Group1

Group3

Excluded groups

Group

Group2

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area

Statements	Yes	No
Device1 will have Policy1 assigned and will be marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>
Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>

Explanation

Answer Area	Statements	Yes	No
	Device1 will have Policy1 assigned and will be marked as compliant.	<input checked="" type="radio"/>	<input type="radio"/>
	Device2 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>
	Device3 will have Policy1 assigned and will be marked as compliant.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION # 236

You are configuring an SSTP VPN.

When you attempt to connect to the VPN, you receive the message shown in the exhibit. (Click the Exhibit tab.)

What should you do to ensure that you can connect to the VPN?

- A. Change the VPN type
- **B. Install the root certificate**
- C. Generate a computer certificate from the root certification authority (CA)

**Answer: B**

Explanation:

Error message: A certificate chain processed, but terminated in a root certificate which is not trusted by the trust provider.

We need to install a proper root certificate.

Note: Each client computer that connects to a VNet using Point-to-Site must have a client certificate installed. You generate a client certificate from the self-signed root certificate, and then export and install the client certificate. If the client certificate is not installed, authentication fails.

### NEW QUESTION # 237

You have a Microsoft 365 subscription that uses Microsoft Intune Suite.

You use Microsoft Intune to manage devices.

You use Windows Autopilot to deploy Windows 11 to devices.

A support engineer reports that when a deployment fails, they cannot collect deployment logs from failed device.

You need to ensure that when a deployment fails, the deployment logs can be collected.

What should you configure?

- A. the device configuration profile

- B. the Windows Autopilot deployment profile
- C. the enrollment status page (ESP) profile
- D. the automatic enrollment settings

**Answer: C**

Explanation:

<https://learn.microsoft.com/en-us/autopilot/enrollment-status#esp-profiles>

## NEW QUESTION # 238

Case Study 1 - Litware inc

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model

The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11 AM to 10 PM.

Litware has a Microsoft Endpoint Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment

The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

Department	Windows version	Management platform	Domain-joined
Marketing	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Research	10	Endpoint Configuration Manager	Hybrid Azure-AD joined
HR	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Developers	10	Microsoft Intune	Azure AD-joined
Sales	10	Microsoft Intune	Azure AD-joined

The development department uses projects in Azure DevOps to build applications. Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to different contractor.

Currently, the computers are re-provisioned manually by the IT department.

Problem Statements

Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- Management suspects that the source code for the proprietary applications in Azure DevOps is being shared externally.
- Re-provisioning the sales department computers is too time consuming.

Requirements

Business Goals

Litware plans to transition to co-management for all the company-owned Windows 10 computers.

Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements

Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements

Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.
- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.

- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

### Create Windows 10 update ring

Remind user prior to required auto-restart with permanent reminder (minutes) ⓘ

What should you configure to meet the technical requirements for the Azure AD-joined computers?

- A. A password policy from the Microsoft Office 365 portal.
- B. The Password Policy settings in a Group Policy object (GPO).
- C. The Accounts options in an endpoint protection profile.
- D. Windows Hello for Business from the Microsoft Intune blade in the Azure portal.

**Answer: D**

Explanation:

Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days. Group Policy settings for Windows Hello for Business.

These policy settings are available in User configuration and Computer Configuration under Policies > Administrative Templates > Windows Components > Windows Hello for Business.
