ATLASSIAN Jira Administration for Data Center Sample Questions (Q37-Q42):

NEW QUESTION # 37

Your project has issue-level security configured with two security levels. However, Tamara can only select one of the levels. Identify a possible reason why.

- A. A workflow property is limiting the available options.
- B. She is not in a group or project role.
- C. She does not have the Edit Issues permission.
- D. The other level is configured for different issue types.
- E. She does not have the Set Issue Security permission.

Answer: E

NEW QUESTION # 38

A public relations firm is using Jira to track projects by client engagement. Each new engagement with a client is tracked in a new project. Users are complaining that it is hard to navigate and search hundreds of projects.

View the Exhibit, which shows a sample of their projects on the View All Projects page.

Identify three project settings that will immediately improve the viewing of projects on this page and the search results in Issue Navigator. (Choose three.)

- A. Create project categories by client.
- B. Set the project lead to the appropriate Project Administrator.
- C. Add client logos as project avatars.
- D. Add project tags.
- E. Add project descriptions.
- F. Add URLs for search engine optimization.

Answer: D,E,F

NEW QUESTION # 39

Managers want to ensure that every issue in Jira always has an assignee.

Which change will definitely meet this requirement?

- A. Set the global option "Allow unassigned issues" to OFF.
- B. Set Default Assignee to Project Lead in every project.
- C. Make the assignee required on workflow transition screens.
- D. Update post functions to set the assignee appropriately at each workflow transition.
- E. Make the assignee required through field configurations.
- F. Use components for automatic assignment in every project.

Answer: D

NEW QUESTION # 40

The board filter of a kanban board shows issues from projects ALFA and MFGA.

Both projects share the same permission scheme.

Some users can see the cards but cannot move issues between columns or move issues from one project to the other.

Identify the configuration that causes this problem.

- A. board permissions
- B. project permissions
- C. global permissions
- D. security levels
- E. filter permissions

Answer: B

NEW QUESTION # 41

Your administration project is configured as follows:

- * there are three issue types that all share a single workflow
- * all project users are members of the Project Users project role
- * all members of the Administrators project role have the Set Issue Security permission
- * project administrators are the only users who can create issues

You are tasked with replacing the Project Users project role with three distinct team project roles, each solely responsible for one of the issue types.

Which additional requirement can be met by individual work flows per issue type?

- A. Each issue type needs a dedicated set of individual project components.
- B. Only members of the dedicated teams should be able to view and work on the issues they are responsible for.
- C. The system field Component/s needs to be required when creating two out of the three existing issue types.
- D. Individual notifications should be sent out depending on the selected issue type.
- E. The reporter and current assignee of each issue should always have access to view it.

Answer: E

NEW QUESTION # 42
