

Preparation Material with Free Demos and Updates [2026]

P.S. Free 2026 IAPP AIGP dumps are available on Google Drive shared by Easy4Engine: https://drive.google.com/open?id=1MKjwRdA1ISmLiniK2cVdn-B0Nw11wAc_

Do you upset about the difficulty of IAPP practice questions? Do you disappointed at losing exam after long-time preparation? We can help you from these troubles with our Latest AIGP Learning Materials and test answers. You will find valid AIGP real questions and detailed explanations in Easy4Engine, which ensure you clear exam easily.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 2	<ul style="list-style-type: none"> Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
Topic 3	<ul style="list-style-type: none"> Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.

Topic 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

Exam AIGP Simulations - Clear AIGP Exam

As you can see that on our website, we have free demos of the AIGP study materials are freebies for your information. In case you are tentative about their quality, we give these demos form which you could get the brief outline and questions closely related with the AIGP Exam Materials. And it is quite easy to free download the demos of the AIGP training guide, you can just click on the demos and input your email than you can download them in a second.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

The White House Executive Order from November 2023 requires companies that develop dual- use foundation models to provide reports to the federal government about all of the following EXCEPT:

- A. Any current training or development of dual-use foundation models.
- B. The physical and cybersecurity protection measures of their dual-use foundation models.
- C. The results of red-team testing of each dual-use foundation model.
- **D. Any environmental impact study for each dual-use foundation model.**

Answer: D

Explanation:

Under the White House Executive Order on Artificial Intelligence (EO 14110), companies developing dual-use foundation models are required to report specific information to the federal government. These requirements include:

1. Ongoing or planned activities related to training, developing, or producing dual-use foundation models, including physical and cybersecurity protections taken to assure the integrity of the training process against sophisticated threats.
2. Ownership and possession of the model weights of any dual-use foundation models, and the physical and cybersecurity measures taken to protect those model weights.
3. The results of any developed dual-use foundation model's performance in relevant AI red-team testing, including a description of any associated measures the company has taken to meet safety objectives, such as mitigations to improve performance on these red-team tests and strengthen overall model security.
4. Other information pertaining to the safety and reliability of dual-use foundation models, or activities or risks that present concerns to U.S. national security.

Notably, the EO does not mandate companies to conduct or report on environmental impact studies for each dual-use foundation model. Therefore, option C is not a required reporting obligation under the Executive Order.

NEW QUESTION # 34

A UK company has designed a facial recognition model to support border control.

The EU AI Act would apply to the model in all of the following situations EXCEPT if?

- A. The model was released under an open source license.
- B. The model was trained by an EU company.
- C. The model is deployed at an EU border checkpoint.
- **D. The model is deployed at UK border checkpoints.**

Answer: D

Explanation:

The EU AI Act applies extraterritorially, meaning it affects entities outside the EU when their AI systems impact individuals within the EU. However, it does not apply to systems that are developed, sold, or used entirely outside of the EU—such as in the UK, unless they affect the EU market or individuals.

From the AI Governance in Practice Report 2024:

"The act imposes regulatory obligations... depending on their capabilities, reach and computing power, certain GPAI systems are considered to present systemic risk and attract broadly similar obligations to those applicable to high-risk AI systems." (p. 7)

"The EU AI Act is the world's first comprehensive AI regulation... requirements apply to providers, deployers, importers, and distributors of AI systems when such systems are placed on the EU market." (p. 7-8) Thus:

- * A. Open source released does not exclude applicability if deployed in the EU.
- * B. Deployment at an EU border clearly invokes jurisdiction.
- * D. Training by an EU company creates jurisdictional links.
- * C. Deployment only at UK checkpoints, with no EU use or impact, is outside scope.

NEW QUESTION # 35

In the machine learning context, feature engineering is the process of:

- A. Creating learning schema for a model to apply.
- **B. Extracting attributes and variables from raw data.**
- C. Developing guidelines to train and test a model.
- D. Converting raw data into clean data.

Answer: B

Explanation:

Feature engineering involves extracting and transforming relevant attributes or variables from raw data to improve model performance.

NEW QUESTION # 36

After initially deploying a third-party AI model, you learn the developer has released a new version. As deployer of this third-party model, what should you do?

- A. Retrain the model.
- B. Communicate necessary updates to your users.
- C. Seek input from data scientists.
- **D. Audit the model.**

Answer: D

Explanation:

When a new version of a third-party model is released, the deployer must ensure it still meets safety, performance, and compliance requirements - which calls for a formal audit.

From the AI Governance in Practice Report 2025:

"Any updates or changes to AI systems should trigger a re-evaluation to ensure continued compliance and performance." (p. 12)

"Post-market monitoring includes reassessing the impact of updated models or retraining." (p. 35)

NEW QUESTION # 37

All of the following may be permissible uses of an AI system under the EU AI Act EXCEPT?

- **A. To implement social scoring.**
- B. To promote equitable distribution of welfare benefits.
- C. To detect an individual's intent for law enforcement purposes.
- D. To manage border control.

Answer: A

Explanation:

The EU AI Act explicitly prohibits the use of AI systems for social scoring by public authorities, as it can lead to discrimination and

unfair treatment of individuals based on their social behavior or perceived trustworthiness. While AI can be used to promote equitable distribution of welfare benefits, manage border control, and even detect an individual's intent for law enforcement purposes (within strict regulatory and ethical boundaries), implementing social scoring systems is not permissible under the Act due to the significant risks to fundamental rights and freedoms.

NEW QUESTION # 38

.....

The Easy4Engine wants to win the trust of IAPP AIGP exam candidates at any cost. To fulfill this objective the Easy4Engine is offering top-rated and real AIGP exam practice test in three different formats. These AIGP exam question formats are PDF dumps, web-based practice test software, and web-based practice test software. All these three AIGP Exam Question formats contain the real, updated, and error-free AIGP exam practice test.
