

2026 SK0-005 Reliable Exam Practice 100% Pass | Efficient New SK0-005 Exam Pass4sure: CompTIA Server+ Certification Exam

Hepatitis B: Antiviral treatment, laboratory results, client's risk from bloodborne transmission, physical examination findings

Hepatitis C: Antiviral treatment, laboratory results, client's risk from bloodborne transmission, and physical examination findings

When analyzing cues, the nurse should recognize that manifestations of hepatitis A, hepatitis B, and hepatitis C include jaundice, yellow sclerae, right upper quadrant pain upon palpation, dark yellow urine, and elevated AST and ALT levels. When analyzing cues, the nurse should also recognize the client's risk for contracting hepatitis A through the fecal-oral route during recent travel to an underdeveloped country and the client's occupational risk as a perioperative nurse for contracting hepatitis B and hepatitis C through bloodborne transmission. The nurse should recognize that the current standard of practice for

A nurse is caring for a client on a medical-surgical unit

Vital Signs

0700

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the SK0-005 test guide absolutely excellent quality and reasonable price, because the more times the user buys the SK0-005 test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the SK0-005 learning questions, our staff will help solve them as soon as possible.

If you want to get a good job, and if you are not satisfied with your present situation, if you long to have a higher station in life. We think it is high time for you to try your best to gain the SK0-005 certification. You do not need to think it is too late for you to study. As the saying goes, success and opportunity are only given to those people who are well-prepared! If you really long to own the SK0-005 Certification, it is necessary for you to act now. We are willing to help you gain the SK0-005 certification.

100% Pass Quiz 2026 Latest CompTIA SK0-005: CompTIA Server+ Certification Exam Reliable Exam Practice

The pass rate is 98% for SK0-005 exam bootcamp, if you choose us, we can ensure you that you can pass the exam just one time.

In addition, we offer you free demo to have a try before buying, so that you can know what the complete version is like. In order to strengthen your confidence for SK0-005 training materials, we are pass guarantee and money back guarantee, and we will refund your money if you fail to pass the exam. We have a professional service team and they have the professional knowledge for SK0-005 Exam Bootcamp, if you have any questions, you can contact with them.

CompTIA Server+ Certification Exam Sample Questions (Q220-Q225):

NEW QUESTION # 220

A new 40GB NIC has just been installed in a server but is not detected within the Windows server OS. Which of the following would most likely fix the issue?

- A. Update the server OS.
- **B. Update the firmware on the NIC.**
- C. Update the remote management console.
- D. Update the switch firmware.

Answer: B

Explanation:

Updating the firmware on the NIC is the most likely solution to fix the issue of a new 40GB NIC not being detected within the Windows server OS. Firmware is a software program that controls the functionality of a hardware device, such as a NIC (network interface card). A NIC is a device that enables network communication for a server by providing an interface between the server and the network cable or wireless connection. Updating the firmware on the NIC can improve its performance, compatibility, and stability with the server OS and network protocols. Reference: CompTIA Server+ Certification Exam Objectives, Domain 4.0: Networking, Objective 4.1: Given a scenario, configure network settings for servers.

NEW QUESTION # 221

A storage administrator is configuring a new array to provide storage to a virtual cluster. The array has a built-in backup agent to allow data that is stored on the array to be backed up. The storage administrator wants the virtual cluster to use a file-based storage protocol so the backup agent can just back up the files that change and not the whole data store. Which of the following storage protocols should the administrator use?

- A. FCoE
- **B. NFS**
- C. FC
- D. iSCSI

Answer: B

Explanation:

Different storage protocols operate at different levels (file-based vs. block-based):

* iSCSI (Internet Small Computer Systems Interface) is a block-level protocol, meaning that the storage appears as raw disk space to the operating system. Backups would require copying entire blocks, rather than specific files.

* FC (Fibre Channel) is another block-level protocol used in high-performance SANs. It does not support file-based storage natively.

* FCoE (Fibre Channel over Ethernet) extends FC over Ethernet but still functions as a block-based storage solution.

* NFS (Network File System) is a file-based storage protocol, making it the best option. It allows direct access to files, which enables backup software to back up only modified files instead of the entire block device.

Since the administrator requires a file-based storage protocol to ensure efficient incremental backups, NFS is the correct choice.

NEW QUESTION # 222

A Linux server was recently updated. Now, the server stops during the boot process with a blank screen and an Es prompt. When of the following is the MOST likely cause of this issue?

- **A. The UEFI boot was interrupted by a missing Linux boot file**
- B. The system is booting to a USB flash drive
- C. The BIOS firmware needs to be upgraded
- D. The BIOS could not find a bootable hard disk

Answer: A

Explanation:

Explanation

The most likely cause of this issue is that the UEFI boot was interrupted by a missing Linux boot file, such as grub.cfg or vmlinuz, which are essential for loading the Linux kernel and booting the system. The sE prompt indicates that the system entered into UEFI Shell mode, which is a command-line interface for troubleshooting UEFI boot issues. The administrator can use UEFI Shell commands to locate and restore the missing boot file or change the boot order. Verified References: [UEFI Shell Guide]

NEW QUESTION # 223

A server technician is installing a Windows server OS on a physical server. The specifications for the installation call for a 4TB data volume. To ensure the partition is available to the OS, the technician must verify the:

- A. hardware is UEFI compliant
- **B. volume is formatted as GPT**
- C. volume is spanned across multiple physical disk drives
- D. volume is formatted as MBR

Answer: B

Explanation:

GPT was developed to replace the limitations of MBR, and it is part of UEFI development to replace PC BIOS.

So the Hardware has to UEFI compatible for GPT to be fully effective.

NEW QUESTION # 224

A server administrator is trying to determine the cause of a slowdown on a database server. Upon investigation, the administrator determines the issue is in the storage subsystem. Which of the following will most likely resolve this issue?

- A. Extending capacity by installing a 4TB SATA disk
- **B. Increasing IOPS by implementing flash storage**
- C. Implementing deduplication on the storage
- D. Reformatting the disk as FAT32

Answer: B

Explanation:

Explanation

Increasing IOPS (input/output operations per second) by implementing flash storage is the most likely solution to resolve a slowdown issue in the storage subsystem of a database server. Flash storage uses solid-state drives (SSDs) that have faster read/write speeds and lower latency than traditional hard disk drives (HDDs). This can improve the performance of database queries and transactions. Implementing deduplication, extending capacity, or reformatting the disk as FAT32 are not likely to resolve the issue, as they do not affect the IOPS of the storage subsystem. References: [CompTIA Server+ Certification Exam Objectives], Domain 3.0:

Storage, Objective 3.5: Summarize hardware and features of various storage technologies.
