

Test Nutanix NCP-CI-Azure Study Guide, NCP-CI-Azure Questions Exam

NUTANIX NCP-CI-AZURE V6.7 EXAM QUESTIONS WITH CORRECT ANSWERS

When configuring an alert email in Prism Central deployment within an NC2 environment, what is required in order for the emails to be sent properly?A.SMTP server configured in Prism Central SettingsB.A whitelisted public cloud console endpointC.Cluster Super Admin permissionsD.Name servers configure in Prism Central - Correct Answers -Answer: A

Which address must Azure Directory Service be able to resolve when deploying a new NC2 cluster?A.Download.cloud.nutanix.comB.Apikeys.nutanix.comC.Gateway-external-api.cloud.nutanix.comD.Gateway-internal-api-cloud.nutanix.com - Correct Answers - Answer: C

An on-premises network has been extended to azure with a VPN/ExpressRoute. The routing and peering of VNets is setup and has been confirmed to be correct.Which statement best describes the state of the traffic flow between the on-prem CVMs and the NC2 CVMs in Azure?A.The Network Security Group of the Flow Gateway VM on the internal NICs will need to be edited to enable the traffic flow.B.A ticket will need to be put in with Microsoft support to open the subnet ranges from on-premises.C.Traffic will flow directly to the NC2 CVMs. Nothing will block the path by default.D.The Network Security Group of the Flow Gateway VM on the External NICs will need to be edited to enable the traffic flow. - Correct Answers -Answer: A

What will be observed in the NC2 cluster when terminating a node from the Azure portal?A.NC2 will shutdown the node.B.NC2 will continue re-provisioning the node.C.NC2 will terminate the node from the cluster.D.NC2 will mark the node as degraded. - Correct Answers -Answer: D

An administrator seeks to ensure that the newly-created NC2 organization named Finance can only deploy clusters into certain cloud regions.Which action should the administrator take to do this?A.Configure permissions in cloud accounts to restrict access to certain regions.B.Open a support ticket with Nutanix to whitelist the allowed regions for the Finance NC.C.Configure RBAC roles on the Finance NC2 organization to allow access to regions.D.Specify allowed regions when configuring a cloud account for the Finance NC2 organization. - Correct Answers -Answer: D

A company wants NC2 networking components to be created manually with the correct naming conversation. To achieve this the administrator manually creates the PC and Host VNets in Azure.What additional Azure Network components must the administrator

P.S. Free & New NCP-CI-Azure dumps are available on Google Drive shared by PracticeTorrent: <https://drive.google.com/open?id=15inuhrVgeoQizWGjIvYNbki9mKd3zXP>

NCP-CI-Azure guide torrent is authoritative. Over the years, our study materials have helped tens of thousands of candidates successfully pass the exam. NCP-CI-Azure certification training is prepared by industry experts based on years of research on the syllabus. These experts are certificate holders who have already passed the certification. They have a keen sense of smell for the test. Therefore, NCP-CI-Azure certification training is the closest material to the real exam questions. With our study materials, you don't have to worry about learning materials that don't match the exam content. With NCP-CI-Azure Study Guide, you only need to spend 20 to 30 hours practicing to take the exam. In addition, NCP-CI-Azure certification training has a dedicated expert who updates all data content on a daily basis and sends the updated content to the customer at the first time. Therefore, using NCP-CI-Azure guide torrent, you don't need to worry about missing any exam focus.

Nutanix NCP-CI-Azure Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Planning an NC2 on Azure Deployment: This section of the exam measures the skills of IT Administrators and covers the preparation of the Azure cloud environment, including determining the appropriate Azure account and node types. It also involves subscribing to the NC2 service, which requires knowledge of authentication methods and organization naming conventions. Additionally, candidates must determine implementation requirements by evaluating deployment use cases and redundancy needs. Identifying networking requirements is crucial, focusing on connectivity options like VPN and CIDR ranges.
Topic 2	<ul style="list-style-type: none"> • Managing an NC2 on Azure Environment: This section relates to skills in identifying management tasks for nodes and clusters. Candidates will monitor cluster health and cloud resource performance, ensuring that all components function efficiently. Understanding these management tasks is vital for maintaining operational integrity in a hybrid cloud environment.
Topic 3	<ul style="list-style-type: none"> • Configuring an NC2 on Azure Environment: This section evaluates the skills of IT Administrators and emphasizes modifying cloud networking security to protect resources. Candidates will configure Nutanix networking settings and troubleshoot connectivity issues to ensure seamless communication within the cloud environment.
Topic 4	<ul style="list-style-type: none"> • Deploying an NC2 on Azure Environment: This section assesses the skills of Nutanix Cloud Operators and focuses on deploying the cloud cluster within the Azure environment. Candidates will learn to configure cloud provider networking effectively, ensuring that all necessary resources are correctly set up for deployment.

2026 High Pass-Rate Nutanix NCP-CI-Azure: Test Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Study Guide

PracticeTorrent promises up to 365 days of free NCP-CI-Azure real exam questions updates. You will instantly get our free NCP-CI-Azure actual questions updates in case of any update in the examination content by the Nutanix Certification Exams. These are excellent offers. Download updated NCP-CI-Azure Exam Questions and begin your Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) NCP-CI-Azure certification test preparation journey today. Best of Luck!

Nutanix Certified Professional - Cloud Integration - Azure (NCP-CI-Azure v6.7) Sample Questions (Q36-Q41):

NEW QUESTION # 36

An on-premises network has been extended to azure with a VPN/ExpressRoute. The routing and peering of VNets is setup and has been confirmed to be correct.

