Every single preparation tool for the exam is very efficiently created and has distinct prerequisites. Assuming the exam dumps are a significant endeavor, aim to study this exam essential before you go. There is absolutely nothing far more difficult, so deciding upon the exam dumps could be the greatest approach to passing the certification exam. For any difficulty, you can chat with our customers and get superior assistance with these exam questions and guarantee good results. These certification dumps are very critical for preparing and passing the exam questions because Dumps College provides you using a wide assortment of exam questions and preparation components.

These exam dumps and questions in pdf format are well known, equivalent to exams. You will find quite a few prospects to find diverse jobs, so by using appropriate exam dumps and productive tools and preparation tools, you are going to realize the very best results in the exam. This exam file and correct preparation supply so you could simply pass these exam papers with the most effective marks. This exam covers the whole substance of the exam questions and enhances your study capabilities with this resource.

Your future might be bright and your cash will likely be safe and profitable. In addition, you can chat on the net and fully grasp these exam dumps and get the exact answer set of these exam questions without the need for any difficulty. It is normally the fastest source of this exam preparation than other queries. Either way, it is worth the effort, and we'll give you exam dumps questions. Our toolkit gives you with extraordinary practices via these exam questions and on the web test engine.

Updated AZ-700 Exam Simulations & Leading Offer in Qualification Exams & Verified Exam AZ-700 Questions Fee

Under the tremendous stress of fast pace in modern life, sticking to learn for a AZ-700 certificate becomes a necessity to prove

yourself as a competitive man. Our AZ-700 practice questions have been commonly known as the most helpful examination support materials and are available from global internet storefront. After years of unremitting efforts, our AZ-700 Exam Materials and services have received recognition and praises by the vast number of customers. An increasing number of candidates choose our AZ-700 study materials as their exam plan utility.

Microsoft AZ-700 exam covers a wide range of topics, including Azure virtual networks, VPN gateways, Azure ExpressRoute, DNS, load balancing, and network security. AZ-700 exam consists of multiple-choice questions, scenario-based questions, and practical exercises that evaluate the candidate's ability to apply their knowledge to real-world scenarios. AZ-700 exam is open to anyone who has experience in designing and implementing Azure networking solutions.

Microsoft AZ-700 exam is intended for IT professionals who have a deep understanding of Azure networking technologies and services, including virtual networks, VPNs, load balancers, and network security groups. Candidates for this certification should also have experience working with Azure services such as Azure Active Directory, Azure DNS, and Azure Traffic Manager. AZ-700 Exam is typically taken by network architects, network engineers, and IT professionals who are responsible for designing and implementing Azure networking solutions for their organizations.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q45-Q50):

NEW QUESTION # 45

You have an Azure subscription that is linked to an Azure AD tenant named contoso.onmicrosoft.com. The subscription contains the following resources:

- * A virtual network named Vnet1
- * An App Service plan named ASPI
- * An Azure App Service named webapp1
- * An Azure private DNS zone named private.contoso.com
- * Virtual machines on Vnet1 that cannot communicate outside the virtual network. You need to ensure that the virtual machines on Vnet1 can access webapp1 by using a URL of `https://www.private.contosocom`.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a private endpoint for webapp1.
- B. Create a CNAME record that maps `www.private.contoso.com` to `webapp1.contoso.onmicrosoft.com`.
- C. Create a service endpoint for webapp1.
- D. Create a CNAME record that maps `www.private.contoso.com` to `webapp1.private@ntoso.com`.
- E. Create a CNAME record that maps `www.private.contoso.com` to `webapp1.privatelink.azurewebsites.net`.
- F. Register an enterprise application in Azure AD for webapp1.

Answer: A,B

NEW QUESTION # 46

You have an Azure firewall shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1:

If forced tunneling was enabled, the Firewall Subnet would be named `AzureFirewallManagementSubnet`.

Forced tunneling can only be enabled during the creation of the firewall. It cannot be enabled after the firewall has been deployed.

Box 2:

The "Visit Azure Firewall Manager to configure and manage this firewall" link in the exhibit shows that the firewall is managed by Azure Firewall Manager.

NEW QUESTION # 47

You have the hybrid network shown in the Network Diagram exhibit.

- You have a peering connection between Vnet1 and Vnet2 as shown in the Peering-Vnet1-Vnet2 exhibit.
 - You have a peering connection between Vnet1 and Vnet3 as shown in the Peering -Vnet1-Vnet3 exhibit.
- For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 48

SIMULATION

Task 2

You need to ensure that you can deploy Azure virtual machines to the France Central Azure region. The solution must ensure that virtual machines in the France Central region are in a network segment that has an IP address range of 10.5.1.0/24.

Answer:

Explanation:

See the Explanation below for step by step instructions

Explanation:

To deploy Azure virtual machines to the France Central region and ensure they are in a network segment with an IP address range of 10.5.1.0/24, follow these steps:

Step-by-Step Solution

Step 1: Create a Virtual Network in France Central

Navigate to the Azure Portal.

Search for "Virtual networks" in the search bar and select it.

Click on "Create".

Enter the following details:

Subscription: Select your subscription.

Resource Group: Select an existing resource group or create a new one.

Name: Enter a name for the virtual network (e.g., VNet-FranceCentral).

Region: Select France Central.

Click on "Next: IP Addresses".

Step 2: Configure the Address Space and Subnet

In the IP Addresses tab, enter the address space as 10.5.1.0/24.

Click on "Add subnet".

Enter the following details:

Subnet name: Enter a name for the subnet (e.g., Subnet-1).

Subnet address range: Enter 10.5.1.0/24.

Click on "Add".

Click on "Review + create" and then "Create".

Step 3: Deploy Virtual Machines to the Virtual Network

Navigate to the Azure Portal.

Search for "Virtual machines" in the search bar and select it.

Click on "Create" and then "Azure virtual machine".

Enter the following details:

Subscription: Select your subscription.

Resource Group: Select the same resource group used for the virtual network.

Virtual machine name: Enter a name for the VM.

Region: Select France Central.

Image: Select the desired OS image.

Size: Select the appropriate VM size.

Click on "Next: Disks", configure the disks as needed, and then click on "Next: Networking".

In the Networking tab, select the virtual network (VNet-FranceCentral) and subnet (Subnet-1) created earlier.

Complete the remaining configuration steps and click on "Review + create" and then "Create".

Explanation:

Virtual Network: A virtual network in Azure allows you to create a logically isolated network that can host your Azure resources.

Address Space: The address space 10.5.1.0/24 ensures that the VMs are in a specific network segment.

Subnet: Subnets allow you to segment the virtual network into smaller, manageable sections.

Region: Deploying the virtual network and VMs in the France Central region ensures that the resources are physically located in that region.

By following these steps, you can ensure that your Azure virtual machines in the France Central region are deployed within the specified IP address range of 10.5.1.0/24.

NEW QUESTION # 49

You have an Azure Web Application Firewall (WAF) v2 tier named AG1 on an Azure application gateway.

AG1 has a policy named Policy 1.

You need to add a custom rule to Policy 1. The rule must block all requests from IP addresses in a specific IP address range.

Which four PowerShell cmdlets should you run in sequence? To answer, move the appropriate cmdlets from the list of cmdlets to the answer area and arrange them in the correct order.

Answer:

Explanation:
