

# **2026 NSE7\_SSE\_AD-25 Unlimited Exam Practice - Fortinet Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator - Valid Pdf NSE7\_SSE\_AD-25 Torrent**

In modern society, whether to obtain NSE7\_SSE\_AD-25 certification has become a standard to test the level of personal knowledge. Many well-known companies require the NSE7\_SSE\_AD-25 certification at the time of recruitment. Whether you're a student or a white-collar worker, you're probably trying to get the certification in order to get more job opportunities or wages. If you are one of them, our NSE7\_SSE\_AD-25 Exam Guide will effectively give you a leg up.

Our NSE7\_SSE\_AD-25 learning questions are always the latest and valid to our loyal customers. We believe this is a basic premise for a company to continue its long-term development. The user passes the NSE7\_SSE\_AD-25 exam and our market opens. This is a win-win situation. Or, you can use your friend to find a user who has used our NSE7\_SSE\_AD-25 Guide quiz. In fact, our NSE7\_SSE\_AD-25 study materials are very popular among the candidates. And more and more candidates are introduced by their friends or classmates.

## **100% Pass NSE7\_SSE\_AD-25 - Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator –The Best Unlimited Exam Practice**

Since it is obvious that different people have different preferences, we have prepared three kinds of different versions of our NSE7\_SSE\_AD-25 practice test, PDF, Online App and software version. Last but not least, our customers can accumulate NSE7\_SSE\_AD-25 exam experience as well as improving their exam skills in the mock exam. What's more, our software version of NSE7\_SSE\_AD-25 practice materials can best simulate the real exam, but it can only be operated under the Windows operation system. I strongly believe that you can find the version you want in multiple choices of our NSE7\_SSE\_AD-25 practice test.

## **Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q72-Q77):**

**NEW QUESTION # 72**

How does FortiSASE hide user information when viewing and analyzing logs?

- A. By encrypting data using Secure Hash Algorithm 256-bit (SHA-256)
- B. By hashing data using Blowfish
- C. By hashing data using salt
- D. By encrypting data using advanced encryption standard (AES)

**Answer: C**

Explanation:

FortiSASE hides user information when viewing and analyzing logs by hashing data using salt. This approach ensures that sensitive user information is obfuscated, enhancing privacy and security.

\* Hashing Data with Salt:

- \* Hashing data involves converting it into a fixed-size string of characters, which is typically a hash value.
- \* Salting adds random data to the input of the hash function, ensuring that even identical inputs produce different hash values.
- \* This method provides enhanced security by making it more difficult to reverse-engineer the original data from the hash value.

\* Security and Privacy:

- \* Using salted hashes ensures that user information remains secure and private when stored or analyzed in logs.
- \* This technique is widely used in security systems to protect sensitive data from unauthorized access.

FortiSASE 23.2 Documentation: Details on how FortiSASE implements data hashing and salting to secure user information in logs.

#### NEW QUESTION # 73

Which two purposes is the dedicated IP address used for in a FortiSASE deployment? (Choose two.)

- A. For isolation and identification
- B. For allocation and assignment of unique IP addresses to remote users
- C. For regulatory compliance
- D. For user access control to FortiSASE

**Answer: A,B**

Explanation:

In FortiSASE, dedicated IP addresses are used to assign unique IPs to remote users, enabling precise traffic control, auditing, and user identification. They also support traffic isolation for enhanced security and policy enforcement.

#### NEW QUESTION # 74

How does FortiSASE hide user information when viewing and analyzing logs?

- A. By masking log data
- B. By compressing log data
- C. By hashing log data
- D. By tokenization in log data

**Answer: C**

Explanation:

FortiSASE hides user information in logs by using hashing, which anonymizes sensitive data such as usernames or IP addresses while still allowing for consistent tracking and analysis.

#### NEW QUESTION # 75

When viewing the daily summary report generated by FortiSASE, the administrator notices that the report contains very little data. What is a possible explanation for this almost empty report?

- A. Digital experience monitoring is not configured.
- B. There are no security profile group applied to all policies.
- C. Log allowed traffic is set to Security Events for all policies.

- D. The web filter security profile is not set to Monitor

**Answer: C**

Explanation:

If the daily summary report generated by FortiSASE contains very little data, one possible explanation is that the "Log allowed traffic" setting is configured to log only "Security Events" for all policies. This configuration limits the amount of data logged, as it only includes security events and excludes normal allowed traffic.

\* Log Allowed Traffic Setting:

- \* The "Log allowed traffic" setting determines which types of traffic are logged.
- \* When set to "Security Events," only traffic that triggers a security event (such as a threat detection or policy violation) is logged.
- \* Impact on Report Data:
- \* If the log setting excludes regular allowed traffic, the amount of data captured and reported is significantly reduced.
- \* This results in reports with minimal data, as only security-related events are included.

References:

FortiOS 7.6 Administration Guide: Provides details on configuring logging settings for traffic policies.

FortiSASE 23.2 Documentation: Explains the impact of logging configurations on report generation and data visibility.

**NEW QUESTION # 76**

What is the maximum number of Secure Private Access (SPA) service connections (SPA hubs) supported in the SPA use case?  
(Choose one answer)

- A. 0
- **B. 1**
- C. 2
- D. 3

**Answer: B**

Explanation:

In recent versions of FortiSASE (starting from version 24.4 and later), the platform has increased its scalability to support larger enterprise environments.

\* Maximum Hub Support: According to the FortiSASE Mature Administration Guide and the FortiSASE 25.3.148 Feature Release Notes, administrators can now configure a maximum of 12 SPA Service Connections (SPA hubs). Previously, this limit was restricted to 4 hubs.

\* Scalability for Large Enterprises: This enhancement allows organizations with complex, geographically dispersed networks-such as those with multiple regional datacenters or cloud hubs-to integrate up to 12 distinct FortiGate SD-WAN hubs into their SASE infrastructure.

\* Service Connection Licensing: Each SPA hub requires a dedicated FortiGate SPA Service Connection license. In MSSP environments using FortiCloud Organizations, a single FortiSASE instance can inherit these licenses from a root OU, supporting up to the same cumulative maximum of 12 service connections.

\* Routing and Performance: These 12 hubs form the "Private Access" backbone, where FortiSASE security PoPs act as spokes. The use of BGP (either per-overlay or on loopback) ensures that traffic is dynamically routed to the optimal hub based on the destination network and defined SLA priorities.

**NEW QUESTION # 77**

.....

On the one hand, the software version can simulate the real examination for you and you can download our study materials on more than one computer with the software version of our study materials. On the other hand, you can finish practicing all the contents in our NSE7\_SSE\_AD-25 practice materials within 20 to 30 hours. What's more, during the whole year after purchasing, you will get the latest version of our study materials for free. You can see it is clear that there are only benefits for you to buy our NSE7\_SSE\_AD-25 learning guide, so why not just have a try right now?
