P.S. Free 2025 CompTIA CV0-004 dumps are available on Google Drive shared by Pass4training: https://drive.google.com/open?id=1mRw97KyzMNHS_mMIK75BgeEjM8DIk0Lz

The CV0-004 exam requires a lot of preparation, hard work, and practice to be successful. To pass the CompTIA Cloud+ (2025) (CV0-004) test, you need to get updated CompTIA CV0-004 dumps. These CV0-004 questions are necessary to study for the test and pass it on the first try. Updated CV0-004 Practice Questions are essential prepare successfully for the CompTIA Cloud+ (2025) certification exam. But gaining access to updated CV0-004 questions is challenging for the candidates.

We all know that CompTIA Cloud+ (2025) (CV0-004) exam dumps are an important section of the CompTIA Cloud+ (2025) (CV0-004) exam that is purely based on your skills, expertise, and knowledge. So, we must find quality CV0-004 Questions drafted by industry experts who have complete knowledge regarding the CompTIA Cloud+ (2025) (CV0-004) certification exam and can share the same with those who want to clear the CV0-004 exam. The best approach to finding CompTIA Cloud+ (2025) (CV0-004) exam dumps is to check the Pass4training that is offering the CompTIA Cloud+ (2025) (CV0-004) practice questions.

Exam CV0-004 Dump | Real CV0-004 Dumps Free

As is known to us, our company is professional brand established for compiling the CV0-004 study materials for all candidates. The

CV0-004 study materials from our company are designed by a lot of experts and professors of our company in the field. We can promise that the CV0-004 Study Materials of our company have the absolute authority in the study materials market. We believe that the study materials designed by our company will be the most suitable choice for you.

CompTIA Cloud+ (2025) Sample Questions (Q114-Q119):

NEW QUESTION # 114

A manager wants information about which users signed in to a certain VM during the past month. Which of the following can the cloud administrator use to obtain this information?

- A. Alerting
- **B. Collection**
- C. Aggregation
- D. Retention

Answer: B

Explanation:

To obtain information about which users signed in to a certain VM during the past month, a cloud administrator can use log collection. Log collection involves gathering and storing logs from various sources, including VMs, to provide historical data on system access and activity, which can then be analyzed to identify user login instances.

Reference: The CompTIA Cloud+ certification emphasizes the importance of monitoring and visibility in cloud environments, which includes log collection and analysis as key components of operational management and security monitoring.

NEW QUESTION # 115

A cloud solutions architect is designing a VM-based solution that requires reducing the cost as much as possible. Which of the following solutions will best satisfy this requirement?

- **A. Creating Spot VMs in one availability zone**
- B. Spreading the VMs across different regions
- C. Using provisioned IOPS storage
- D. Using ephemeral storage on replicated VMs

Answer: A

Explanation:

Using Spot VMs is a cost-effective solution as these are available at significantly reduced prices compared to standard instances. Spot VMs are ideal for workloads that can tolerate interruptions and are a way to take advantage of unused cloud capacity. The concept of Spot VMs and their cost benefits are included in the financial aspects of managing cloud resources, as per the CompTIA Cloud+ certification guidelines.

NEW QUESTION # 116

A company's main web application is no longer accessible via the internet. The cloud administrator investigates and discovers the application is accessible locally and only via an IP address. Which of the following was misconfigured?

- A. DHCP
- **B. DNS**
- C. NAT
- D. IP

Answer: B

Explanation:

When a web application is accessible locally via an IP address but not via the internet, the issue likely lies with the Domain Name System (DNS). DNS is responsible for translating domain names into IP addresses. A misconfiguration in DNS records or failure in DNS resolution can prevent users from accessing the application through its domain name, even though the application itself is running and accessible via its direct IP address.

In the CompTIA Cloud+ curriculum, understanding cloud concepts and networking fundamentals, including DNS, is crucial for troubleshooting and ensuring applications are accessible and perform optimally in cloud environments.

NEW QUESTION # 117

A software engineer is integrating an application to the cloud that is web socket based. Which of the following applications is the engineer most likely deploying?

- A. Chat
- B. File transfer
- C. Image-sharing
- D. Data visualization

Answer: A

Explanation:

A chat application is most likely to be deployed when integrating a web socket-based application to the cloud.

Web sockets provide full-duplex communication channels over a single, long-lived connection, which is ideal for real-time applications like chat services that require persistent connections between the client and server for instant data exchange.

CompTIA Cloud+ materials cover cloud networking concepts, emphasizing the importance of choosing the right technologies, like web sockets, for specific application requirements to ensure efficient and responsive cloud-based services.

NEW QUESTION # 118

A cloud engineer wants to implement a disaster recovery strategy that:

- . Is cost-effective.
- . Reduces the amount of data loss in case of a disaster.
- . Enables recovery with the least amount of downtime.

Which of the following disaster recovery strategies best describes what the cloud engineer wants to achieve?

- A. Hot site
- B. Warm site
- C. Off site
- D. Cold site

Answer: A

Explanation:

A hot site is a disaster recovery strategy that is cost-effective, minimizes data loss, and allows for the fastest recovery time in case of a disaster. It is an exact replica of the original site of the organization, with full computer systems as well as near-complete backups of user data. Hot sites are operational 24/7 and can take over functionality from the primary site immediately or with minimal delay.

NEW QUESTION # 119

.....

Getting certified is a surefire way to advance your career in the IT industry. Nowadays, CompTIA CV0-004 certification has been one of the hottest exams which many IT candidates chased after. While how to pass the CV0-004 exam test in an efficient way is another question for all of you. I think our Pass4training CV0-004 will do some help. The high hit rate can ensure you 100% pass. The regular updates of the CV0-004 study material can keep you one step ahead in the real exam. The comprehensive questions with the accurate answers will help you have a good knowledge of the actual test and assist you pass with ease.
