The site of TrainingDump is well-known on a global scale. Because the training materials it provides to the IT industry have no-limited applicability. This is the achievement made by IT experts in TrainingDump after a long period of time. They used their knowledge and experience as well as the ever-changing IT industry to produce the material. The effect of TrainingDump's Salesforce Platform-App-Builder Exam Training materials is reflected particularly good by the use of the many candidates. If you participate in the IT exam, you should not hesitate to choose TrainingDump's Salesforce Platform-App-Builder exam training materials. After you use, you will know that it is really good.

## Salesforce Certified Platform App Builder Sample Questions (Q242-Q247):

### NEW QUESTION # 242

Nickname\_\_c is a custom text field on a contact record that is utilized to override the contact's name appearing on an email template. This field is not required and is not always filled in.

Which formula should an app builder use to select the contact's preferred name for email communications?

- A. IF(TEXT(Nickname\_\_c), Nickname\_\_c,FirstName)
- **B. IF(NOT(BLANKVALUE(Nickname\_\_c)), Nickname\_\_c, FirstName)**
- C. IF(NOT(ISBLANK(Nickname\_\_c)), Nickname\_\_c,FirstName)
- D. IF (ISNULL(Nickname\_\_c),Nicknamec,Firstfame)

**Answer: B**

Explanation:

The formula that should be used to select the contact's preferred name for email communications is

IF(NOT(BLANKVALUE(Nickname\_\_c)),Nickname\_\_c, FirstName). This formula checks if the Nickname\_\_c field is blank or null, and if not, it returns the value of the Nickname\_\_c field. Otherwise, it returns the value of the FirstName field.

### NEW QUESTION # 243

Cloud Kicks wants to summarize the number of open Cases related to an Account, as well as the number of closed Cases to indicate whether customer support utilization is high, medium, or low. Two number fields have been created:

NUM\_Open\_Cases\_\_c and NUM\_Closed\_Cases\_\_c Which two automation solutions would meet these business requirements? Choose 2 answers

- A. Validation Rule
- B. Approval Process
- **C. AppExchange**
- **D. Apex**

**Answer: C,D**

Explanation:

To meet the requirement of summarizing the number of open and closed cases on an Account, two potential automation solutions can be used:

\* Option A (AppExchange): Salesforce AppExchange offers various pre-built apps and components, including those for case management, which could provide the functionality to summarize cases and categorize customer support utilization. Many apps can handle complex business requirements like case summary roll-ups and could meet the needs without custom development.

Salesforce AppExchange

Option D (Apex): Apex is Salesforce's programming language that allows developers to implement custom logic. In this scenario, Apex could be used to create a trigger or scheduled job that calculates the number of open and closed cases and updates the Account record accordingly. Apex would allow full customization of how the open/closed case numbers are calculated and how customer support utilization (high, medium, low) is determined.

Reference: Apex Triggers

Option B (Validation Rule): Validation Rules enforce data quality by ensuring that certain conditions are met before saving a record. They are not suitable for summarizing data or performing calculations across related records, so this option is not appropriate.

Option C (Approval Process): Approval Processes are used for managing approval workflows, which is unrelated to the case summarization requirement. Therefore, it is not a relevant option here.

In summary, using AppExchange for a pre-built solution or Apex for a custom automation are the best approaches for summarizing open and closed cases on the Account object.

#### NEW QUESTION # 244

What should be done to create a custom field from the Schema Builder?

- A. In the canvas, right-click an object and select "New Field".
- **B. From the Elements tab, drag a field type onto the canvas.**
- C. From the Objects tab, select New>Field.

**Answer: B**

#### NEW QUESTION # 245

Cloud Kicks has created a custom object called Interests which is joined to Accounts by way of a junction object called Account Interest.

What is the impact to users attempting to view an Account and the associated Account Interest records if they are without read access to the Interest object?

- A. Users will be unable to view the Account Interest records or the Interest records.
- B. Users will be able to view the Account Interest records and will have read-only access to the Interest records.
- **C. Users will be unable to view Account records that have a related Account Interest record.**
- D. Users will be able to view the Account Interest record, but unable to view the field or any information relating back to the Interest record.

**Answer: C**

#### NEW QUESTION # 246

For which report types custom summary formulas are available? (Choose 3)

- **A. Summary**
- **B. Matrix**
- C. Tabular
- **D. Joined**

**Answer: A,B,D**

#### NEW QUESTION # 247
