

Elevate Your Preparation By Using F5 F5CAB5 Exam Questions

DOWNLOAD the newest Pass4sures F5CAB5 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1x3H1YsOvjNErwxXhvkULyUTO81mfF1UI>

Maybe there are so many candidates think the F5CAB5 exam is difficult to pass that they be beaten by it. But now, you don't worry about that anymore, because we will provide you an excellent exam material. Our F5CAB5 exam materials are very useful for you and can help you score a high mark in the test. It also boosts the function of timing and the function to simulate the exam so you can improve your speed to answer and get full preparation for the test. Trust us that our F5CAB5 Exam Torrent can help you pass the exam and find an ideal job. If you have any question about the content of our F5CAB5 exam materials, our customer service will give you satisfied answers online.

F5 F5CAB5 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Identify the reason a pool is not working as expected: This domain focuses on troubleshooting pools including health monitor failures, priority group membership, and configured versus availability status of pools and members.
Topic 2	<ul style="list-style-type: none">Determine resource utilization: This domain covers analyzing system resources including control plane versus data plane usage, CPU statistics per virtual server, interface statistics, and disk and memory utilization.
Topic 3	<ul style="list-style-type: none">Identify the reason a virtual server is not working as expected: This section covers diagnosing virtual server issues including availability status, profile conflicts and misconfigurations, and incorrect IP addresses or ports.

Latest F5 F5CAB5 Test Report - F5CAB5 Pass Guaranteed

Our F5CAB5 study guide is convenient for the clients to learn and they save a lot of time and energy for the clients. After the clients pay successfully for the F5CAB5 exam dump they can immediately receive our products in the form of mails in 5-10 minutes and then click on the links to use our software to learn. The clients only need 20-30 hours to learn and then they can attend the test. For those in-service office staff and the students who have to focus on their learning this is a good new because they have to commit themselves to the jobs and the learning and don't have enough time to prepare for the test. Learning the F5CAB5 prep material takes you less than a week and you can learn them in the weekends or use your leisure time to learn them.

F5 BIG-IP Administration Support and Troubleshooting Sample Questions (Q62-Q67):

NEW QUESTION # 62

A BIG-IP Administrator suspects that one of the BIG-IP device power supplies is experiencing power outages. Which log file should the BIG-IP Administrator check to verify the suspicion? (Choose one answer)

- A. /var/log/daemon.log
- B. /var/log/audit
- C. /var/log/kern.log
- D. /var/log/ltn

Answer: D

Explanation:

According to official F5 documentation (K52015891 - Troubleshooting BIG-IP power supply issues), hardware-related alerts for power supplies, fans, and chassis components are logged in /var/log/ltn

When a BIG-IP device experiences a power supply issue—such as failure, intermittent outages, or fan-related faults—the system generates alerts through internal platform monitoring services. These alerts are written to the /var/log/ltn file and often appear with messages similar to:

Chassis power supply 2 has experienced an issue. Status is as follows: FAN=bad; STATUS=bad.

This makes /var/log/ltn the authoritative log file for identifying and verifying power supply and chassis-related problems on BIG-IP systems.

The other log files are not appropriate for this purpose:

/var/log/daemon.log contains general daemon messages but is not the primary source for chassis hardware alerts.

/var/log/kern.log logs kernel-level events, not platform power status.

/var/log/audit records administrative actions and configuration changes.

Conclusion:

Per F5-supported guidance, when suspecting power supply outages or chassis hardware issues, the BIG-IP Administrator should always check /var/log/ltn first.

NEW QUESTION # 63

A BIG-IP device sends out the following SNMP trap: big-ipo.f5.com - bigipExternalLinkChange Link: 1.0 is DOWN. Where in the BIG-IP Configuration utility should the BIG-IP Administrator verify the current status of Link 1.0?

- A. Network > Interfaces > Interface List
- B. Statistics > Performance > System
- C. Network > Trunks > Trunk List
- D. System > Platform

Answer: A

Explanation:

Identifying network-level performance issues often starts with investigating hardware-level alerts⁷⁸. In F5 terminology, a "Link" like "1.0" or "1.1" refers to a physical interface on the appliance⁷⁹. When an SNMP trap reports that a link is "DOWN," it indicates a loss of signal or an administrative shutdown of the physical port⁸⁰. To verify this, the administrator must navigate to Network > Interfaces > Interface List⁸¹. This screen provides real-time status, showing whether the interface is "up," "down," or "uninitialized," as well as any media speed or duplex mismatches that could be causing performance degradation⁸². Troubleshooting this is the first step in resolving "pool member down" or "VLAN failsafe" issues, as a down interface will take down any VLANs associated with it, immediately halting all traffic flow for the services relying on that physical path.

