

# New 2V0-15.25 Test Review | Exam 2V0-15.25 Assessment

What's more, part of that ActualTorrent 2V0-15.25 dumps now are free: [https://drive.google.com/open?id=1n1aa2BrxPh5WHJzopzX4pQ1P-nF3D\\_JP](https://drive.google.com/open?id=1n1aa2BrxPh5WHJzopzX4pQ1P-nF3D_JP)

Our experts are constantly looking for creative way to immortalize our 2V0-15.25 actual exam in this line. Their masterpieces are instrumental to offer help and improve your performance in the real exam. Being dedicated to these practice materials painstakingly and pooling useful points into our 2V0-15.25 Exam Materials with perfect arrangement and scientific compilation of messages, our 2V0-15.25 practice materials can propel the exam candidates to practice with efficiency.

## VMware 2V0-15.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>IT Architectures, Technologies, Standards: This domain covers fundamental frameworks, tools, and best practices for building scalable, secure, and interoperable enterprise IT systems.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Troubleshoot and Optimize the VMware by Broadcom Solution: This domain focuses on troubleshooting VCF deployment, upgrades, conversions, workload domains, fleet operations (certificates, passwords, identity), licensing, compute resources, storage (vSAN, supplemental storage), networking (VDS, NSX), VCF Operations tools, Identity Broker automation, and HCX workload migrations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>VMware by Broadcom Solution: This section focuses on understanding VMware by Broadcom's virtualization and cloud infrastructure platform for managing modern enterprise workloads.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Install, Configure, Administrate the VMware by Broadcom Solution: This area covers installing, configuring, and managing VMware solutions including VCF Fleet deployment, expansion, and reduction operations.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Plan and Design the VMware by Broadcom Solution: This domain addresses architectural planning and design principles for creating scalable, secure virtual environments aligned with business requirements.</li></ul>

## 100% Pass 2026 VMware 2V0-15.25 Authoritative New Test Review

In order to meet the different demands of the different customers, these experts from our company have designed three different versions of the 2V0-15.25 reference guide. All customers have the right to choose the most suitable version according to their need after buying our study materials. The PDF version of the 2V0-15.25 exam prep has many special functions, including download the demo for free, support the printable format and so on. We can make sure that the PDF version of the 2V0-15.25 Test Questions will be very convenient for all people. Of course, if you choose our study materials, you will have the chance to experience our PDF version.

## VMware Cloud Foundation 9.0 Support Sample Questions (Q41-Q46):

### NEW QUESTION # 41

An administrator is automating the deployment of a new VMware Cloud Foundation (VCF) fleet using VCF Installer. The VCF fleet must include VCF Automation being deployed in a simple deployment model.

The administrator creates a JSON file, but during the installation attempt the VCF Installer returns an error indicating that the JSON validation has failed.

What is the cause of the errors?

- A. A separate distributed switch was defined for vSAN traffic.
- B. VCF components binaries are not downloaded.
- C. Second IP address for VCF Automation is not specified.
- D. NSX Manager size was defined as large.

**Answer: C**

Explanation:

In VCF 9.0, when deploying VCF Automation using the VCF Installer in a Simple Deployment Model, the appliance requires two IP addresses:

\* Primary IP- Management interface

\* Secondary IP- Required for service separation and internal routing for Automation services VMware's JSON schema for VCF Installer enforces this requirement. If the second IP is missing, incorrectly formatted, or placed under the wrong JSON section, the installer validation will fail immediately with a JSON schema error before deployment begins.

This is one of the most common causes of validation failure for VCF Automation deployment.

Option A (component binaries missing) produces a bundle download error, not JSON schema failure.

Option C (NSX Manager size = large) is allowed and does not break JSON validation.

Option D (separate vDS for vSAN) is allowed if defined correctly and also does not cause JSON schema failure.

### NEW QUESTION # 42

An administrator has received reports of high CPU ready times on several Virtual Machines (VMs) running within a VMware Cloud Foundation (VCF) workload domain and has been tasked with collecting detailed metrics for all running Virtual Machines from each ESX host.

Which command line utility will enable the administrator to collect the required metrics?

- A. esxtop
- B. esxcli
- C. vintop
- D. vim-cmd

**Answer: A**

Explanation:

To collect detailed per-VM CPU metrics—especially CPU Ready (%RDY)—the correct command-line utility on an ESXi host is esxtop. This tool provides real-time, low-level performance data for CPU, memory, disk, and network usage, and is the authoritative method for diagnosing CPU contention issues in VMware environments.

When troubleshooting high CPU Ready times, esxtop allows administrators to:

\* View CPU contention at the VM level

\* Inspect co-stop, wait, and scheduling delays

\* Monitor NUMA distribution and pCPU saturation

\* Capture historical performance snapshots using batch mode

The other options do not provide the necessary VM-level CPU scheduling metrics:

\* A. vintop: Only available on vCenter Server Appliance (VCSA), not ESXi; does not show VM CPU ready.

\* B. esxcli: Used for configuration and health checks; not for real-time CPU metrics.

\* C. vim-cmd: Used to manage VMs via vSphere API bindings; not a performance monitoring tool.

### NEW QUESTION # 43

An administrator is adding a vSphere Supervisor using VMware NSX classic to an existing VMware Cloud Foundation (VCF) cluster using Distributed Connectivity. When attempting to enable the vSphere Supervisor for the domain the cluster shows up as

incompatible with the reason:

No valid edge cluster for VDS 50 Ob 4d 9a cb 32 62 4d - 76 78 6b 92 cd 87 c4 5a Why is the cluster showing up as incompatible?

