Vielleicht können Sie auch die relevanten EXIN CITM Schulungsunterlagen in anderen Büchern oder auf anderen Websites finden. Aber wenn Sie die Produkte von ExamFragen mit ihnen vergleichen, würden Sie herausfinden, dass unsere Produkte mehr Wissensgebiete umfassen. Sie können auch im Internet teilweise die Fragen und Antworten zur EXIN CITM Zertifizierungsprüfung kostenlos herunterladen, so dass Sie die Qualität unserer Produkte testen können. Die Gründe, dass ExamFragen exklusiv umfassende Materialien von guter Qualität bieten können, liegt darin, dass wir ein exzellentes Expertenteam hat. Sie bearbeiten die neuesten Fragen und Antworten zur EXIN CITM Zertifizierungsprüfung nach ihren IT-Kenntnissen und Erfahrungen. Deshalb sind die Fragen und Antworten zur EXIN CITM Zertifizierungsprüfung von ExamFragen bei den Kandidaten ganz beliebt.

Wir ExamFragen bieten die besten Service an immer vom Standpunkt der Kunden aus. 24/7 online Kundendienst, kostenfreie Demo der EXIN CITM, vielfältige Versionen, einjährige kostenlose Aktualisierung der EXIN CITM Prüfungssoftware sowie die volle Rückerstattung beim Durchfall usw. Das alles ist der Grund dafür, dass wir ExamFragen zuverlässig ist. Wenn Sie die EXIN CITM Prüfung mit Hilfe unserer Produkte bestehen, hoffen wir Ihnen, unsere gemeinsame Anstrengung nicht zu vergessen!

CITM PDF Testsoftware, CITM Trainingsunterlagen

Seit langem bieten wir ExamFragen vielfältige neueste Prüfungsunterlagen zur EXIN CITM Zertifizierungsprüfung. Zum Beispiel sind EXIN CITM Dumps von ExamFragen laut der neuesten IT-Zertifizierungsprüfung geschaffen. Wir können Ihnen die neusten Informationen über die EXIN CITM Prüfungen anbieten. Die Unterlagen beinhalten die veränderten Informationen und die neue Prüfungsfragensformen. So wenn Sie IT-Zertifizierungsprüfung ablegen wollen, sollen Sie am besten die Unterlagen von ExamFragen. Damit können Sie sich besser auf die EXIN CITM Prüfungen vorbereiten.

EXIN CITM Prüfungsplan:

Thema	Einzelheiten
Thema 1	IT Organization: This domain targets an IT Operations Manager and focuses on the design and management of IT organizational structures. It includes defining roles and responsibilities, establishing governance frameworks, managing resources effectively, and fostering collaboration to support IT service delivery and business needs.
Thema 2	IT Strategy: This section of the exam measures the skills of an IT Strategy Manager and covers the development and alignment of IT strategy with business objectives. It emphasizes creating strategic plans to support organizational goals, understanding emerging technologies, and ensuring that IT investments contribute to competitive advantage and operational efficiency.

Thema 3	• Vendor Selection • Management: This section measures the expertise of a Vendor Manager and covers the process of selecting and managing third-party providers. It addresses evaluating vendor capabilities, negotiating contracts, monitoring performance, and maintaining productive relationships to ensure service quality and value.
Thema 4	• Project Management: This domain is aimed at an IT Project Manager and encompasses planning, executing, and controlling IT projects. It includes managing scope, time, cost, quality, and risks, applying project methodologies, engaging stakeholders, and delivering projects that meet business requirements.
Thema 5	• Information Security Management: This section targets an Information Security Manager and focuses on protecting information assets from threats. It covers policy development, security controls implementation, incident response, data protection, and compliance with legal and regulatory requirements to maintain confidentiality, integrity, and availability.
Thema 6	• Service Management: This domain targets a Service Delivery Manager and focuses on managing IT services to ensure consistent and efficient delivery. It includes establishing service level agreements (SLAs), incident and problem management, continuous service improvement, and aligning IT services with business demands.
Thema 7	• Business Continuity Management: This section measures the skills of a Business Continuity Manager and covers planning and implementing strategies to ensure IT availability and resilience during disruptions. It includes risk assessment, disaster recovery planning, backup procedures, and testing to minimize business impact.

EXIN EPI Certified Information Technology Manager CITM Prüfungsfragen mit Lösungen (Q10-Q15):

10. Frage

The IT service catalog is being reviewed. Which of the below is not considered a criterion for review?

- A. Are any of the existing services up for retiring within the foreseeable future?
- **B. Are there any changes in the IT service provider organization?**
- C. Are the service offerings still relevant and appropriate?
- D. Are there any new laws, codes, and/or regulations which might impact the current service offerings?

Antwort: B

Begründung:

Reviewing an IT service catalog, as per ITIL service asset and configuration management, focuses on ensuring services align with business needs and compliance requirements. Key criteria include:

- * Retiring services (A): Assessing whether services are outdated or no longer needed is critical.
- * New laws, codes, or regulations (B): Compliance with legal or regulatory changes is essential to avoid penalties.
- * Service relevance and appropriateness (D): Ensures services meet current business objectives and user needs.

Changes in the IT service provider organization (C), such as internal restructuring or staffing changes, are not typically a direct criterion for service catalog review, as the catalog focuses on services offered, not the provider's internal operations.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's service catalog management, detailing review criteria. Check sections on service portfolio or catalog management.

