B. Migrate to Cloud Spanner**
- C. Migrate to Bigtable
- D. Migrate to BigQuery

Answer: B

Explanation:

Explanation

Cloud Spanner is a global scale SQL database that scales extremely well. That would be the best choice.

NEW QUESTION # 58

Your organization is running all its workloads in a private cloud on top of a hypervisor. Your organization has decided it wants to move to Google Cloud as quickly as possible. Your organization wants minimal changes to the current environment, while using the maximum amount of managed services Google offers.

What should your organization do?

- A. Migrate the workloads to Bare Metal Solution
- **B. Migrate the workloads to Compute Engine**
- C. Migrate the workloads to Google Cloud VMware Engine
- D. Migrate the workloads to Google Kubernetes Engine

Answer: B

Explanation:

Explanation

Migrate for Compute Engine enables you to lift and shift workloads at scale to Google Cloud Compute Engine with minimal changes and risk.