- **A. The WCPReady tag has not been assigned to the NSX Edge Cluster.**
- B. The NSX Edge transport nodes have been deployed as large.
- C. AVI load balancing has not been enabled for the NSX Edge Cluster.
- D. vSphere Supervisor requires Central Connectivity.

**Answer: A**

Explanation:

A Comprehensive and Detailed Explanation: When enabling vSphere Supervisor with NSX Classic (using the traditional NSX-T Data Center networking stack rather than the newer NSX VPC mode), the vSphere Workload Management wizard filters the list of available NSX Edge Clusters to ensure they are explicitly designated for use with Kubernetes workloads.

The "WCPReady" Tag Requirement: The primary mechanism vCenter uses to identify a valid, compatible Edge Cluster for Workload Management is a specific tag on the NSX Edge Cluster object. This tag must be WCPReady (case-sensitive).

Symptoms: If this tag is missing-which often happens if the Edge Cluster was created manually in NSX Manager rather than through the SDDC Manager automation-the validation process will fail to find any usable clusters. This results in the specific error message: "No valid edge cluster for VDS [UUID]", or simply an empty list of compatible clusters in the wizard.

Resolution: The administrator must log in to the NSX Manager, navigate to System > Fabric > Nodes > Edge Clusters, select the target cluster, and manually add the tag WCPReady (often with the scope "Created for", though the tag itself is the critical filter).

Why other options are incorrect:

B: Large Edge nodes are actually a requirement for vSphere Supervisor (Small/Medium are typically unsupported for this role), so deploying them as Large would make the cluster compatible, not incompatible.

C: vSphere Supervisor fully supports Distributed Connectivity (connecting directly to the VDS), so Central Connectivity is not a hard requirement causing this specific error.

D: While AVI (NSX Advanced Load Balancer) is a supported load balancer, the "No valid edge cluster" error occurs during the Edge Cluster discovery phase, preceding the load balancer configuration.

#### NEW QUESTION # 44

In VMware Cloud Foundation (VCF) Automation an administrator is troubleshooting an issue with a newly created Organization. When the Organization administrator attempts to create a Namespace, they receive an error "Failed to list VPC after selecting a region.

The administrator logs into the NSX Manager for the Region and does not see an NSX Project for the Organization. What could cause these symptoms?

- **A. The Provider Administrator hasn't set up the Organization's Networking Configuration for the selected Region.**
- B. The Organization Administrator hasn't created a Project in the selected Region.
- C. The Organization Administrator hasn't created a VPC in the selected Region.
- D. The Provider Administrator hasn't granted the Organization Administrator role to the First User.

**Answer: A**

Explanation:

In VMware Cloud Foundation 9.0 Automation, every Organization requires a properly configured Networking Configuration for each Region in which it operates. This configuration step-performed by the Provider Administrator-creates the NSX Project corresponding to the Organization, enabling Namespace creation, VPC visibility, and workload provisioning.

The error "Failed to list VPC after selecting a region" combined with the absence of an NSX Project in NSX Manager is a direct indicator that the Organization's Networking Configuration was never initialized. VCF Automation automatically creates the NSX Project only when the Provider Admin completes this step.

Option B is invalid because the Organization Administrator cannot create NSX Projects manually; they are system-generated during networking setup.

Option C is incorrect because role assignment affects administrative permissions, not NSX project creation.

Option D is also incorrect-the Organization Admin cannot create a VPC until the NSX Project exists.

#### NEW QUESTION # 45

An administrator wants to expand a VMware vSAN cluster in a workload domain by adding an unassigned host from the vSphere client. However, at the Host Selection screen no hosts are available and the following message displayed:

No unassigned hosts available with storage type VSAN. Commission hosts with physical NICs 0 & 1 to Add Host from UI. How can the administrator commission hosts?

- A. From VCF Operations by navigating to Fleet Management.
- B. From the vSphere client by navigating to Supervisor Management.
- C. From the vSphere client by navigating to the Global Inventory.
- **D. From the SDDC manager by navigating to Workload Domains.**

**Answer: D**

Explanation:

In VMware Cloud Foundation 9.0, host commissioning is performed exclusively through SDDC Manager, not from the vSphere Client. When expanding a vSAN cluster inside a workload domain, all ESXi hosts must first be placed in an Unassigned state and then commissioned in SDDC Manager before they can appear in the "Add Host" wizard of the vSphere Client. The message in the problem - "No unassigned hosts available with storage type VSAN. Commission hosts with physical NICs 0 & 1 to Add Host from UI" - indicates that SDDC Manager has not yet commissioned any suitable hosts with the required NIC layout.

VCF 9.0 documentation states that for workload domain expansion, hosts must be commissioned under:

SDDC Manager # Workload Domains # (Select WLD) # Hosts # Commission Hosts.

This validates hardware, storage type (such as vSAN ESA or OSA), NIC placement, and ensures the host is compatible with the domain's configuration.

Options pointing to vSphere Client (A, D) or VCF Operations (B) do not perform the commissioning workflow. Therefore, the correct and verified answer is C, the only interface where host commissioning is officially supported.

## NEW QUESTION # 46

.....

All contents of 2V0-15.25 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices of our 2V0-15.25 exam materials which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our 2V0-15.25 Quiz guide. And we have free demos of our 2V0-15.25 study braindumps for you to try before purchase.
