First of all, our system is very advanced and will not let your information leak out. It is totally safe to visit our website and buy our GH-100 learning prep. You won't worry anything with our services.

Microsoft GH-100 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Manage access and permissions based on membership: This section of the exam measures skills of DevOps Engineers and reviews how to manage organizations, teams, and repository permissions. It includes default permission settings, team synchronization through AD, scripting across multiple organizations, and aligning enterprise policies with trust requirements. It also contrasts roles such as organization members, owners, collaborators, and billing managers.
Topic 2	<ul style="list-style-type: none">• Describe how GitHub is deployed, distributed, and licensed: This section of the exam measures skills of GitHub Enterprise Administrators and highlights the deployment models of GitHub Enterprise Server, Enterprise Cloud, and GitHub AE. It covers licensing structures, billing for seat licenses and metered services, support options, and monitoring license usage across users and machine accounts.

Topic 3	<ul style="list-style-type: none"> • Manage user identities and GitHub authentication: This section of the exam measures skills of DevOps Engineers and focuses on managing authentication and identity across organizations using SAML SSO, SCIM, and team synchronization. Candidates need to understand identity providers, user membership implications, authorization models, and enforcing security measures such as two-factor authentication.
Topic 4	<ul style="list-style-type: none"> • Manage GitHub Packages: This section of the exam measures skills of GitHub Enterprise Administrators and focuses on managing GitHub Packages, their use in workflows, and how they differ from releases. It involves accessing, writing, and sharing packages across teams while ensuring integration into CI • CD pipelines.
Topic 5	<ul style="list-style-type: none"> • Support GitHub Enterprise for users and key stakeholders: This section of the exam measures skills of GitHub Enterprise Administrators and covers supporting users, identifying issues that can be resolved internally versus those needing GitHub Support, and generating support bundles and diagnostics. It also involves recognizing underutilized features, managing workflows like branching and pull requests, understanding CI • CD strategies, recommending tooling, and extending capabilities through APIs or Marketplace apps.

Microsoft GitHub Administration Sample Questions (Q31-Q36):

NEW QUESTION # 31

You want to ensure a secret is automatically available to only workflows in internal and private repositories in the organization. Where do you configure the required access policy?

- A. Rulesets
- B. Actions policies
- C. Organization secret
- D. Runner groups

Answer: C

Explanation:

You set the access policy on the Organization Secret itself - configuring its visibility so it's scoped automatically to only internal and private repositories.

NEW QUESTION # 32

What is the first step when sensitive data is accidentally pushed to a public GitHub repository?

- A. Force push a commit removing the data
- B. Revoke any exposed credentials immediately
- C. Open an issue to inform users
- D. Delete the repository

Answer: B

Explanation:

Revoke and/or rotate the exposed credentials immediately so they can no longer be used - this is the critical first step before you undertake any history-rewriting or cleanup.

NEW QUESTION # 33

You need to contact GitHub Premium Support. What are valid reasons for submitting a support ticket? (Each answer presents a complete solution. Choose two.)

- A. hardware setup issues or errors
- B. license renewal
- C. outages on GitHub.com affecting core Git functionality
- D. business impact from security issues within your organization

Answer: C,D

Explanation:

Business-impact security issues (for example, a critical vulnerability affecting your organization) are classified as High-priority tickets and are covered under your Premium Support SLA.

Outages on GitHub.com that disrupt core Git or web application functionality trigger Urgent-priority responses under Premium Support's SLA.

NEW QUESTION # 34

When comparing Group SCIM to Team Sync for identity management in GitHub Enterprise, which statement is Correct?

- A. Group SCIM requires less initial configuration than Team Sync.
- **B. Group SCIM enables centralized user and group management through the IdP.**
- C. Team Sync supports more identity providers than Group SCIM.
- D. Team Sync provides more automated user deprovisioning than Group SCIM.

Answer: B

Explanation:

GroupSCIM lets you manage both user accounts and group memberships centrally in your identity provider - automatically provisioning, updating, and deprovisioning users and groups in GitHub - whereas TeamSync only mirrors IdP group membership into existing GitHub teams.

NEW QUESTION # 35

What additional capability does secret scanning offer for private repositories on GitHub Enterprise Cloud?

- A. Disables any code that contains a secret.
- **B. Allows custom pattern definitions for internal secret formats.**
- C. Revokes GitHub access tokens automatically.
- D. Rewrites history to remove secrets.

Answer: B

Explanation:

Secret scanning in private repositories on GitHub Enterprise Cloud lets you define and use custom regular-expression patterns - so you can detect internal or proprietary secret formats beyond the default partner-provided types.

NEW QUESTION # 36

.....

In this knowledge-dominated world, the combination of the knowledge and the practical working competences has been paid high attention to is extremely important. If you want to improve your practical abilities you can attend the GH-100 certificate examination. Passing the GH-100 Certification can prove that you boost both the practical abilities and the knowledge and if you buy our GH-100 latest question you will pass the GH-100 exam smoothly.
