높은 통과율 Slack-Admn-201시험대비 덤프 최신 데모 덤프공부

Salesforce인증 Slack-Admn-201시험을 한방에 편하게 통과하여 자격증을 취득하려면 시험전 공부 가이드가 필수입니다. PassTIP에서 연구제작한 Salesforce인증 Slack-Admn-201덤프는Salesforce인증 Slack-Admn-201시험을 패스하는

데 가장 좋은 시험준비 공부자료입니다. PassTIP덤프공부자료는 엘리트한 IT전문자들이 자신의 노하우와 경험으로 최선을 다해 연구제작한 결과물입니다. IT인증자격증을 취득하려는 분들의 결은PassTIP가 지켜드립니다.

최신 Salesforce Administrator Slack-Admn-201 무료샘플문제 (Q118-Q123):

질문 # 118

Your company uses Slack Enterprise Grid.

An employee loses an office device that is logged into Slack.

What should an Org Admin do to mitigate risk?

- A. Ask the user to log out of the device by clicking End all sessions in their Slack settings.
- B. Notify the Workspace Owner(s) for the workspace(s) the user is a member of so they can temporarily remove the user from their workspace(s).
- C. Deactivate the user in Slack, and reactivate them once the device is located.
- D. Sign member out of the Enterprise Grid org by selecting Sign out of Slack in the admin dashboard.

정답: D

설명:

Slack's Enterprise Grid security recommendations state:

"Org Admins can remotely sign a member out of all sessions (desktop, mobile, web) via the admin dashboard to immediately prevent further access without deactivating the user." Asking the user (A) is unreliable because they lost the device. Deactivation (B) is extreme if the device may be recovered. Workspace-level action (D) is insufficient for org-wide risk.

(Reference: Slack Administration Study Guide - Managing Lost or Compromised Devices)

-

질문 # 119

You're a Workspace Owner at a small business that used Slack's Free plan in their first year. However, its business is growing fast enough to justify upgrading to a paid plan.

The requirements:

- * Users want to be able to access their old messages and integrate Slack with their calendars.
- * You want to use Okta to provision users in order to provide additional security and simplicity to the employee onboarding process.
- * Field representatives need to be able to access Slack securely on their company-owned mobile devices.

Based on the requirements, what should you recommend?

(Select the best answer.)

- A. Move to the Slack Business+ plan.
- B. Stay with the Slack Free plan for another year.
- C. Move to the Slack Enterprise Grid plan.
- D. Move to the Slack Pro plan.

정답: A

설명:

The Business+ plan is the appropriate recommendation here because:

- * It includes full message history access (unlike the Free plan, which limits access to recent messages only).
- * It supports SAML-based SSO integrations like Okta, allowing for secure user provisioning and onboarding.
- * It provides Enterprise Mobility Management (EMM) integrations for managing and securing Slack access on company-owned mobile devices.

Official Slack documentation confirms:

"Slack Business+ includes enhanced administration and security controls, including SAML-based SSO, user provisioning with supported IdPs, and mobile device management (MDM) support via EMM." Enterprise Grid (option D) would be overkill for a small growing business unless they required multi-workspace organization and complex compliance features.

(Reference: Slack Administration Study Guide - Plans and Feature Comparison)

질문 # 120

You're an Org Admin setting up a new workspace for executives collaborating on a confidential acquisition.

How should you set up the workspace access setting?

- A. Hidden
- **B. Invite Only**
- C. By Request
- D. Open

정답: B

설명:

Slack recommends for sensitive or confidential projects:

"An 'Invite Only' workspace allows Org Admins or Workspace Owners to control membership, ensuring sensitive topics remain private until disclosure is appropriate." Hidden (C) conceals the workspace name, but Invite Only (D) is the correct choice for manually controlling access during sensitive phases.

(Reference: Slack Administration Study Guide - Workspace Access Management)

질문 # 121

An IT administrator at Watch Corp is responsible for launching Slack to the company. The security team has outlined the importance of keeping all applications on all devices updated to the latest version.

How should the IT administrator roll out Slack?

- A. Send an announcement to the company, communicating the steps for how to download and update the Slack app, and outlining why it is important for the security team.
- B. Propose that users only use Slack in a browser, so employees only have to worry about updating their browser.
- C. Install the Slack Desktop App to all of their employees' machines, disabling automatic updates.
- **D. Install the Slack Desktop App to all of their employees' machines, allowing automatic updates.**

정답: D

설명:

Slack's best practice for maintaining security is:

"Deploy the Slack desktop app to users and allow automatic updates to ensure that users are always running the latest, most secure version." Disabling updates (Option B) would increase security risks. Browser usage alone (Option A) is insufficient for a full Slack experience, and Option D relies too much on user compliance instead of ensuring deployment at scale.

(Reference: Slack Administration Study Guide - Deployment and Security Best Practices)

-

질문 # 122

You're the Primary Org Owner for your university's Slack Enterprise Grid. You're responsible for launching Slack to first-year students and faculty members.

What is the most efficient way to set up students as full members and faculty members as Workspace Admins?

(Select the best answer.)

- A. Use "Just-in-time" provisioning to allow students and faculty members to create an account upon first login, eliminating the time and effort with onboarding new accounts. Then, promote each faculty member to Workspace Admin.
- **B. Use SCIM provisioning to create accounts for students and faculty members, and create an identity provider (IdP) group for all faculty members. Then, promote the members of the IdP group in bulk to Workspace Admins.**
- C. Use SCIM provisioning to create accounts for students and faculty members. Then, update their profile fields to reflect their title by syncing with the SCIM API.
- D. Use either "Just-in-time" or SCIM provisioning to invite students and faculty members to Slack. Then, create a user group of faculty members and promote that user group in bulk to Workspace Admins.

정답: B

설명:

Slack recommends:

"Using SCIM provisioning combined with IdP group mapping allows organizations to efficiently manage large groups of users and assign roles based on IdP groups." This way, you automate role assignment (faculty as Workspace Admins) while onboarding users. Options A and D don't promote users automatically. Option C is less efficient compared to pre-provisioning via SCIM and group

mapping.

(Reference: Slack Administration Study Guide - SCIM Provisioning and IdP Group Mapping)
