What would likely have helped avoid this conflict?

- A. Nothing - running automation projects like autonomous projects is the correct thing to do.
- B. Senior management should become involved in the project.
- **C. Everyone on the team should understand the differences between automation and autonomous systems.**
- D. Applying a hybrid approach of automation and AI best practices would have achieved better results.

**Answer: C**

#### **NEW QUESTION # 64**

Your team has collected petabytes of data for your AI project. As the project lead, you understand this is too much data to use for this iteration of the project.

What is the best course of action to take with this data?

- A. Careful algorithm selection that reduces the need for data.
- **B. Data selection and attribute pruning to reduce overall size and data complexity.**
- C. Data integration focused on reducing the number of data sources.
- D. Data Deduping to reduce overall size and data complexity.

**Answer: B**

#### **NEW QUESTION # 65**

When building your model you need to make sure you're not only checking for performance and making sure the model is giving the expected results. You also need to make sure the model is accomplishing the business objective.

At what phase of CPMAI is this most appropriate to do this?

- A. Phase II
- B. Phase I
- **C. Phase V**
- D. Phase III
- E. Phase VI
- F. Phase IV

**Answer: C**

#### **NEW QUESTION # 66**

You have been brought on to manage a recognition project, specifically an image recognition project, for an Autonomous Retail application. You know that you need to make sure you have sufficient data for this project.

What's the best way to approach this?

- A. Take inventory of all data your team has and use the relevant data
- **B. Take inventory of all data your company has and use the relevant data**
- C. Take all the data your company has as well as purchase additional external data
- D. Take all the existing data you have and apply it to this project

**Answer: B**
