SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q46-Q51):

NEW QUESTION # 46

Which reporting tool is integrated with SAP Business Suite for financial analysis?

- A. SAP HR Analytics
- B. SAP Business One
- C. SAP Asset Management
- D. SAP Crystal Reports

Answer: D

NEW QUESTION # 47

How does SAP Business Suite help organizations in their financial management?

- A. By unifying all core business processes and enabling real-time data sharing
- B. By enhancing procurement efficiency and securing IT operations

- C. By automating operations and predicting sales trends
- D. By delivering timely reporting and optimizing liquidity

Answer: A,D

NEW QUESTION # 48

How does the SAP Business suite help Chief Financial Officers (CFOs) to achieve their top objectives?

Note: There are 3 correct answers to this question.

- A. By managing uncertainty via real-time planning and scenario analysis.
- B. By ensuring an engaged and productive workforce as competition intensifies and expectations evolve.
- C. By ensuring compliance and sustainability amid evolving regulations.
- D. By enabling agile and compliant HR in an increasingly complex legal and regulatory landscape.
- E. By navigating transformation by continuously optimizing processes for growth and efficiency.

Answer: A,C,E

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The SAP Business Suite is designed to address the evolving strategic needs of the modern CFO, who is increasingly responsible for driving enterprise value. The suite focuses on three core pillars: navigating transformation, ensuring compliance/sustainability, and managing uncertainty. First, SAP helps CFOs navigate transformation by providing a digital core in SAP S/4HANA. This allows for the optimization of critical financial processes like the "Record-to-Report" cycle, which enhances operational efficiency and supports business growth.

Second, the suite ensures compliance and sustainability by embedding regulatory requirements directly into business workflows. This is vital as CFOs face increasing pressure to report on non-financial ESG (Environmental, Social, and Governance) metrics alongside traditional financial data. Third, SAP enables CFOs to manage uncertainty through real-time planning and "what-if" scenario analysis. By utilizing a unified data foundation, finance leaders can immediately see the potential impact of market volatility or supply chain disruptions. This allows for proactive steering of the company rather than reactive reporting. While HR and workforce engagement (options C and E) are critical to the business, they are primarily handled by SAP SuccessFactors rather than being the direct focus of the SAP Financial Management solution set for CFO objectives.

NEW QUESTION # 49

What are some insights that finance provides in SAP Business Suite?

- A. Supply chain optimization
- B. Technology ROI
- C. Employee performance evaluation
- D. Cost management

Answer: A,B,D

NEW QUESTION # 50

What is the core function of the SAP Identity Access Governance solution?

- A. Identifying, analyzing and neutralizing cyberattacks.
- B. Performing risk assessments and strategic planning.
- C. Managing user authorizations and permissions.
- D. Supporting adherence to regulatory requirements.

Answer: C

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Identity Access Governance (IAG) is a cloud-based service that focuses specifically on the management of user authorizations and permissions across an organization's hybrid landscape. In a modern finance environment, where data privacy and security are

paramount, IAG provides a centralized way to control "who can do what" within the SAP system. This is critical for maintaining internal controls and protecting sensitive financial information.

The solution automates the provisioning process and ensures that "Segregation of Duties" (SoD) is strictly maintained. For example, it can prevent a user from having both the permission to create a purchase order and the permission to approve it, which is a fundamental requirement to prevent internal fraud. By automating these checks, IAG reduces the workload on IT and Audit teams while significantly lowering the risk of unauthorized access. While it helps meet regulatory requirements (Option C) and contributes to overall security, its primary operational function is the precise governance of user identities and the enforcement of access policies to ensure that every user has exactly the permissions they need-and no more.

NEW QUESTION # 51