Which statement best describes the state of the traffic flow between the on-prem CVMs and the NC2 CVMs in Azure?

- **A. The Network Security Group of the Flow Gateway VM on the Internal NICs will need to be edited to enable the traffic flow.**
- B. Traffic will flow directly to the NC2 CVMs. Nothing will block the path by default.
- C. A ticket will need to be put in with Microsoft support to open the subnet ranges from on-premises.
- D. The Network Security Group of the Flow Gateway VM on the External NICs will need to be edited to enable the traffic flow.

Answer: A

Explanation:

* Network Security Groups (NSGs):NSGs control the inbound and outbound traffic to and from Azure resources. For traffic between on-premises CVMs and NC2 CVMs in Azure, the NSGs associated with the Flow Gateway VM's Internal NICs must be configured to allow the required traffic.

* Editing NSGs:To enable traffic flow, specific rules must be added to the NSGs to permit traffic from the on-premises network to the NC2 environment. This includes specifying the appropriate source and destination IP ranges and the necessary ports and protocols.

- * Azure Network Security Groups Documentation
- * Nutanix NC2 Networking Configuration Guide

NEW QUESTION # 37

An administrator is tasked with allowing inbound connectivity for a user VM that resides on a NAT network.

The communicating successfully with other VMs in the NAT network.

The cluster has the following characteristics

A Transit VPC exists

* A User VPC exists

* A NAT subnet has been created

* 25 floating IP addresses are in use by other VMs

* Routes have been configured

When the administrator attempts to assign a floating IP address to the VM, none are available.

What is the reason for this?

- **A. Additional floating IP addresses need to be requested.**
- B. An external DHCP server needs to be deployed into the cluster.
- C. Geneve encapsulation only supports 25 Floating IP addresses.
- D. An additional Flow Gateway instance is required.

Answer: A

Explanation:

* Floating IP Address Limitation: The cluster already has 25 floating IP addresses in use by other VMs.

If the administrator cannot assign a floating IP address to the new VM, it is because the pool of available floating IPs is exhausted.

* Requesting Additional Floating IPs: To resolve this issue, the administrator needs to request additional floating IP addresses to be allocated to the NAT subnet. This will ensure that there are enough IP addresses available for all VMs requiring inbound connectivity.

NEW QUESTION # 38

A company has just adopted Nutanix as their technology of choice and is preparing to deploy Nutanix Cloud Clusters (NC@)

Which step must be taken first to gain access to the NC2 console?

- A. Start a free trial via Billing Portal.
- B. Navigate to doud.nutanix.com.
- **C. Create a My Nutanix account.**
- D. Open a support case with Nutanix.

Answer: C

Explanation:

Initial Access: To gain access to the NC2 console, users need to create an account on the Nutanix platform.

My Nutanix Account: Creating a My Nutanix account provides access to the Nutanix console, support, and other resources.

Free Trial and Billing Portal: Starting a free trial or accessing the billing portal can be subsequent steps but require an initial account.

Support Case: Opening a support case is not necessary for initial access but might be needed for specific issues later.

Conclusion: Creating a My Nutanix account is the first step to accessing the NC2 console and other Nutanix services.

Getting Started with Nutanix NC2

NEW QUESTION # 39

Exhibit

An NC2 on Azure cluster was deployed with two Flow Gateway in HA (FGW1 and FGW2). After a week of use, four bare-metal nodes were added to the NC2 cluster and additional workloads were added. The existing workloads were using floating IPs to allow inbound traffic to communicate with the running workloads on the NC2 cluster. It was determined that additional bandwidth for north/south traffic would be needed. Two additional Flow Gateways were added (FGW3 and FGW4) from the NC2 portal configuration menu. The existing workloads prior to expansion on the NC2 cluster will be able to use which Flow Gateways using the NAT traffic path after the expansion?

- A. All four Flow Gateways.
- **B. Only the Flow Gateway each workload was using prior to expansion.**
- C. They will be able to use FGW3 and FGW4 once the NC2 workloads reboot.
- D. All four Flow Gateways using a MAC/Hash algorithm.

Answer: B

Explanation:

In the NC2 on Azure cluster scenario, the existing workloads were using floating IPs for inbound traffic before the addition of new Flow Gateways (FGW3 and FGW4). The NAT traffic path established initially will continue to direct traffic through the originally assigned Flow Gateways (FGW1 and FGW2). The existing workloads will not automatically utilize the new Flow Gateways (FGW3 and FGW4) without a reconfiguration or reboot, which reassigns the NAT paths.

NEW QUESTION # 40

An administrator is tasked with allowing inbound connectivity for a user VM that resides on a NAT network. The communicating successfully with other VMs in the NAT network.

The cluster has the following characteristics

- A Transit VPC exists
- * A User VPC exists
- * A NAT subnet has been created
- * 25 floating IP addresses are in use by other VMs
- * Routes have been configured

When the administrator attempts to assign a floating IP address to the VM, none are available.

What is the reason for this?

- **A. Additional floating IP addresses need to be requested.**
- B. An external DHCP server needs to be deployed into the cluster.

- C. Geneve encapsulation only supports 25 Floating IP addresses.
- D. An additional Flow Gateway instance is required.

Answer: A

Explanation:

Floating IP Address Limitation: The cluster already has 25 floating IP addresses in use by other VMs. If the administrator cannot assign a floating IP address to the new VM, it is because the pool of available floating IPs is exhausted.

Requesting Additional Floating IPs: To resolve this issue, the administrator needs to request additional floating IP addresses to be allocated to the NAT subnet. This will ensure that there are enough IP addresses available for all VMs requiring inbound connectivity.
