Salesforce B2B Commerce for Administrators Accredited Professional Sample Questions (Q72-Q77):

NEW QUESTION # 72
An Administrator needs to set up a variation product for the first time in a new org and prepare the search index. 26m 164 Before creating the product, in which two places does the Administrator need to go to establish a variation attribute structure?

- A. Object Manager
- B. Product Workspace
- C. Commerce Setup
- D. Catalogs

Answer: A,C

Explanation:
Before creating a variation product and preparing the search index, the Administrator needs to establish a variation attribute structure in A. Commerce Setup to configure the overall commerce settings, including attributes, and in D. Object Manager to customize the Product object and its fields, including setting up specific attributes for variations.

NEW QUESTION # 73
An Administrator needs to support a unique use case with an exclusive line of products. Only certain stores designated as "premier" status should contain an exclusive list of products. All of the other products outside of the exclusive product line should be available in all stores.
Is it possible to support this use case of store-specific products in B2B Commerce?

- A. No. The products must be filtered with custom code.
- B. No. The data model does not support this type of configuration.
- C. Yes. There is an exclusive line checkbox on the Product entity which supports this scenario.
- D. Yes. This is supported by the B2B Commerce data model.

Answer: D

Explanation:
Supporting store-specific products, including an exclusive line of products for "premier" status stores, is supported by the B2B Commerce data model (C). This capability allows for the configuration of product availability and visibility based on store status or other criteria, enabling differentiated product offerings across various store types.

NEW QUESTION # 74
Which field type cannot be added as a Searchable field?

- A. Formula
- B. Picklist
- C. Currency
- D. Text Area
- E. Text

Answer: A

Explanation:
The field type that cannot be added as a Searchable field is C. Formula. Formula fields are calculated fields that do not store data themselves but rather display data based on the formula's logic and the values of other fields. Due to their dynamic nature and lack of stored data, they cannot be indexed or made searchable like other static field types.

NEW QUESTION # 75
The storefront contains Products that are in multiple categories.
How can an Administrator choose which Category displays in the breadcrumb?

- A. Set the Category as priority 1
- B. Set the Category as the Primary Category
- C. Set the Category to "Show in Menu"
- D. Set the Category as priority 0

Answer: B

Explanation:
To choose which Category displays in the breadcrumb for Products that are in multiple categories, the Administrator should B. Set the Category as the Primary Category. This designation ensures that the chosen category is used for navigation and displayed in the breadcrumb trail, providing a clear path for users.
