Our company has authoritative experts and experienced team in related industry. To give the customer the best service, all of our RCNI exam dump is designed by experienced experts from various field, so our RCNI Learning materials will help to better absorb the test sites. One of the great advantages of buying our product is that can help you master the core knowledge in the shortest time. At the same time, our RCNI exam dumps discard the most traditional rote memorization methods and impart the key points of the qualifying exam in a way that best suits the user's learning interests, this is the highest level of experience that our most authoritative think tank brings to our RCNI Study Guide users. Believe that there is such a powerful expert help, our users will be able to successfully pass the qualification test to obtain the qualification certificate.

RUCKUS RCNI Exam Syllabus Topics:

Topic	Details
Topic 1	• ICX Solution Implementation: This significant portion of the exam assesses the skills of RUCKUS ICX Network Administrators in implementing ICX solutions. It covers ICX software management, stacking capabilities, PoE configuration, Layer 2 • 3 protocols, and ICX services, IPv4 • IPv6 addressing on switch interfaces, ICX switch management methods, and configuring multicast and security features. Candidates should be able to demonstrate proficiency in configuring stacking for scalable network deployments.
Topic 2	• Foundational Networking Concepts: This section of the exam measures the skills of RUCKUS ICX Network Administrators and covers essential networking concepts. It includes VLAN design and configuration, STP and loop prevention protocols, PoE requirements, basic LAN concepts, Layer 3 routing configurations, and basic QoS concepts. Candidates should be able to demonstrate proficiency in designing VLANs for network segmentation.

Topic 3	• ICX Solution Troubleshooting: RUCKUS ICX networking Engineers are expected to demonstrate troubleshooting skills in this section. It covers basic networking troubleshooting techniques and procedures for performing ICX switch recovery. Candidates should be able to identify and resolve common network issues in ICX environments.
Topic 4	• RUCKUS Products & Solutions: RUCKUS ICX networking Engineers are expected to showcase their knowledge of RUCKUS products and solutions in this section. It focuses primarily on the ICX product line, covering various switch models and their capabilities. Candidates should be familiar with the features, specifications, and use cases of different ICX switches.

The Exam4Labs is a leading and trusted platform that has been assisting the RCNI exam candidates since its beginning. Over this long time period, Exam4Labs has helped countless candidates in their preparation and enabled them to pass the final RCNI Exam easily. The Exam4Labs offers real, valid, and updated RUCKUS Exam Questions.

RUCKUS Certified Networking Implementer Sample Questions (Q35-Q40):

NEW QUESTION # 35

ICX reserves some VLAN IDs for system functions. How many VLAN IDs are reserved?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

In RUCKUS ICX switches, certain VLAN IDs are reserved for system functions and cannot be used for user- defined VLANs. Specifically, the following VLAN IDs are reserved:

- * VLAN 0: Reserved for priority tagging.
- * VLAN 1: Default VLAN for untagged frames.
- * VLAN 4095: Reserved and cannot be used.
- * VLAN 4094: Reserved and cannot be used.
- * VLAN 4093: Reserved and cannot be used.

This totals to 5 reserved VLAN IDs.

These reservations are standard across many networking devices to ensure proper network operations and to avoid conflicts with system-level processes. It's important to note that while VLAN 1 is the default VLAN, it can be reassigned if necessary, but caution should be exercised to avoid disrupting network management and control traffic.

For detailed information on VLAN configuration and reserved VLAN IDs on RUCKUS ICX switches, please refer to the RUCKUS FastIron Layer 2 Switching Configuration Guide:

This guide provides comprehensive information on VLAN management, including details on reserved VLAN IDs and best practices for VLAN configuration on RUCKUS ICX switches.

NEW QUESTION # 36

When a high CPU alert about an ICX switch is triggered, which command will provide more detail on the processes taking up CPU cycles?

- A. show cpu tasks
- B. show cpu histogram
- C. show process
- D. show cpu

Answer: D

NEW QUESTION # 37

In the following output, what is the bridge priority of the root in hex?

- A. 0
- **B. 1**
- C. 9c49
- D. 2

Answer: B

Explanation:

- * Understanding Bridge Priority:
- * The bridge priority in the Spanning Tree Protocol (STP) is represented in hexadecimal format in RUCKUS ICX switches.
- * In the output, the bridge priority is a combination of the priority value (default is 32768 or 0x8000 in hex) and the VLAN ID.
- * Why It Is 8000:
- * Unless explicitly modified, the default bridge priority is 8000 in hexadecimal.
- * Why Other Options Don't Apply:
- * B. 0: This value does not align with the default or modified priority values.
- * C. 9c49: This might represent a different component of the output, such as MAC address.
- * D. 20009: This is an incorrect representation of the bridge priority.

NEW QUESTION # 38

Which switch cannot exceed a maximum of 30W per port?

- A. ICX7150-C12P
- B. ICX7650
- C. ICX7550
- **D. ICX7150-48ZP**

Answer: D

NEW QUESTION # 39

What is the maximum Wattage for a PoE+ interface with PoE overdrive enabled?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D
