## PMI Project Management Professional (2025 Version) Sample Questions (Q896-Q901):

### NEW QUESTION # 896

A project manager is working on a large IT project. During a review for one of the deliverables, a stakeholder raised a concern about the final product.

What should the project manager do first?

- A. Discuss this with the team and put the stakeholder's concern in the issue log.
- B. Set up a meeting with the sponsor to discuss the details of the deliverable.
- C. Discuss this with the team and review the project requirements documentation.
- **D. Set up a meeting with the product owner to discuss the stakeholder's concern.**

**Answer: D**

#### **NEW QUESTION # 897**

A project manager is leading a project with a predictive approach for a governmental body with strictly defined requirements. In the middle of the project, the sponsor requires a significant new feature to be included. This feature was not in the original plan, nor was it part of the planning process, What should the project manager do?

- A. Descope low-priority features that were not explicitly requested and add this feature as a high priority.
- B. Inform the senior manager that they will need a new project management plan for this feature,
- C. Complete the most current feature and release the resources for the new feature.
- **D. Analyze the impact of this change and present the options to the senior manager.**

**Answer: D**

#### **NEW QUESTION # 898**

The integrative nature of project management requires which Process Group to interact with the other Process Groups?

- A. Executing
- **B. Monitoring and Controlling**
- C. Planning
- D. Project Management

**Answer: B**

Explanation:

Section: Executing

#### **NEW QUESTION # 899**

A retail chain is evaluating a project to replace payment systems across all its stores in multiple locations. The project does not pass the financial threshold but is also expected to increase market share, improve customer services and retain more customers. The project is planned as a phased implementation building on learning from the retrospectives during each phase. How should the business increase the value of the project?

- **A. Quantify the expected tangible and intangible benefits in the benefits management plan for each phase**
- B. Ask the benefits owner to reassess the identified risks that are impacting the outcomes of the financial benefits.
- C. Use a fishbone diagram to find the root cause of the lower financial benefits with the benefits owner
- D. Consult with experts on methods to reduce costs and increase the financial value of the project

**Answer: A**

Explanation:

The benefits management plan is a document that describes how the benefits of the project will be delivered, measured, and sustained. It includes the benefits identification, analysis, planning, realization, and transition activities. By quantifying the expected tangible and intangible benefits in the benefits management plan for each phase, the business can increase the value of the project by demonstrating how the project contributes to the strategic objectives, customer satisfaction, and competitive advantage of the organization. Quantifying the benefits also helps to monitor and evaluate the performance of the project and the benefits realization process, and to identify and address any gaps or issues that may arise. Quantifying the benefits can also facilitate the communication and reporting of the value of the project to the stakeholders and the senior management.
