# Salesforce Health Cloud Accredited Professional Sample Questions (Q104-Q109):

**NEW QUESTION # 104**
When implementing Provider Search functionality, which two changes allow an external user to access search results?
Choose 2 answers

- A. Use Experience Builder to add the Provider Search component to a page on the site.
- B. Create a sharing rule on the Care Provider Searchable Field object to share with external users.
- C. Give the site user profile Read access to the Data Pipeline object.
- D. Give the site user profile Read access to the Care Provider Searchable Field object.

**Answer: A,D**

Explanation:
To enable external users to access Provider Search functionality, you need to make necessary changes to the Experience Cloud site and permissions:
Steps to Enable Provider Search for External Users:
Add the Provider Search Component to the Site (Option A):
Use Experience Builder to include the Provider Search Lightning Web Component on a public-facing page of the Experience Cloud site.
Steps:
Navigate to Experience Builder.
Drag and drop the Provider Search component onto a designated page.
Publish the site to make the component available to external users.
Grant Read Access to the Care Provider Searchable Field Object (Option C):
External users must have appropriate permissions to view the provider search results.
Steps:
Go to Setup > Profiles.
Edit the site user profile associated with the Experience Cloud site.
Grant Read access to the Care Provider Searchable Field object.
Save and assign the profile to the relevant users.
Additional Notes:
Sharing Rules (Not Necessary): Sharing rules are not required if the external user profile already has sufficient object-level access.
Data Pipeline Object (Not Relevant): The Data Pipeline object is not directly involved in enabling Provider Search functionality for external users.
Reference:
Enable Provider Search in Health Cloud
Experience Cloud for Health Cloud

**NEW QUESTION # 105**
When implementing Provider Search functionality, which two changes allow an external user to access search results?
Choose 2 answers

- A. Use Experience Builder to add the Provider Search component to a page on the site.
- B. Create a sharing rule on the Care Provider Searchable Field object to share with external users.
- C. Give the site user profile Read access to the Data Pipeline object.
- D. Give the site user profile Read access to the Care Provider Searchable Field object.

**Answer: A,D**

Explanation:
Comprehensive Detailed Step by Step Explanation with exact Extracts from Salesforce Health Cloud documents that you have with References
* Experience Builder and Component Access:
* Add the Provider Search component to the Experience Cloud site page for external user access.
* Extract:

"Use Experience Builder to add Provider Search components to your site to enable external users to search for providers."
-Provider Search in Experience Cloud
* Read Access:
* Granting Read access to theCare Provider Searchable Fieldobject is required for site users to access search results.
* Extract:
"Grant the site user profile Read access to the Care Provider Searchable Field object to allow them to view provider search results."
-Provider Search Security
* Other Options:
* B:Sharing rules not typically required; object-level access is key.
* D:Data Pipeline object access is not relevant for provider search results.

Provider Search in Experience Cloud

## NEW QUESTION # 106

Bloomington Caregivers has reviewed the functionality of Integrated Care Management and decided to upgrade from the legacy Care Plans.
Which two statements are true with respect to Integrated Care Management?
Choose 2 answers

- A. Integrated Care Management is only made available by enabling the Enhanced Care Management setting in Salesforce Setup.
- B. Existing Care Plan Template records built in the legacy process can be used in the Integrated Care Management process; no data migration is required.
- C. Integrated Care Management leverages OmniStudio and the Discovery Framework to provide recommendations for what to add to a care plan based on the assessment.
- D. Integrated Care Management uses a standard object CarePlan; the Case object is no longer used.

**Answer: A,C**

## NEW QUESTION # 107

Which two fields are required when creating a new care plan task?

- A. owner
- B. Goal
- C. Due Date
- D. Status
- E. problem

**Answer: A,D**

Explanation:
Owner (A) and Status are two fields that are required when creating a new care plan task. Problem (B), Goal (D), and Due Date (E) are optional fields when creating a new care plan task.

## NEW QUESTION # 108

Which is true about choosing a care request type when setting up a new care request record?

- A. A care request type cannot be chosen when creating a new care request.
- B. Multiple care request types can be chosen for a single care request.
- C. Any case record type can be chosen when creating care request.
- D. A case record type can be chosen to identify a single care request type for each care request.

**Answer: D**
