Reliable DevOps-Foundation Dumps Book, DevOps-Foundation Reliable Test Guide

We are committed to providing our customers with the most up-to-date and accurate Peoplecert DevOps-Foundation preparation material. That's why we offer free demos and up to 1 year of free Peoplecert Dumps updates if the Peoplecert DevOps-Foundation Certification Exam content changes after purchasing our product. With these offers, our customers can be assured that they have the latest and most reliable PeopleCert DevOps Foundationv3.6Exam (DevOps-Foundation) preparation material.

Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48

Agile funding can be_____

- A. Fixed cost
- B. All of the Above
- C. Continuous cost
- D. Reviewed frequently

Answer: B

Explanation:

Agile funding is flexible and adapts to the iterative, incremental nature of Agile and DevOps projects.

It can be fixed cost for some work, continuous cost for ongoing value streams, and is reviewed frequently to align with evolving priorities.

All three characteristics are true, so D ("All of the Above") is correct.

Extract-style reference:

"Agile funding models support continuous review and adaptation, providing the flexibility required for digital transformation and DevOps ways of working."

- Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Advocates funding models that encourage agility, experimentation, and rapid value delivery.

NEW QUESTION # 49

An organization is finding that their annual budget cycle is failing to support their needs to pivot and scale according to the changes in requirements coming from the business. What funding strategy would help them inject flexibility into their delivery process and match the cadence the business needs?

- **A. Continuous funding**
- B. Hedge betting-based funding
- C. Project-based funding
- D. Quarterly rolling waves

Answer: A

Explanation:

Continuous funding replaces rigid, annual budgeting with a more adaptive model. This approach aligns funding to value streams or long-lived products rather than fixed projects. Funds can be adjusted incrementally based on changing priorities, business feedback, and delivery performance.

This method supports DevOps by allowing teams to pivot quickly, experiment, and scale initiatives without waiting for lengthy budget approvals. It aligns financial governance with the iterative and adaptive nature of DevOps delivery.

A (project-based funding) locks budgets to specific outcomes and timelines, limiting flexibility. C (quarterly rolling waves) is more flexible than annual cycles but less responsive than continuous funding. D is not a recognized funding approach in DevOps.

Therefore, B is the correct choice.

NEW QUESTION # 50

An organization is architecting a DevOps toolchain that includes products from both open source and proprietary software providers.

Which of the following is necessary for applications within the toolchain to connect efficiently and effectively?

- **A. Application Programming Interfaces**
- B. Containers
- C. Microservices
- D. Open source applications

Answer: A

Explanation:

A DevOps toolchain is an integrated set of tools that supports the entire software delivery lifecycle—planning, coding, building, testing, releasing, deploying, operating, and monitoring. Regardless of whether tools are open source or proprietary, their ability to work together depends on Application Programming Interfaces (APIs).

APIs define how different software components communicate and exchange data. In a DevOps context, APIs enable:

- * Automation by allowing tools to trigger actions in other tools
- * Data flow between systems (e.g., CI pipelines updating ticketing systems)
- * Integration across heterogeneous environments

A (open source applications) is about licensing, not integration. B (containers) package and run applications consistently but do not inherently integrate tools. D (microservices) is an architectural style for applications, not the integration mechanism between delivery tools.

Therefore, C—APIs—are essential for efficient, effective toolchain integration.

NEW QUESTION # 51

Which of the following DevOps practices encourages conversation driven development, delivery and support?

- **A. ChatOps**
- B. The Second Way
- C. Communication Platforms
- D. VisOps

Answer: A

NEW QUESTION # 52

Which of the following dictates an organization's culture?

- A. Employees' commitment and loyalty to the company
- B. The leadership style of its executives
- **C. What people value and how they behave**
- D. The vision of its founders

Answer: C

Explanation:

Organizational culture is defined by shared values and behaviors-what people believe is important and how they act in practice.

PeopleCert notes that while founders' vision, leadership style, and employee commitment can influence culture, the actual culture is visible in the consistent behaviors and priorities of the organization's members.

Therefore, B-what people value and how they behave-is the most accurate description of what dictates culture.
