

# Using CCAAK Certification Torrent, Pass The Confluent Certified Administrator for Apache Kafka

P.S. Free 2026 Confluent CCAAK dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=1tIZXdFzoC6G5qJArby4yn-JGpxQnvtl>

Many people want to be the competent people which can excel in the job in some area and be skillful in applying the knowledge to the practical working in some industry. But the thing is not so easy for them they need many efforts to achieve their goals. Passing the test CCAAK certification can make them become that kind of people and if you are one of them buying our CCAAK Study Materials will help you pass the test smoothly with few efforts needed. Our CCAAK exam questions are valuable and useful and if you buy our product will provide first-rate service to you to make you satisfied.

Confluent CCAAK learning materials are new but increasingly popular choices these days which incorporate the newest information and the most professional knowledge of the practice exam. All points of questions required are compiled into our Confluent Certified Administrator for Apache Kafka CCAAK Preparation quiz by experts. By the way, the CCAAK certificate is of great importance for your future and education.

## Real Confluent CCAAK PDF Questions [2026] - Get Success With Best Results

If you buy our CCAAK practice engine, you can get rewards more than you can imagine. On the one hand, you can elevate your working skills after finishing learning our CCAAK study materials. On the other hand, you will have the chance to pass the exam and obtain the CCAAK certificate, which can aid your daily work and get promotion. All in all, learning never stops! It is up to your decision now. Do not regret for you past and look to the future.

## Confluent CCAAK Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Apache Kafka® Fundamentals: This section of the exam measures skills of a Kafka Administrator and covers core concepts such as Kafka architecture, components, and data flow. It assesses the candidate's understanding of topics like topics and partitions, brokers, producers, consumers, and message retention.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Kafka Connect:</b> This section of the exam measures skills of a Site Reliability Engineer and addresses the use and management of Kafka Connect for data integration. It includes setting up connectors, managing configurations, and ensuring efficient movement of data between Kafka and external systems.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Troubleshooting:</b> This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Deployment Architecture:</b> This section of the exam measures skills of a Kafka Administrator and covers different Kafka deployment topologies. It evaluates understanding of high availability, disaster recovery, multi-data center replication, and the roles of Zookeeper or KRaft in the cluster architecture.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Apache Kafka® Security:</b> This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Apache Kafka® Cluster Configuration:</b> This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.</li> </ul>

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q55-Q60):

### NEW QUESTION # 55

When a broker goes down, what will the Controller do?

- A. Automatically elect the least loaded broker to become the leader for every orphan's partitions.
- B. Become the leader for the topic/partition that needs a leader, pending the broker return in the cluster.
- C. Wait for a follower to take the lead.
- **D. Trigger a leader election among the remaining followers to distribute leadership.**

**Answer: D**

Explanation:

When a broker goes down, the Controller detects the failure and triggers a leader election for all partitions that had their leader on the failed broker. The leader is chosen from the in-sync replicas (ISRs) of each partition.

### NEW QUESTION # 56

Which property in broker configuration specifies that a broker belongs to a particular rack?

Which property in broker configuration specifies that a broker belongs to a particular rack?

- **A. broker.rack**
- B. client.rack
- C. kafka.rack
- D. zookeeper.rack

**Answer: A**

Explanation:

The broker.rack property is used in a Kafka broker's configuration to specify the rack or availability zone the broker belongs to. This is important for rack-aware replica placement, allowing Kafka to distribute replicas across different racks for fault tolerance.

### NEW QUESTION # 57

Which of the following are Kafka Connect internal topics? (Choose three.)

- A. connect-configs
- B. connect-status
- C. connect-offsets
- D. connect-distributed
- E. connect-standalone

**Answer: A,B,C**

Explanation:

connect-configs stores connector configurations.

connect-status tracks the status of connectors and tasks (e.g., RUNNING, FAILED).

connect-offsets stores source connector offsets for reading from external systems.

#### NEW QUESTION # 58

Which statements are correct about partitions? (Choose two.)

- A. A partition size is determined after the largest segment on a disk.
- B. A partition in Kafka will be represented by a single segment on a disk.
- C. A partition is comprised of one or more segments on a disk.
- D. All partition segments reside in a single directory on a broker disk.

**Answer: C,D**

#### NEW QUESTION # 59

A Kafka administrator notices that their consumers of Topic X are starting to fall behind. The administrator sees that Topic X has four partitions, and the consumer group has two consumers.

Which change can increase the performance of the Consumer Group?

- A. Decrease the consumer acknowledgment property to increase throughput.
- B. Increase the number of consumers in the consumer group.
- C. Create a new consumer group for Topic X containing two (2) consumers.
- D. Increase the partitions in Topic X.

**Answer: B**

Explanation:

With 4 partitions and only 2 consumers, some consumers are handling multiple partitions, which may cause lag if processing is slow. By increasing the number of consumers in the group (up to 4), Kafka can assign one partition per consumer, improving parallelism and throughput.

#### NEW QUESTION # 60

.....

We all know that Confluent Certified Administrator for Apache Kafka (CCAAK) exam dumps are an important section of the Confluent Certified Administrator for Apache Kafka (CCAAK) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality CCAAK Questions that are drafted by industry experts who have complete knowledge regarding the Confluent Certified Administrator for Apache Kafka (CCAAK) certification exam and can share the same with those who want to clear the CCAAK exam. The best approach to finding Confluent Certified Administrator for Apache Kafka (CCAAK) exam dumps is to check the Prep4King that is offering the Confluent Certified Administrator for Apache Kafka (CCAAK) practice questions.