11. Frage

Little to no budget is available for hiring new staff for the IT service desk. What is the ideal method of sourcing knowing that little time is available?

- A. Internal IT staff based on a SWOT analysis
- B. Recruitment agency
- **C. Internet job board**
- D. Word of mouth

Antwort: C

Begründung:

Given the constraints of little to no budget and limited time, internet job boards are the ideal sourcing method. They are cost-effective (often free or low-cost), allow quick posting of job openings, and reach a wide pool of candidates, enabling rapid hiring.

Word of mouth (A) is informal and may not yield qualified candidates quickly. Internal IT staff based on SWOT analysis (B) is not a standard recruitment method and takes time to analyze. Recruitment agencies (D) are expensive and slower due to their processes, making them unsuitable for low-budget, urgent hiring.

Reference: EPI CITM study guide, under IT Organization, likely discusses recruitment strategies for IT staff, emphasizing cost-effective methods like job boards. Check sections on human resource management or staffing.

12. Frage

One particular incident repeatedly occurs every first day of the working week. As part of problem management, it is decided to gather a group of technical specialists to conduct problem analysis. Which technique is recommended?

- A. Fault isolation
- B. Technical observation post
- C. Kepner-Tregoe
- **D. 5-Whys**

Antwort: D

Begründung:

For a recurring incident, problem management in ITIL aims to identify the root cause to prevent future occurrences. The 5-Whys technique (C) is recommended as it involves repeatedly asking "why" to drill down to the root cause of the issue. This simple, effective method is suitable for a group of technical specialists analyzing a recurring problem, such as an incident occurring every Monday, which may stem from a specific process, configuration, or system issue.

* Kepner-Tregoe (A): A structured decision-making and problem-solving method, more complex and less focused on root cause analysis alone.

* Technical observation post (B): Not a standard problem management technique; likely a distractor.

* Fault isolation (D): Focuses on isolating faulty components, more applicable to hardware issues than recurring process-related incidents.

The 5-Whys technique is widely used in ITIL problem management for its simplicity and effectiveness in collaborative root cause analysis.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's problem management techniques, including 5-Whys. Check sections on problem analysis or root cause analysis.

13. Frage

One of the company's assets is valued at \$200,000.00. Based on historical data, the exposure factor is 25%, and the Annual Loss Expectancy (ALE) is calculated at \$100,000.00. What is the Annualized Rate of Occurrence (ARO)?

- A. 0.4
- B. 0
- **C. 1**

Antwort: C

Begründung:

In risk management, the Annual Loss Expectancy (ALE) is calculated as:

$ALE = \text{Single Loss Expectancy (SLE)} \times \text{Annualized Rate of Occurrence (ARO)}$, where $SLE = \text{Asset Value} \times \text{Exposure Factor (EF)}$.

Given:

* Asset Value = \$200,000

* Exposure Factor (EF) = 25% = 0.25

* ALE = \$100,000

Calculate SLE:

$SLE = \text{Asset Value} \times EF = \$200,000 \times 0.25 = \$50,000$

Calculate ARO:

$ALE = SLE \times ARO$

$$\$100,000 = \$50,000 \times \text{ARO}$$

$$\text{ARO} = \$100,000 \div \$50,000 = 2$$

Thus, the Annualized Rate of Occurrence (ARO) is 2(C), meaning the incident is expected to occur twice per year.

* 0.4 (A): Incorrect; implies a lower frequency (0.4 times per year).

* 1 (B): Incorrect; would yield an ALE of \$50,000, not \$100,000.

Reference: EPI CITM study guide, under Risk Management, likely covers quantitative risk analysis, including ALE, SLE, and ARO calculations. Check sections on risk assessment or quantitative analysis.

14. Frage

Business is changing fast, resulting in the need to formally appoint a new staff member responsible for guiding the process in a controlled manner. Which role does apply?

- A. Service Level Manager
- B. Risk Manager
- **C. Change Manager**
- D. Business Relationship Manager

Antwort: C

Begründung:

In a fast-changing business environment, a Change Manager(D) is responsible for guiding the change process in a controlled manner. According to ITIL, the Change Manager oversees the change management process, ensuring that changes to IT services or infrastructure are assessed, approved, and implemented with minimal disruption to business operations. This role is critical when rapid business changes require structured control to maintain stability and alignment with organizational goals.

* Risk Manager (A): Focuses on identifying and mitigating risks, not directly managing change processes.

* Service Level Manager (B): Ensures service levels meet agreed standards, focusing on service delivery rather than change control.

* Business Relationship Manager (C): Manages relationships with business stakeholders to align IT services with needs, not specifically change processes.

The Change Manager's role, as defined in ITIL's change management framework, is essential for controlling the pace and impact of changes in a dynamic environment.

Reference: EPI CITM study guide, under Service Management, likely references ITIL's change management processes, detailing the Change Manager's responsibilities. Check sections on ITIL change management or service transition.

15. Frage

.....

EXIN CITM ist eine der wichtigsten Zertifizierungsprüfungen. Im ExamFragen bearbeiten die IT-Experten durch ihre langjährige Erfahrungen und professionellen IT-Know-how Lernmaterialien, um den Kandidaten zu helfen, die CITM Zertifizierung erfolgreich zu bestehen. Mit den Lernmaterialien von ExamFragen können Sie 100% die EXIN CITM Prüfung bestehen. Außerdem bieten wir Ihnen auch einen einjährigen kostenlosen Update-Service.
