

Clear 2V0-17.25 Exam | Test 2V0-17.25 Vce Free

2026 Latest ITExamSimulator 2V0-17.25 PDF Dumps and 2V0-17.25 Exam Engine Free Share: https://drive.google.com/open?id=1OQJb0w8wQC_esQrb7Bo0Ubx4sOc75_po

With these mock exams, it is easy to track your progress by monitoring your marks each time you go through the 2V0-17.25 practice test. Our 2V0-17.25 practice exams will give you an experience of attempting the 2V0-17.25 original examination. You will be able to deal with the actual exam pressure better when you have already experienced it in our VMware 2V0-17.25 practice exams.

VMware 2V0-17.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: This section of the exam measures the skills of Cloud Architects and focuses on understanding the broader context of IT architectures, common technologies, and industry standards. While it does not have testable objectives, it sets the foundation for how VMware Cloud Foundation aligns with enterprise cloud strategies.
Topic 2	<ul style="list-style-type: none"> VMware Cloud Foundation Fundamentals: This section of the exam measures the skills of Private Cloud Engineers and covers the basic building blocks of VMware Cloud Foundation. It includes the vision and use cases for private cloud, along with the value it provides to businesses. Candidates are expected to understand compute fundamentals such as deploying and managing vCenter, ESXi, clusters, and virtual machines. Storage fundamentals include configuring vSphere storage, setting up vSAN clusters, applying storage policies, and understanding resilience options. Networking fundamentals are also assessed, with a focus on configuring connectivity, fabrics, routing, and network services in a VMware environment.
Topic 3	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: This section of the exam measures the skills of Solution Designers and emphasizes the ability to plan and design VMware by Broadcom solutions. Although no testable objectives are defined here, it reinforces the importance of architectural planning and design considerations for large-scale cloud deployments.
Topic 4	<ul style="list-style-type: none"> Deploy, Configure, and Operate VMware Cloud Foundation (VCF): This section of the exam measures the skills of VCF Administrators and goes in-depth into deploying, configuring, and managing VMware Cloud Foundation. The deployment portion covers identifying deployment models, configuring private cloud environments, and setting up workload domains and networking. The management objectives focus on lifecycle operations such as fleet management, identity and role-based access, licensing, certificate handling, and importing existing vCenters. Operations are assessed through capabilities like monitoring health, logs, networks, and storage, along with creating dashboards, configuring alerts, and ensuring compliance. The automation portion evaluates skills in using VCF Automation for multi-tenancy, provider networking, content libraries, governance policies, and extensibility to automate business processes. It also includes knowledge of deploying Supervisor-based services within Cloud Foundation.

Test 2V0-17.25 Vce Free | Accurate 2V0-17.25 Prep Material

There is no doubt that among our three different versions of 2V0-17.25 guide torrent, the most prevalent one is PDF version, and this is particularly suitable and welcomed by youngsters. There are some features of this version: first of all, PDF version of our 2V0-17.25 prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points. Besides our 2V0-17.25 Exam Torrent support free demo download, as we mentioned before, it is an ideal way for you to be fully aware of our 2V0-17.25 prep guide and then purchasing them if suitable and satisfactory.

VMware Cloud Foundation 9.0 Administrator Sample Questions (Q76-Q81):

NEW QUESTION # 76

Which vSphere feature helps you reclaim idle or unused disk space within guest operating systems by coordinating the hypervisor and OS?

- A. Ballooning
- B. UNMAP / Guest OS trim
- C. Transparent Page Sharing
- D. Storage I/O Control

Answer: B

Explanation:

The UNMAP feature (sometimes referred to as trim for SSDs) reclaims blocks that guest OSes free, updating the storage system so that this space can be reused.

NEW QUESTION # 77

An administrator has been tasked with expanding an existing VMware Cloud Foundation environment by adding a new workload domain. The environment currently has one management domain and one VI workload domain.

What options are available to the administrator for deploying NSX in the second VI workload domain?

- A. The new workload domain can have its own dedicated NSX Fabric or it can join the existing NSX Fabric configured in the existing VI domain.
- B. The new workload domain can have its own dedicated NSX Fabric or it can join the existing NSX Fabric configured in the management domain.
- C. The new workload domain must have a dedicated NSX Fabric.
- D. The new workload domain can have a dedicated NSX Fabric or it can join the existing NSX Fabric configured in either the management domain or existing VI domain.

