[{"order": 867173; email: peter@family.guy; firstName: Peter; lastName: Griffin;

address: 31 Spooner St; city: Quahog; state: RI; country: US;

nameOnCard: "Peter L. Griffin"; card: 4215837137516263; type: visa; code: 387; exp: 12/2023;

In which two ways is this log output improper in a production environment? Choose 2 answers

- A. The log information includes the customer's card number as it appears along with the credit card number (PAN), which violates PCI.
- B. The log information includes the order number and customer's email, which violates PCI.
- C. Information logs should not be used in a production environment
- D. The log information includes the customer's card CV (card security code) and expiration date, which violates PCI.

Answer: A,B

NEW QUESTION # 41

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by "total time" column. The following come as the top Ave items:

Controller Name	Function Name	Hits	Total Time	Average Time	Minimum Time	Maximum Time
Product	Detail	38,880	22,606,640	407	39	2,311
Search	Show	22,460	15,030,360	464	107	1,143
Home	IncludeHeaderMenu	5,284	10,776,564	2,078	2,056	2,200
Product	HitTile	229,760	7,944,480	33	10	245
Product	ShowInCategory	38,880	2,661,280	69	33	100

Which controller should the Architect focus on to further investigate the performance issue?

- A. Product-Detail as it has the highest hits during the load test.
- **B. Home-IncludeHeaderMenu as It has highest average time.**
- C. Search Show as this Is one of the key controllers that the customer uses
- D. Product-Detail as It has the highest total time and highest maximum time.

Answer: B

NEW QUESTION # 42

An Architect has been asked by the Business to integrate a newpayment LINK cartridge. As part of the integration, the Architect has created four new services to access various endpoints in the integration.

How can the Architect move the new services to Production when the integration is ready for launch?

- A. The new services will be moved to production with a Site Import.
- B. The new services will be moved to Production with a Data Replication.
- **C. The new services will be moved to Production with a Code Replication.**
- D. The new services must be manually exported from staging and Imported into Production.

Answer: C

Explanation:

For deploying new services related to a payment LINK cartridge to Production, the correct method is through Code Replication (D). This approach ensures that all new code changes, including the integration services, are consistently applied across different environments. Code replication covers deploying all changes made in code, scripts, and service configurations from a staging or development environment to the production environment. This process ensures that all new functionalities are tested in a controlled environment before being moved to production, reducing the risk of errors affecting the live site.

NEW QUESTION # 43

A Marketing team plans to support the launch of a new product line. In discussion with the Sales and IT teams, the Marketing team proposed introducing a leads-management process, along with a web-to-lead form for the landing page that supports the product launch.

The leads captured using the form are added to the new nurturing journey in Marketing Cloud and subsequently routed to the relevant sales team once they qualify at a certain threshold.

What are two implications that a Solution Architect should consider prior to implementing this solution? Choose 2 answers

- **A. Leads can have detrimental impact on quality of contact records in Sales Cloud**
- **B. Need for additional handling of consent, preferences, and compliance for converted leads in Marketing Cloud**
- C. Engagement history from the lead record will be natively available for contact record in Marketing Cloud
- D. Leads are unique contact records in Marketing Cloud

Answer: A,B
