

# CCAAK Exam Book | High Pass Rate | Download Instantly

BONUS!!! Download part of itPass4sure CCAAk dumps for free: [https://drive.google.com/open?id=1A\\_0Yb-istZKoNsqI1ZQTotYbAWd9Oei\\_](https://drive.google.com/open?id=1A_0Yb-istZKoNsqI1ZQTotYbAWd9Oei_)

You will have good command knowledge with the help of our CCAAk study materials. The certificate is of great value in the job market. Our CCAAk learning prep can exactly match your requirements and help you pass CCAAk exams and obtain certificates. As you can see, our products are very popular in the market. Time and tides wait for no people. Take your satisfied CCAAk Actual Test guide and start your new learning journey. After learning our CCAAk learning materials, you will benefit a lot. Being brave to try new things, you will gain meaningful knowledge.

Now is not the time to be afraid to take any more difficult certification exams. Our CCAAk learning quiz can relieve you of the issue within limited time. Our website provides excellent CCAAk learning guidance, practical questions and answers, and questions for your choice which are your real strength. You can take the CCAAk Training Materials and pass it without any difficulty. As long as you can practice CCAAk study guide regularly and persistently your goals of making progress and getting certificates smoothly will be realized just like a piece of cake.

## Passing Confluent CCAAk Exam is Easy with Our Reliable CCAAk Exam Book: Confluent Certified Administrator for Apache Kafka

It has similar specifications to the Confluent CCAAk desktop-based practice exam software, but it requires an internet connection. Our Confluent CCAAk practice exam highlights mistakes at the end of each attempt, allowing you to overcome them before it's too late. This kind of approach is great for complete and flawless Confluent CCAAk Test Preparation.

### Confluent CCAAk Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Observability: This section of the exam measures skills of a Site Reliability Engineer and focuses on monitoring Kafka clusters. It assesses knowledge of metrics, logging, and alerting tools, including how to use them to maintain cluster health and performance visibility.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Apache Kafka® Security: This section of the exam measures skills of a Site Reliability Engineer and focuses on securing Kafka environments. It includes authentication mechanisms such as TLS and SASL, authorization using ACLs, and encrypting data at rest and in transit to ensure secure communication and access control.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Apache Kafka® Cluster Configuration: This section of the exam measures skills of a Kafka Administrator and includes configuring broker properties, tuning for performance, managing topic-level settings, and applying best practices for production-grade environments.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Troubleshooting: This section of the exam measures skills of a Kafka Administrator and includes diagnosing common issues in Kafka clusters. It covers problem areas such as performance bottlenecks, message delivery failures, replication issues, and consumer lag, along with techniques to resolve them effectively.</li> </ul>

## Confluent Certified Administrator for Apache Kafka Sample Questions (Q51-Q56):

### NEW QUESTION # 51

Your organization has a mission-critical Kafka cluster that must be highly available. A Disaster Recovery (DR) cluster has been set up using Replicator, and data is continuously being replicated from source cluster to the DR cluster. However, you notice that the message on offset 1002 on source cluster does not seem to match with offset 1002 on the destination DR cluster. Which statement is correct?

- A. The message on DR cluster got over-written accidentally by another application.
- B. The message was updated on source cluster, but the update did not flow into destination DR cluster and errored.
- C. The DR cluster is lagging behind updates; once the DR cluster catches up, the messages will match.
- D. The offsets for the messages on the source, destination cluster may not match.

**Answer: D**

Explanation:

When using Confluent Replicator (or MirrorMaker), offsets are not preserved between the source and destination Kafka clusters. Messages are replicated based on content, but they are assigned new offsets in the DR (destination) cluster. Therefore, offset 1002 on the source and offset 1002 on the DR cluster likely refer to different messages, which is expected behavior.

### NEW QUESTION # 52

Multiple clients are sharing a Kafka cluster.

As an administrator, how would you ensure that Kafka resources are distributed fairly to all clients?

- A. ACLs
- B. Quotas
- C. Rebalancing
- D. Consumer Groups

**Answer: B**

Explanation:

Kafka quotas allow administrators to control and limit the rate of data production and consumption per client (producer/consumer), ensuring fair use of broker resources among multiple clients.

### NEW QUESTION # 53

How does Kafka guarantee message integrity after a message is written on a disk?

- A. Only message metadata can be altered using command line (CLI) tools.
- B. A message can be edited by the producer, producing to the message offset.
- C. A message cannot be altered once it has been written.
- C A message can be grouped with message sharing the same key to improve read performance

**Answer: C**

Explanation:

Kafka ensures message immutability for data integrity. Once a message is written to a Kafka topic and persisted to disk, it cannot be modified. This immutability guarantees that consumers always receive the original message content, which is critical for auditability,

fault tolerance, and data reliability.

#### NEW QUESTION # 54

An employee in the reporting department needs assistance because their data feed is slowing down. You start by quickly checking the consumer lag for the clients on the data stream.

Which command will allow you to quickly check for lag on the consumers?

- A. bin/kafka-consumer-lag.sh
- B. bin/kafka-reassign-partitions.sh
- C. bin/kafka-consumer-group-throughput.sh
- D. bin/kafka-consumer-groups.sh

**Answer: D**

Explanation:

The kafka-consumer-groups.sh script is used to inspect consumer group details, including consumer lag, which indicates how far behind a consumer is from the latest data in the partition.

The typical usage is bin/kafka-consumer-groups.sh --bootstrap-server <broker> --describe --group <group\_id>

#### NEW QUESTION # 55

What are important factors in sizing a ksqldb cluster? (Choose three.)

- A. Number of Queries
- B. Data Schema
- C. Data Encryption
- D. Number of Partitions
- E. Topic Data Retention

**Answer: A,B,D**

Explanation:

The complexity of the schema (number of fields, data types, etc.) affects processing and memory usage.

Each ksqldb persistent query consumes resources (CPU, memory), so more queries require more capacity.

More partitions increase parallelism, but also resource usage, especially in scaling and state management.

#### NEW QUESTION # 56

.....

The Confluent CCAAK certification differentiates you from other professionals in the market. Success in the Confluent CCAAK exam shows that you have demonstrated dedication to understanding and advancing in your profession. Cracking the Confluent CCAAK test gives you an edge which is particularly essential in today's challenging market of information technology. If you are planning to get through the test, you must study from reliable sources for Confluent Certified Administrator for Apache Kafka CCAAK Exam Preparation. itPass4sure real Confluent CCAAK exam dumps are enough to clear the CCAAK certification test easily on the first attempt. This is because itPass4sure Confluent CCAAK PDF Questions and practice test is designed after a lot of research and hard work carried out by experts.
