Salesforce Certified Sharing and Visibility Architect Training Material - Sharing-and-Visibility-Architect Updated Torrent & Salesforce Certified Sharing and Visibility Architect Reliable Practice

Salesforce Sharing-and-Visibility-Architect practice exam support team cooperates with users to tie up any issues with the correct equipment. If Salesforce Sharing-and-Visibility-Architect certification exam material changes, TrainingQuiz also issues updates free of charge for 1 year following the purchase of our Sharing-and-Visibility-Architect Exam Questions.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q76-Q81):

NEW QUESTION # 76
Universal Containers (UC) delivers training in 500 different regions. The UC operations users team manages course setup, scheduling, and trainer setup. The team members work at a regional level and report to an operations manager. The operations manager requested access to edit ALL scheduled courses owned by the operation users team.
How should this be achieved?

- A. The operations manager will get access to the scheduled courses by creating a public group, and add the operations manager and the operations users team to the public group.
- B. The operations manager will get access to the scheduled courses by creating an ownership-based sharing rule and share the scheduled courses with the operations manager.

- C. The operations manager will get access to the scheduled courses owned by the operations users team defined in the Role Hierarchy.

Answer: C

Explanation:
In Salesforce, the Role Hierarchy grants record access to users higher in the hierarchy. If the operations users are below the operations manager in the Role Hierarchy and the object's organization-wide default (OWD) is not "Private," the manager will inherit access to records owned by their subordinates. This approach is automatic and does not require additional sharing rules or groups.
* Option A: Ownership-based sharing rules are unnecessary if the Role Hierarchy provides the required access.
* Option C: Using a Public Group is an unnecessary workaround for this scenario when Role Hierarchy fulfills the requirement.

* Role Hierarchy Overview

NEW QUESTION # 77
Universal Containers uses the standard Case object to track various support requests sent to servicing agents. Currently, the Case object has more than 400 fields. Eight different types of case processes have been established, each with a unique combination of statuses. The Director of Customer Service wants to ensure that servicing agents see only the required information specific to the case type they are addressing.
Which option is recommended to implement this requirement?

- A. Use Dynamic Forms with different field sections representing the relevant fields per case type, and control visibility of sections by Case Record Type value.
- B. Use different Page Layouts per case type, each representing the relevant fields per case type.
- C. Use a custom LWC to override the View action of the Case object, and a Custom Metadata Type to define the relevant fields per case type.

Answer: A

NEW QUESTION # 78
Universal Containers has Public Read Only sharing settings on the Opportunity object. What Opportunity access options can the user see while adding account team members to the Account?

- A. Read Only
- B. Private and Read Only
- C. Private
- D. Read Only and Read/Write

Answer: D

NEW QUESTION # 79
Which two are potential vulnerabilities in the following code snippet? <apex:page> <apex:form> <apex:outputText value="Enter Name"/> <apex:inputText value="{!name}" /> <apex:commandButton value="Query" action="{!query}" /> </apex:form> </apex:page> public class SOQLController { public String name { get { return name;} set {name=value;} } public PageReference query() { String qryString='SELECT Id FROM Contact WHERE '+ '(IsDeleted = false and Name like \'%' + name + '%\'}'; queryResult = Database.query(qryString); returnr null; } } Choose 2 answers

- A. SOQL Injection
- B. Data Access Control
- C. FLS check
- D. Arbitrary Redirects

Answer: A,B

NEW QUESTION # 80
At Universal Containers, there's a team of auditors distributed throughout the organization that all need access to high-value

opportunities.

With a Private sharing model, which option should an architect recommend when designing a solution for this requirement?

- A. Create a criteria-based sharing rule to grant a public group access to high-value opportunities.
- B. Add the auditors to the default Opportunity Team.
- C. Put the auditors at the highest level of the Role Hierarchy.

Answer: A

NEW QUESTION # 81

......
