### Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q16-Q21):

#### NEW QUESTION # 16

An OSC lead has provided company information, identified that they are seeking CMMC Level 2, stated that they handle FCI, identified stakeholders, and provided assessment logistics. The OSC has provided the company's cyber hygiene practices that are posted on every workstation, visitor logs, and screenshots of the configuration of their FedRAMP-approved applications. The OSC has not won any DoD government contracts yet but is working on two proposals Based on this information, which statement BEST describes the CMMC Level 2 Assessment requirements?

- A. Ready because all DoD contractors are required to achieve CMMC Level 2; therefore, they are being proactive in seeking certification.
- B. Ready because there is no need to certify this company until after they win a DoD contract.
- **C. Not ready because the OSC still lacks artifacts that prove they have implemented all the CMMC Level 2 Assessment requirements.**
- D. Not ready because the OSC is not on contract because they do not know the scope of FCI protection required by the contract.

**Answer: C**

Explanation:

CMMC Level 2 Readiness and Certification Requirements CMMC Level 2 is required for Organizations Seeking Certification (OSCs) that handle Controlled Unclassified Information (CUI) and aligns with NIST SP 800-171's 110 security controls.

Key Readiness Indicators for a Level 2 Assessment:

The OSC must have implemented all 110 security practices from NIST SP 800-171.

Documented and validated cybersecurity policies and procedures must exist.

The OSC must be prepared to provide objective evidence (artifacts) proving compliance.

Why the OSC in the Question is Not Ready:

They have not won a DoD contract yet# This means they do not yet have a contractually defined CUI environment, which is the foundation for defining their security scope.

They have only provided FCI-related artifacts (e.g., visitor logs, workstation policies, FedRAMP configurations).

Lack of full documentation of CMMC Level 2 controls# The assessment requires evidence for all 110 security practices (e.g., system security plans, incident response records, security awareness training documentation).

A). "Ready because there is no need to certify this company until after they win a DoD contract." Incorrect# Some organizations seek certification proactively before winning contracts. However, readiness depends on implementing all 110 required controls, not contract status alone.

B). "Not ready because the OSC is not on contract because they do not know the scope of FCI protection required by the contract." Incorrect# CMMC Level 2 focuses on CUI, not just FCI. While FCI protection is important, the assessment's focus is on CUI security requirements, which are not fully addressed by the provided artifacts.

D). "Ready because all DoD contractors are required to achieve CMMC Level 2; therefore, they are being proactive in seeking certification." Incorrect# While it is commendable that the OSC is being proactive, readiness is based on full compliance with NIST SP 800-171, not just intent.

#Final Answer C. Not ready because the OSC still lacks artifacts that prove they have implemented all the CMMC Level 2 Assessment requirements.

### NEW QUESTION # 17

Validation of findings is an iterative process usually performed during the Daily Checkpoints throughout the entire assessment process. As a validation activity, why are the preliminary findings important?

- A. It determines whether the OSC will be rated MET or NOT MET on their assessment.
- B. It confirms that the Assessment Team's findings are right and cannot be changed.
- C. It corroborates the Assessment Team's understanding of the CMMC practices and controls.
- **D. It allows the OSC to comment and provide additional evidence.**

**Answer: D**

### NEW QUESTION # 18

Which statement BEST describes a LTP?

- **A. Instructs a curriculum approved by CMMC-AB**
- B. May market itself as a CMMC-AB Licensed Provider for testing
- C. Creates DoD-licensed training
- D. Delivers training using some CMMC body of knowledge objectives

**Answer: A**

Explanation:

Understanding Licensed Training Providers (LTPs) in CMMC A Licensed Training Provider (LTP) is an entity that is authorized by the Cybersecurity Maturity Model Certification Accreditation Body (CMMC-AB) to deliver CMMC training based on an approved curriculum.

- \* Provides CMMC-AB-approved training programs for individuals seeking CMMC certifications.
- \* Uses an official CMMC curriculum that aligns with the CMMC Body of Knowledge (BoK) and other CMMC-AB guidance.
- \* Prepares students for CMMC roles, such as Certified CMMC Assessors (CCA) and Certified CMMC Professionals (CCP).

Key Responsibilities of an LTP:

- \* A. Creates DoD-licensed training # Incorrect
- \* The CMMC-AB, not the DoD, manages LTP licensing. LTPs do not create new training content but must follow an approved curriculum.
- \* B. Instructs a curriculum approved by CMMC-AB # Correct
- \* LTPs teach a curriculum that has been approved by the CMMC-AB, ensuring consistency in CMMC training.
- \* C. May market itself as a CMMC-AB Licensed Provider for testing # Incorrect
- \* LTPs provide training, not testing. Testing is handled by Licensed Partner Publishers (LPPs) and exam bodies.
- \* D. Delivers training using some CMMC body of knowledge objectives # Incorrect
- \* LTPs must fully adhere to the CMMC-AB-approved curriculum, not just "some" objectives.

Why is the Correct Answer "Instructs a curriculum approved by CMMC-AB" (B)?

- \* CMMC-AB Licensed Training Provider (LTP) Program Guidelines
- \* Defines LTPs as entities that deliver CMMC-AB-approved training programs.
- \* CMMC Body of Knowledge (BoK)
- \* Specifies that training must follow the CMMC-AB-approved curriculum to ensure standardization.
- \* CMMC-AB Training & Certification Framework
- \* Requires LTPs to deliver structured training that meets CMMC-AB guidelines.
