

Verified H13-511_V5.5 Valid Exam Question - Well-Prepared & Realistic H13-511_V5.5 Materials Free Download for Huawei H13-511_V5.5 Exam

Huawei H13-511_V5.5 Exam Prep Material

**PDF Exam Questions**
Instant access, study anywhere, printable format.

**Interactive Practice Simulator**
Question simulation, focused learning, progress tracking.

**3 Months of Unlimited Access**
Full access for three months, sufficient time to practice.

**Regular Updates**
Content team keeps questions aligned with latest objectives.

**Free Practice Tests**
Experience the quality of questions before purchasing.

**Free Exam Guides**
Study tips, topic explanations, exam day advice.

P.S. Free & New H13-511_V5.5 dumps are available on Google Drive shared by PassTestking: <https://drive.google.com/open?id=1wtTslrmlBIYgLA5-cnnJuNrKovCxi8d>

To improve our products' quality we employ first-tier experts and professional staff and to ensure that all the clients can pass the test we devote a lot of efforts to compile the H13-511_V5.5 learning guide. Even if you unfortunately fail in the test we won't let you suffer the loss of the money and energy and we will return your money back at the first moment. After you pass the H13-511_V5.5 test you will enjoy the benefits the certificate brings to you such as you will be promoted by your boss in a short time and your wage will surpass your colleagues. In short, buying the H13-511_V5.5 exam guide deserves your money and energy spent on them.

Huawei H13-511_V5.5 Exam Overview:

Certification Vendor:	Huawei
Exam Name:	HCIA-Cloud Computing V5.5
Exam Number:	H13-511_V5.5
Available Languages:	English, Chinese
Exam Format:	Single Choice, Multiple Choice, True/False
Exam Duration:	90 minutes
Real Exam Qty:	60
Related Certifications:	HCIP-Cloud Computing HCIE-Cloud Computing
Passing Score:	600/1000
Exam Price:	USD 150
Certificate Validity Period:	3 years
Sample Questions:	Huawei H13-511_V5.5 Sample Questions
Exam Way:	Offline test center / Online proctored exam
Pre Condition:	No prerequisites required; basic IT knowledge recommended
Official Syllabus URL:	https://learning.huawei.com/

Valid Braindumps H13-511_V5.5 Pdf - Examcollection H13-511_V5.5 Free Dumps

Our company always put the quality of the H13-511_V5.5 practice materials on top priority. In the past ten years, we have made many efforts to perfect our H13-511_V5.5 study materials. Our H13-511_V5.5 study questions cannot tolerate any small mistake. All staff has made great dedication to developing the H13-511_V5.5 Exam simulation. Our professional experts are devoting themselves on the compiling and updating the exam materials and our services are ready to guide you 24/7 when you have any question.

Huawei H13-511_V5.5 Exam Syllabus Topics:

Topic	Details
Topic 1	Describe the characteristics of cloud computing: This section explains the essential attributes and defining features of cloud computing such as on-demand self-service, broad network access, and resource pooling. It outlines what distinguishes cloud computing from traditional computing models.
Topic 2	Understand KVM technology: This topic focuses on Kernel-based Virtual Machine (KVM) as a specific virtualization solution for Linux systems. It covers how KVM transforms Linux into a hypervisor to manage virtual machines efficiently.
Topic 3	Describe the history of cloud computing: This section traces the evolution and development of cloud computing from its origins to its current state. It provides historical context for how cloud technology emerged and transformed over time.
Topic 4	Be able to describe what virtualization is: This topic covers the concept of virtualization technology and how it enables multiple virtual instances to run on physical hardware. It explains the foundational role virtualization plays in creating isolated computing environments.
Topic 5	List a few use cases of cloud computing: This topic presents practical applications and scenarios where cloud computing is implemented across different industries. It demonstrates real-world examples of how organizations utilize cloud services to solve business problems.

Topic 6	Describe what cloud computing is: This topic covers the fundamental definition and concept of cloud computing technology. It explains how cloud computing enables on-demand access to shared computing resources over the internet.
Topic 7	Be able to design and deploy Huawei's FusionCompute virtualization solution and FusionAccess desktop solution: This section covers the practical skills needed to architect and implement Huawei's enterprise virtualization platform FusionCompute and their desktop virtualization product FusionAccess. It includes planning, configuration, and deployment procedures for these Huawei-specific solutions.

Huawei HCIA-Cloud Computing V5.5 Sample Questions (Q69-Q74):

NEW QUESTION # 69

CS is a standardized protocol based on the () protocol and the SCSI instruction set, and is widely used in many storage networks that use the () architecture.

- A. FC, IP SAN
- B. FC, FC SAN
- C. TCP/IP SAN
- D. TCP/P FC SAN

Answer: C

NEW QUESTION # 70

NAS type storage includes CIFS and NFS file systems. Which of the following descriptions about CIFS and NFS are correct? (Multiple choice)

- A. CIFS preserves file format characteristics
- B. NFS requires no additional software
- C. CIFS is based on the network and requires high reliability
- D. CIFS cannot perform error recovery

Answer: C,D

NEW QUESTION # 71

Enterprises can use virtualization technology to run multiple virtual machines on one physical server, and at the same time, they can migrate virtual machines between different servers without customers' awareness, which increases the availability and flexibility of enterprise business.

- A. True
- B. False

Answer: A

NEW QUESTION # 72

Which of the following statements is false about the development of cloud computing architecture?

- A. It has evolved from unstructured or semi-structured data to structured data.
- B. It has evolved from small-scale resource virtualization and integration to large-scale resource pool construction.
- C. It has evolved from non-critical IT applications to critical enterprise applications.
- D. In terms of cloud platforms and cloud management software, it has evolved from closed-source and closed architecture to open-source and open architecture.

Answer: A

Explanation:

According to the HCIA-Cloud Computing curriculum, the evolution of cloud computing architecture reflects changes in technology openness, business importance, resource scale, and data characteristics.

Option A is correct because early cloud platforms were often proprietary and closed, while modern cloud computing architectures increasingly adopt open-source technologies (such as OpenStack and Kubernetes) and open architectures to improve interoperability and innovation.

Option B is also correct. Cloud computing initially hosted non-critical workloads such as testing, development, and backup systems. As reliability, security, and availability improved, cloud platforms became capable of supporting mission-critical enterprise applications, including ERP, financial systems, and core business services.

Option D correctly describes the evolution of cloud architecture. Early virtualization focused on small-scale resource integration, while modern cloud computing emphasizes large-scale resource pools, enabling centralized management, elastic scheduling, and efficient utilization of massive compute, storage, and network resources.

Option C is false. The evolution of cloud computing data has moved from structured data to semi-structured and unstructured data, not the other way around. With the rise of big data, IoT, social media, logs, images, and videos, cloud platforms are increasingly designed to process massive volumes of unstructured and semi-structured data, which is a key trend emphasized in HCIA learning materials.

NEW QUESTION # 73

FusionCompute consists of two parts: CNA and VRM. Which of the following are the functions of CNA? (Multiple choice)

- A. Manage block storage resources in the cluster
- B. Manage virtual machines on compute nodes
- C. Provide virtual computing capabilities
- D. Manage the computing and storage network resource ports on the computing nodes to manage the dynamic adjustment of resources in the cluster

Answer: B,C,D

NEW QUESTION # 74