Answer: D

Explanation:

When expanding a VMware Cloud Foundation environment with a new workload domain, you have the flexibility to either configure a dedicated NSX Fabric for the new domain or join an existing NSX Fabric from either the management domain or a previously established VI workload domain. This allows for consistent and scalable network virtualization across multiple domains in the environment.

NEW QUESTION # 78

When commissioning new hosts in VMware Cloud Foundation, which three parameters must be provided? (Choose three.)

- A. Storage Type
- B. SSO Domain Name
- C. ESXi Version
- D. Hardware Type

- E. Username
- F. Network Pool Name

Answer: A,B,E

Explanation:

Storage Type: The storage type needs to be specified during the commissioning of new hosts in VMware Cloud Foundation, as it is important for the configuration of storage resources for the hosts.

SSO Domain Name: The Single Sign-On (SSO) domain is an essential parameter to associate the hosts with the existing authentication domain.

Username: The administrator needs to provide a username with appropriate permissions to configure the hosts during the commissioning process.

NEW QUESTION # 79

An administrator is tasked to upgrade an existing VMware Cloud Foundation (VCF) 5.2 deployment to VCF 9.0. The existing deployment includes:

Aria Operations

Aria Automation

Which three components must be upgraded or deployed first? (Choose three.)

- A. Deploy VCF Installer appliance.
- B. Deploy an NSX Manager 9.0 instance.
- C. Automatically upgrade Aria Automation to VCF Automation 9.0.
- D. Automatically upgrade Aria Operations to VCF Operations 9.0.
- E. Manually upgrade Aria Automation to VCF Automation 9.0.
- F. Manually upgrade Aria Operations to VCF Operations 9.0.

Answer: A,B,F

Explanation:

Upgrading from VCF 5.2 to VCF 9.0 involves a significant architectural transition. The VCF 9.0 Upgrade Guide outlines the sequence for environments previously using Aria components.

Deploy VCF Installer (E):

VCF 9.0 introduces the VCF Installer appliance to orchestrate deployment and lifecycle operations. This must be deployed first.

Deploy NSX Manager 9.0 (A):

NSX must align with the new VCF 9.0 architecture before further component integration.

Manually upgrade Aria Operations to VCF Operations 9.0 (D):

Aria Operations transitions to the integrated VCF Operations platform. This is not automatic in major version transitions and requires administrator-driven upgrade.

Options B and F are incorrect because automatic upgrade paths are not supported for this major version shift. Option C is not part of the initial mandatory sequence before platform alignment.

Therefore, the correct three are:

Deploy NSX Manager 9.0, Manually upgrade Aria Operations to VCF Operations 9.0, and Deploy VCF Installer appliance.

NEW QUESTION # 80

After a scheduled maintenance window, users report that they are unable to access the vCenter Server. The administrator notices that the vSphere Client is not responding.

What step should the administrator take to troubleshoot this issue?

- A. Check the network connectivity between the vCenter Server and the ESXi hosts.
- B. Verify that the vCenter Server is powered on and its services are running.
- C. Restart the vSphere Client service on the vCenter Server.
- D. Review the firewall rules on the vCenter Server.

Answer: B

Explanation:

When users are unable to access the vCenter Server and the vSphere Client is not responding, the first step is to check if the vCenter Server is powered on and whether its essential services are running. This can include services like the vCenter Server

service, vSphere Web Client service, and other related services that enable access to the vCenter Server. If the services are stopped or unresponsive, restarting them may resolve the issue.

NEW QUESTION # 81

.....

Customers always attach great importance to the quality of 2V0-17.25 exam torrent. We can guarantee that our study materials deserve your trustee. We have built good reputation in the market now. After about ten years' development, we have owned a perfect quality control system. All 2V0-17.25 exam prep has been inspected strictly before we sell to our customers. Generally, they are very satisfied with our 2V0-17.25 Exam Torrent. Also, some people will write good review guidance for reference. Maybe it is useful for your preparation of the 2V0-17.25 exam. In addition, you also can think carefully which kind of study materials suit you best. If someone leaves their phone number or email address in the comments area, you can contact them directly to get some useful suggestions.
