Die Ausbildungsmaterialien zur Oracle 1Z0-1163-1 Zertifizierungsprüfung aus ZertSoft verfügen über hohe Genauigkeiten und große Reichweite, sie können nicht nur Ihre Kenntnisse, sondern auch Ihre Operationsfähigkeiten verbessern, so dass Sie zu einem Eliten in der IT-Branche werden und eine gut bezahlte Arbeit bekommen können. Bevor Sie unsere Ausbildungsmaterialien zur Oracle 1Z0-1163-1 Zertifizierungsprüfung kaufen, können Sie einige kostenlosen Prüfungsfragen und Antworten als Testversion herunterladen.

## Oracle 1Z0-1163-1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none"><li>• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.</li></ul>

Thema 2	<ul style="list-style-type: none"> <li>Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.</li> </ul>
Thema 3	<ul style="list-style-type: none"> <li>OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.</li> </ul>
Thema 4	<ul style="list-style-type: none"> <li>OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.</li> </ul>
Thema 5	<ul style="list-style-type: none"> <li>OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.</li> </ul>
Thema 6	<ul style="list-style-type: none"> <li>OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.</li> </ul>
Thema 7	<ul style="list-style-type: none"> <li>Oracle Cloud Success Navigator &amp; Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.</li> </ul>
Thema 8	<ul style="list-style-type: none"> <li>OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.</li> </ul>

## 1Z0-1163-1 Online Test & 1Z0-1163-1 Dumps

Wenn Sie ZertSoft wählen, kommt der Erfolg auf Sie zu. Die Examsfragen zur Oracle 1Z0-1163-1 Zertifizierungsprüfung wird Ihnen helfen, die Prüfung zu bestehen. Die Simulationsprüfung vor der Oracle 1Z0-1163-1 Zertifizierungsprüfung zu machen, ist ganz notwendig und effizient. Wenn Sie ZertSoft wählen, können Sie 100% die Prüfung bestehen.

## Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 Prüfungsfragen mit Lösungen (Q26-Q31):

### 26. Frage

Which key metric measures the effectiveness of the Demand to Management OMBP?

- A. Customer Acquisition Cost.
- B. Order Fill Rate.
- C. Forecast Accuracy.
- D. Employee Turnover Rate.

**Antwort: C**

Begründung:

The Demand to Management Oracle Manufacturing Business Process (OMBP) in Oracle Fusion Cloud SCM focuses on translating demand signals into actionable supply plans, making Forecast Accuracy the key metric for measuring its effectiveness. Forecast Accuracy compares predicted demand to actual demand, revealing how well the system anticipates customer needs. For instance, if a forecast predicts 1,000 units sold but actual sales are 900, the accuracy is 90%, highlighting areas for improvement. Option A (Employee Turnover Rate) is an HR metric unrelated to demand management. Option C (Customer Acquisition Cost) pertains to marketing, not supply chain processes. Option D (Order Fill Rate) measures fulfillment efficiency, which is a downstream outcome, not a direct indicator of demand forecasting effectiveness. High forecast accuracy ensures inventory aligns with demand, reducing overstock or shortages, and supports strategic decision-making across procurement and production.

### 27. Frage

What is a key benefit of Supplier Qualification Management in Oracle Fusion Cloud SCM?

- A. It eliminates supplier performance reviews.
- B. It only tracks supplier payments.
- C. It assesses and approves suppliers based on compliance and performance criteria.

**Antwort: C**

Begründung:

Supplier Qualification Management in Oracle Fusion Cloud SCM evaluates and approves suppliers based on predefined compliance and performance criteria, ensuring reliable partnerships. Option A is incorrect as it focuses on payments, not qualification. Option C is wrong-performance reviews are integral to the process. This benefit mitigates risks and ensures quality suppliers.

### 28. Frage

What is a primary function of Cost Accounting in Oracle Fusion Cloud SCM?

- A. It tracks and analyzes manufacturing costs to support financial reporting and decision-making.
- B. It records only customer payments, excluding supplier invoices.
- C. It prevents any fluctuations in material costs.

**Antwort: A**

Begründung:

Cost Accounting in Oracle Fusion Cloud SCM is designed to track and analyze costs associated with manufacturing processes, including material, labor, and overhead expenses. This function supports financial reporting by providing detailed cost data and aids decision-making by offering insights into cost drivers and profitability. Option A is incorrect because cost accounting does not prevent fluctuations-it records and manages them. Option B is wrong as it encompasses supplier-related costs, not just customer payments. By maintaining accurate cost records, this module ensures compliance with accounting standards and enables strategic cost management.

### 29. Frage

What is the purpose of the Available to Promise (ATP) process in Oracle Fusion Cloud SCM?

- A. It ensures product availability commitments based on inventory and supply constraints.
- B. It guarantees immediate product shipment for all orders.
- C. It manages only supplier payments without impacting inventory levels.

**Antwort: A**

Begründung:

The Available to Promise (ATP) process in Oracle Fusion Cloud SCM is designed to determine product availability and provide realistic commitments to customers based on current inventory levels and supply constraints, such as production capacity and supplier lead times. ATP calculates how much stock is "available to promise" for new orders by subtracting existing commitments from on-hand inventory and factoring in planned supply. For example, if a warehouse has 50 units of a product, with 20 already allocated to prior orders, ATP shows 30 units available for new promises. Option B is incorrect because ATP has no direct role in

managing supplier payments-it focuses on inventory and supply planning. Option C is false as ATP does not guarantee immediate shipment; it provides feasible dates based on availability, not an unrealistic promise of instant delivery. This process supports accurate order promising, prevents stockouts, and aligns customer expectations with operational reality, making it a cornerstone of effective supply chain management.

### 30. Frage

What is the function of Manufacturing Execution in Oracle Fusion Cloud SCM?

- **A. It tracks and manages real-time production processes on the shop floor.**
- B. It focuses only on financial reporting for manufacturing expenses.
- C. It eliminates the need for supplier coordination in production planning.

**Antwort: A**

Begründung:

Manufacturing Execution in Oracle Fusion Cloud SCM is a critical function that tracks and manages real-time production processes on the shop floor, ensuring visibility and control over activities like work order execution, material consumption, and labor tracking. It captures data as production occurs-e.g., when a worker completes an assembly step or uses raw materials-allowing managers to monitor progress, identify bottlenecks, and ensure quality. Option A is incorrect because supplier coordination remains essential for raw material supply; Manufacturing Execution does not eliminate this need but integrates with it. Option C is wrong as financial reporting is handled by Cost Accounting, not Manufacturing Execution, though the latter provides data that feeds into cost calculations. For example, if a factory produces 100 units, Manufacturing Execution records the exact time, resources, and issues (e.g., machine downtime), enabling proactive adjustments. This real-time oversight improves efficiency, reduces waste, and ensures production aligns with planned schedules.

### 31. Frage