NEW QUESTION # 64

A BIG-IP Administrator notices that one of the servers that runs an application is NOT receiving any traffic. The BIG-IP Administrator examines the configuration status of the application and observes the displayed monitor configuration and affected pool member status.

What is the possible cause of this issue? (Choose one answer)

- A. The application is NOT responding with the expected Receive String.

- B. The BIG-IP device is NOT able to reach the pool.
- **C. The node health monitor is NOT responding.**
- D. HTTP 1.1 is NOT appropriate for monitoring purposes.

Answer: C

Explanation:

The key clue in the exhibit is the pool member's availability showing "Offline (Enabled) - Parent down". In BIG-IP terminology, a pool member inherits the status of its parent node. If the node is marked down (for example, by a node-level monitor or a default "node is down" condition), then all pool members using that node IP will also be marked down and will not receive any traffic, even if the application service on the member port might be healthy.

While the HTTPS monitor configuration (send/receive strings) is displayed, the status specifically indicates a node (parent) failure, not a service-level failure. If the problem were the application not matching the receive string, you would typically see the member down due to the member's monitor failing (and the status would reflect monitor failure details), rather than "parent down." Option D is too broad; BIG-IP can generally reach the subnet (other servers work), and this symptom points to a specific node condition. Option C is incorrect because HTTP/1.1 is commonly used for monitoring and is valid when properly formatted (especially with a Host header). Therefore, the most likely cause is that the node health monitor is not responding, causing the node-and consequently the member-to be marked down.

NEW QUESTION # 65

resume is enabled and a health check first fails and then passes?

- A. Available (Enabled)
- B. Offline (Enabled)
- C. Available (Disabled)
- **D. Offline (Disabled)**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Support and Troubleshooting documents: The "Manual Resume" feature is a safety mechanism used when a pool is not working as expected due to flapping services or unstable backend applications. Normally, when a health monitor fails, the pool member is marked "Offline" (Red), and when the monitor passes, it automatically returns to "Available" (Green)⁴⁷. However, if "Manual Resume" is enabled, the BIG-IP will not automatically put the member back into rotation after a failure⁴⁸. Even if the health check begins to pass again, the member remains in an "Offline (Disabled)" state⁴⁹. This requires an administrator to manually intervene and re-enable the member. This is a common point of confusion when troubleshooting; a member may show passing health checks but still not receive traffic because it is waiting for a manual administrative "resume" command. This feature is intended to prevent "unhealthy" servers from receiving traffic until an engineer has confirmed the root cause of the initial failure was resolved.

NEW QUESTION # 66

A BIG-IP Administrator adds new Pool Members into an existing, highly utilized pool. Soon after, there are reports that the application is failing to load for some users. What pool level setting should the BIG-IP Administrator check?

- A. Availability Requirement
- B. Allow SNAT
- **C. Slow Ramp Time**
- D. Action On Service Down

Answer: C

Explanation:

When troubleshooting a pool that is not working correctly after adding new members, the "Slow Ramp Time" setting is a primary suspect. In a pool that is already under high load and using a "Least Connections" load balancing method, a newly added server has zero connections. Without a slow ramp time, the BIG-IP will immediately direct a massive flood of new connections to the new server to "balance" it with the others. This "thundering herd" effect can crash a newly initialized application server before it has time to warm up its caches or establish its own database connections. By setting a "Slow Ramp Time" (typically in seconds), the administrator ensures the BIG-IP gradually increases the connection ratio to the new member. This allows the server to stabilize and scale up its performance over time. If users report intermittent failures specifically coinciding with the expansion of a pool, checking

this setting is a vital troubleshooting step to maintain pool health during maintenance.

NEW QUESTION # 67

.....

Pass4sures's promise is to get you a wonderful success in F5CAB5 certification exams. Select any certification exam, our dumps and study guides will help you ace it in first attempt. No more cramming from books and note, just prepare our F5CAB5 Interactive Questions and answers and learn everything necessary to easily pass the actual F5CAB5 exam.
