## Microsoft Power Platform Solution Architect Sample Questions (Q184-Q189):

**NEW QUESTION # 184**
You need to resolve the issue reported during testing.
What should you do?

- A. Create a Quick View form for the inspection order.

- B. Create a relationship within the Inspection Order table to the originating inspection order.
- C. Create an image data type within the Inspection Order table.

**Answer: B**

Explanation:
Explanation
Need to store the image in the table.
Scenario: The company uses photos of employees to generate employee badges. Photos are uploaded into Microsoft 365 user profiles.

**NEW QUESTION # 185**
You are designing a model-driven app that allows a company to manage sales opportunities.
The company has a complex security model that includes the following requirements:
The vice president of sales must be able to see opportunities for sales managers and sales representatives.
Sales managers must be able to see opportunities for all sales representatives.
Sales representatives must only see opportunities that they own.
You need to recommend security tools for controlling user access.
Which two tools should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Account hierarchy
- B. Security roles
- C. Field security profile
- D. Position hierarchy

**Answer: B,D**

Explanation:
With the position hierarchy security, a user at a higher position has access to the records owned by a lower position user or by the team that a user is a member of, and to the records that are directly shared to the user or the team that a user is a member of.
The hierarchy security model is an extension to the earlier security models that use business units, security roles, sharing, and teams.
It can be used in conjunction with all other existing security models.
Reference:
https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/developer/security-dev/ hierarchical-security-control-access-entities

**NEW QUESTION # 186**
A company plans to use Microsoft Power Platform.
The company wants to enhance the user experience of its apps. The company requires a reusable custom color picker control that can be added to model-driven app forms and canvas app screens.
You need to recommend a solution.
Which solution should you recommend?

- A. Web resources
- B. Client script
- C. Power Apps component framework
- D. Plug-ins

**Answer: C**

**NEW QUESTION # 187**
You need to recommend the appropriate components to meet the inspection requirements.
What should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

☐

Explanation

☐

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

You must prevent users from changing inspection order data once an inspection is marked as final.

Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance.

Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

## NEW QUESTION # 188

You need to recommend methods for assigning security to each group of users.

The customer provides the following requirements:

Customers need the ability to submit a case through an online portal.

Portal must handle 75 concurrent users submitting cases.

Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

☐

**Answer:**

Explanation:

☐

Reference:

https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/3-functional-requirements

https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements

## NEW QUESTION # 189

......
