問題 #56

What is the objective of using scaling Scrum techniques when coordinating large teams in complex projects?

- A. To reallocate staff to skill-based teams such as developers in one single team
- **B. To ensure alignment in architecture, configuration, and integration**
- C. To bring all specialists, such as the company legal advisors, into the scrum team
- D. To manage the flow of information between the project and stakeholders

答案：B

解題說明：

C is correct because ensuring alignment in architecture, configuration, and integration is one of the objectives of using scaling Scrum techniques when coordinating large teams in complex projects. Scaling Scrum techniques are methods that help to apply Scrum principles and practices across multiple teams working on a large-scale product or program. Scaling Scrum techniques aim to ensure alignment in architecture, configuration, and integration by establishing a common vision, backlog, definition of done, and cadence for the teams, and by facilitating cross-team communication and collaboration

問題 #57

What accelerator can help you document the configuration definition in the Explore phase?

- A. Change request template
- B. Data definition template
- **C. Backlog template**
- D. Test plan template

答案：C

解題說明：

The backlog template is used in the Explore phase to document and track configurations and requirements identified during workshops. It serves as a reference for configuration activities and aligns with Agile practices by maintaining a structured list of needed changes and customizations.

問題 #58

How do you set up Scrum teams?Note: There are 2 correct answers to this question.

- A. By type of work, like configuration Scrum, documentation Scrum, and testing Scrum
- **B. As a cross-functional team covering multiple functions, like configuration, data loads, and v u testing**
- **C. Based on end-to-end processes like order-to-cash**
- D. Based on group size, but a minimum of 12 people

答案：B,C

解題說明：

* A is correct because based on end-to-end processes like order-to-cash is one of the ways to set up Scrum teams. This way, the Scrum teams are organized around the business value streams that they support, and they have a clear understanding of the customer needs and expectations. This also helps to reduce dependencies and handovers between teams, and to optimize the flow of work.

* C is correct because as a cross-functional team covering multiple functions, like configuration, data loads, and testing is one of the ways to set up Scrum teams. This way, the Scrum teams have all the skills and competencies that they need to deliver a complete

and working product increment in each Sprint. This also helps to increase collaboration and communication within the team, and to foster a sense of ownership and accountability.

問題 #59

Which estimation technique can you use in an Agile delivery approach to size the user stories during sprint planning?

- A. Relative effort estimate in Ideal Person Days that reflects the best estimate by the project
