It is very necessary for a lot of people to attach high importance to the UiPath-TAEPv1 exam. It is also known to us that passing the exam is not an easy thing for many people, so a good study method is very important for a lot of people, in addition, a suitable study tool is equally important, because the good and suitable UiPath-TAEPv1 reference guide can help people pass the exam in a relaxed state. We are glad to introduce the UiPath-TAEPv1 certification study guide materials from our company to you. We believe our UiPath-TAEPv1 study materials will be very useful and helpful for you to pass the UiPath-TAEPv1 exam.

UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	- CI - CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI - CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.

Topic 2	• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 3	• UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 4	• UiPath Test Suite – Orchestrator: This section of the exam measures the skills of Test Automation Engineers and covers how to manage test sets in UiPath Orchestrator. It includes creating, executing, scheduling, and deleting test sets, using test data queues, and analyzing results from the Test Execution page. It also discusses re-executing tests and linking test sets for better orchestration of test activities.
Topic 5	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:

Prepare and Sit in Your UiPath-TAEPv1 Exam with no Fear - UiPath-TAEPv1 Training For Exam

We even guarantee our customers that they will pass UiPath UiPath-TAEPv1 Exam easily with our provided study material and if they failed to do it despite all their efforts they can claim a full refund of their money (terms and conditions apply). The third format is the desktop software format which can be accessed after installing the software on your Windows computer or laptop. The UiPath Test Automation Engineer Professional v1.0 has three formats so that the students don't face any serious problems and prepare themselves with fully focused minds.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q60-Q65):

NEW QUESTION # 60
What factors influence the calculation of coverage in the Descriptor Coverage feature in UiPath?

- A. The total number of selectors available in the Object Repository.
- B. The number of selectors that have been manually verified.
- C. The number of times a selector has been successfully executed.
- D. The total number of selectors in a test case execution.

Answer: C

NEW QUESTION # 61
Which are the sub-tasks available under test task in UiPath CLI?

- A. Convert: converts test results written in JSON or CSV to another format.
  Run: tests a given package, or runs an existing Test Set on Orchestrator.

- B. Convert: converts test results written in JSON to another format.
  Run: tests a given package, or runs an existing Test Set on Orchestrator.
- C. Convert: converts test results written as CSV to another format.
  Run: tests a given package, or runs an existing Test Set on Orchestrator.
- D. Convert: converts test results written in JSON to another format.
  Test: tests a given package.

Answer: A

Explanation:
Run: runs an existing Test Set on Orchestrator.
Explanation:
In the UiPath CLI, the test task includes the following sub-tasks:
These enable integration of test execution and reporting into CI/CD pipelines.

NEW QUESTION # 62
By default, how are test executions sorted in Test Manager?

- A. Passed executions are placed at the top.
- B. Based on the date on which the execution was finished.
- C. Running and pending executions are placed at the bottom.
- D. Manual executions are placed at the top.

Answer: B

Explanation:
By default, test executions in Test Manager are sorted based on the date on which the execution was finished, allowing users to see the most recent test results first for efficient tracking and analysis.

NEW QUESTION # 63
What is Descriptor Coverage panel used for in UiPath Studio?

- A. The Descriptor Coverage panel is used to view Ul elements that have been covered during execution and to analyze selector coverage or debug workflows with failed coverage.
- B. The Descriptor Coverage panel is only used when there are failed selectors, it has no use during successful test case runs.
- C. The Descriptor Coverage panel is used for inputting Ul elements for object recognition, that are required to be covered during the execution process.
- D. The Descriptor Coverage panel is used to store the selectors and Object Repository Ul elements that will be needed for different test cases.

Answer: A

Explanation:
The Descriptor Coverage panel in UiPath Studio is used to view UI elements covered during test execution and to analyze selector coverage, helping identify elements that were or were not interacted with. It's also useful for debugging workflows where coverage may be incomplete or missing.

NEW QUESTION # 64
What type of license is used for an Unattended Robot in development and testing mode, enabling it to execute both test cases and RPA processes?

- A. Testing
- B. Citizen Developer
- C. NonProduction
- D. RPA Developer

Answer: C

Explanation:
A NonProduction license is used for an Unattended Robot in development and testing mode, allowing it to execute both test cases and RPA processes. It is ideal for scenarios that simulate production without affecting live environments.

NEW QUESTION # 65
