## Pdf CrowdStrike CCFA-200b Format | CCFA-200b Reliable Test Testking

Our CCFA-200b practice questions enjoy great popularity in this line. We provide our CCFA-200b exam braindumps on the superior quality and being confident that they will help you expand your horizon of knowledge of the exam. They are time-tested CCFA-200b Learning Materials, so they are classic. As well as our after-sales services. And we can always give you the most professional services on our CCFA-200b training guide.

## CrowdStrike Falcon Administrator Sample Questions (Q209-Q214):

### NEW QUESTION # 209

Which is a filter within the Host setup and management > Host management page?

- A. User name
- **B. OU**
- C. BIOS Version
- D. Locality

**Answer: B**

Explanation:

OU (organizational unit) is a filter within the Host setup and management > Host management page. The Host management page allows you to view and manage all the hosts in your environment that have Falcon sensors installed. You can filter the hosts by

hostname, group, OS version, sensor version, last seen date, health events, detections, and preventions. You can also filter by OU, which is a logical grouping of hosts based on their Active Directory domain structure.

#### NEW QUESTION # 210

A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after how many days?

- A. 90 Days
- B. 60 Days
- C. 45 Days
- D. 30 Days

**Answer: A**

Explanation:

A sensor that has not contacted the Falcon cloud will be automatically deleted from the hosts list after 90 days. A sensor that has not contacted the Falcon cloud for more than seven days is considered inactive and will be moved from the Host Management page to the Trash page. An inactive sensor will remain in the Trash page for 90 days before being permanently deleted from the Falcon platform. You can restore an inactive sensor from the Trash page if it contacts the Falcon cloud again within 90 days.

#### NEW QUESTION # 211

You want the Falcon Cloud to push out sensor version changes but you also want to manually control when the sensor version is upgraded or downgraded. In the Sensor Update policy, which is the best Sensor version option to achieve these requirements?

- A. Auto - N-1
- B. Specific sensor version number
- C. Auto - TEST-QA
- D. Sensor version updates off

**Answer: B**

Explanation:

The administrator can choose a specific sensor version number in the Sensor Update policy to manually control when the sensor version is upgraded or downgraded. This will allow the Falcon Cloud to push out sensor version changes, but only when the administrator changes the version number in the policy. The other options will either automate the sensor version updates or turn them off completely.

#### NEW QUESTION # 212

Why would you assign hosts to a static group instead of a dynamic group?

- A. You need hosts to be automatically assigned to a group
- B. You are managing more than 1000 hosts
- C. You do not want the group membership to change automatically
- D. You want the group to contain hosts from multiple operating systems

**Answer: C**

Explanation:

The reason why you would assign hosts to a static group instead of a dynamic group is that you do not want the group membership to change automatically. A Static Group is a group that requires manual assignment or removal of hosts. A Static Group will not update its membership based on any criteria or filters. This way, you can have more control over which hosts belong to the group and prevent any unwanted changes.

#### NEW QUESTION # 213

An analyst has reported they are not receiving workflow triggered notifications in the past few days. Where should you first check for potential failures?

- A. Custom Alert History
- **B. Workflow Execution log**
- C. Falcon UI Audit Trail
- D. Workflow Audit log

**Answer: B**

Explanation:

The Workflow Execution log in the Workflow Management option allows you to view the status and results of workflow executions triggered by detection events. You can filter the log by workflow name, status, start and end time, and detection ID. You can also view the details of each execution, including the actions performed, the output received, and any errors encountered. This log can help you troubleshoot potential failures or issues with your workflows.

## NEW QUESTION # 214

.....

If you cannot fully believe our CCFA-200b exam prep, you can refer to the real comments from our customers on our official website before making a decision. There are some real feelings after they have bought our study materials. Almost all of our customers have highly praised our CCFA-200b exam guide because they have successfully obtained the certificate. Generally, they are very satisfied with our CCFA-200b Exam Torrent. Also, some people will write good review guidance for reference. Maybe it is useful for your preparation of the CCFA-200b exam. In addition, you also can think carefully which kind of study materials suit you best. If someone leaves their phone number or email address in the comments area, you can contact them directly to get some useful suggestions.
