NSE7_CDS_AR-7.6 Actual Dumps - VCE NSE7_CDS_AR-7.6 Dumps

Take advantage of this golden opportunity, and download our Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) updated exam questions to grab the most prestigious credential in one go. PrepAwayTest has formulated the Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) exam dumps in these three user-friendly formats: Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) Web-Based Practice Test, Desktop Practice Exam Software, and NSE7_CDS_AR-7.6 questions PDF file. You will find the specifications of these formats below to understand them properly.

Fortinet NSE 7 - Public Cloud Security 7.6 Architect Sample Questions (Q46-

Q51):

NEW QUESTION # 46
You are troubleshooting a FortiGate active-passive SDN connector solution in Microsoft Azure.
Which two mandatory SDN connector settings are required for a successful deployment?
(Choose two.)

- A. Active FortiGate serial number
- B. Directory ID
- C. FortiGate license file
- D. Client secret

Answer: B,D

Explanation:
For an Azure SDN connector to work with FortiGate in an active-passive setup, you must configure:
* Client secret (used for authentication with Azure AD).
* Directory ID (the Azure tenant identifier).

NEW QUESTION # 47
Refer to the exhibit. You deployed an HA active-active load balance sandwich with two FortiGate VMs in Microsoft Azure. After the deployment, you prefer to use FGSP to synchronize sessions and allow asymmetric return traffic. In the environment, FortiGate port 1 and port 2 are facing external and internal load balancers respectively.
What IP address must you use in the peering configuration?

HA configuration FÜRTINET.

```
config system ha
    set session-pickup enable
    set session-pickup-connectionless enable
    set session-pickup-nat enable
    set session-pickup-expectation enable
    set override disable
end

config system standalone-cluster
    edit 0
        set peerip 10.0.1.x
        set syncvd "root"
    next
end
```

- A. The public load balancer port 2 IP address.
- B. The internal load balancer port 1 IP address.
- C. The opposite FortiGate port 1 IP address.
- D. The opposite FortiGate port 2 IP address.

Answer: D

Explanation:
In an FGSP (FortiGate Session Life Support Protocol) deployment with asymmetric traffic in Azure, the peerip must be set to the opposite FortiGate's internal interface (port2) IP address.

This ensures session synchronization between FortiGates through the internal network (behind the internal load balancer), which is required for proper failover handling.

NEW QUESTION # 48
Refer to the exhibit. An experienced AWS administrator is creating a new Virtual Private Cloud (VPC) flow log with the settings shown in the exhibit.
What is the purpose of this configuration?

- A. To retain logs for a long term
- B. To monitor logs in real time
- C. To troubleshoot a log flow issue
- D. To maximize the number of logs saved

Answer: A

Explanation:
In the exhibit, the destination is set to Amazon S3, which is typically used for long-term storage and retention of VPC flow logs. CloudWatch or Data Firehose would be chosen for real-time monitoring or analysis, but S3 ensures the logs are retained cost-effectively for long durations.

NEW QUESTION # 49

Refer to the exhibit. An experienced AWS administrator is creating a new virtual public cloud (VPC) flow log with the settings shown in the exhibit. What is the purpose of this configuration?

- A. To monitor the logs in real time
- B. To troubleshoot a log flow issue
- C. To maximize the number of logs saved
- D. To store the logs for further analysis

Answer: D

NEW QUESTION # 50

Refer to the exhibit. You attempted to access the Linux1 EC2 instance directly from the internet using its public IP address in AWS. However, your connection is not successful.

Given the network topology, what can be the issue?

Network Topology
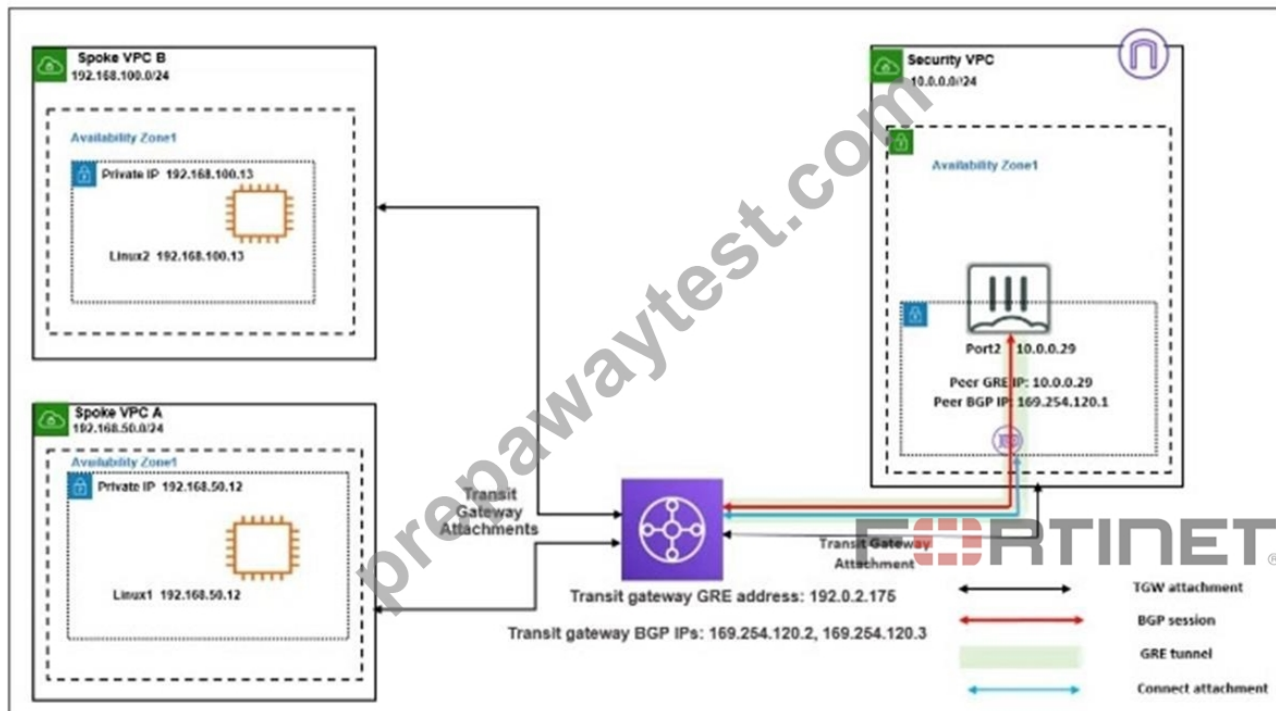

- A. The Transit Gateway BGP IP address is incorrect.
- B. There is no Elastic IP address attached to FortiGate in the Security VPC.
- C. There is no connection between VPC A and VPC B.
- D. There is no Internet Gateway attached to the Spoke VPC A.

Answer: D

Explanation:
The instance is in Spoke VPC A, which (in this TGW Connect design) has no Internet Gateway attached. Without an IGW and corresponding routes, a public IP on the instance is not reachable from the internet.

NEW QUESTION # 51
......

To make preparation easier for you, PrepAwayTest has created an Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) PDF format. This format follows the current content of the Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) real certification exam. The Fortinet NSE 7 - Public Cloud Security 7.6 Architect (NSE7_CDS_AR-7.6) dumps PDF is suitable for all smart devices making it portable. As a result, there are no place and time limits on your ability to go through Fortinet NSE7_CDS_AR-7.6 real exam questions pdf.
