

Instant Professional-Cloud-Developer Download | Valid Professional-Cloud-Developer Exam Experience

P.S. Free & New Professional-Cloud-Developer dumps are available on Google Drive shared by ActualPDF: <https://drive.google.com/open?id=1XleaLWmfFe58AfeJyBWdYnhRabVXmgyZ>

We are committed to using ActualPDF Google Professional-Cloud-Developer Exam Training materials, we can ensure that you pass the exam on your first attempt. If you are ready to take the exam, and then use our ActualPDF Google Professional-Cloud-Developer exam training materials, we guarantee that you can pass it. If you do not pass the exam, we can give you a refund of the full cost of the materials purchased, or free to send you another product of same value.

Google Professional-Cloud-Developer Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Integrating applications with Google Cloud services	21%	- Implementing application performance monitoring • 1. Using operations suite tools • 2. Instrumenting code for metrics and traces - Integrating with data and storage services • 1. Using object storage and file storage solutions • 2. Working with relational, NoSQL, and in-memory databases • 3. Implementing messaging and event streaming - Consuming Google Cloud APIs and services • 1. Using client libraries, REST, and gRPC • 2. Enabling and managing APIs • 3. Integrating with AI/ML and generative AI services

Topic 2: Designing highly scalable, secure, and reliable cloud-native applications	32%	- Designing for observability and monitoring • 1. Planning logging, metrics, and tracing strategies • 2. Designing for debugging and troubleshooting - Designing high-performing applications and APIs • 1. Designing for high availability and fault tolerance • 2. Optimizing for latency and throughput • 3. Selecting appropriate compute and deployment platforms - Designing secure applications • 1. Implementing authentication and authorization mechanisms • 2. Applying security best practices and compliance requirements • 3. Securing data in transit and at rest
Topic 3: Configuring cloud-native applications for deployment	24%	- Deploying applications to Cloud Run • 1. Configuring scaling, networking, and security • 2. Integrating with event-driven services • 3. Deploying from source code or containers - Deploying to App Engine or Cloud Functions • 1. Configuring serverless deployments • 2. Managing versions and traffic splitting - Deploying applications to Google Kubernetes Engine • 1. Configuring scaling, auto-scaling, and updates • 2. Managing configurations and secrets • 3. Creating and managing workloads and services
Topic 4: Building and testing applications	23%	- Setting up development environments • 1. Using Cloud SDK, Cloud Code, Cloud Shell, and Cloud Workstations • 2. Emulating Google Cloud services locally - Testing applications • 1. Writing unit, integration, and end-to-end tests • 2. Automating testing in CI/CD workflows • 3. Using AI-assisted development tools - Building applications and containers • 1. Configuring build pipelines and provenance • 2. Implementing containerization best practices • 3. Using Cloud Build and Artifact Registry

Pass Guaranteed Quiz The Best Professional-Cloud-Developer - Instant Google Certified Professional - Cloud Developer Download

A lot of our new customers don't know how to buy our Professional-Cloud-Developer exam questions. In fact, it is quite easy. You

just need to add your favorite Professional-Cloud-Developer exam guide into cart. When you finish shopping, you just need to go back to the shopping cart to pay money for our Professional-Cloud-Developer Study Materials. The whole process is quickly. And you have to remember that we only accept payment by credit card. And you will find that you can receive the Professional-Cloud-Developer learning prep in a few minutes.

Google Certified Professional - Cloud Developer Sample Questions (Q222-Q227):

NEW QUESTION # 222

You are designing a schema for a table that will be moved from MySQL to Cloud Bigtable. The MySQL table is as follows:

```
AccountActivity
(
  Account_id int,
  Event_timestamp datetime,
  Transaction_type string,
  Amount numeric(18, 4)
) primary key (Account_id, Event_timestamp)
```

How should you design a row key for Cloud Bigtable for this table?

- A. Set Account_id as a key.
- B. Set Event_timestamp as a key.
- C. Set Event_timestamp_Account_id as a key.
- D. Set Account_id_Event_timestamp as a key.

Answer: C

NEW QUESTION # 223

Your API backend is running on multiple cloud providers. You want to generate reports for the network latency of your API. Which two steps should you take? (Choose two.)

- A. Use Fluentd agent to gather data.
- B. Use Stackdriver Profiler to generate report.
- C. Use Stackdriver Debugger to generate report.
- D. Use Zipkin collector to gather data.
- E. Use Stackdriver Trace to generate reports.

Answer: B,E

Explanation:

NEW QUESTION # 224

You have an application running in production on Cloud Run. Your team needs to change one of the application's services to return a new field. You want to test the new revision on 10% of your clients using the least amount of effort. What should you do to keep your service backward compatible?

- A. Update the current service with the new changes. Deploy the new revision. After the deployment, split the traffic between the current service and the new revision.
- B. Replace the current service with the new revision. Deploy the new revision with no traffic allocated. After the deployment, split the traffic between the previous service and the new revision.
- C. Replace the current service with the new revision. Deploy the new revision. Create a load balancer to split the traffic between the previous service and the new revision.
- D. Update the current service with the new changes. Deploy the new revision with no traffic allocated. Split the traffic between the current service and the new revision.

Answer: D

Explanation:

Backward Compatibility: By updating the current service and deploying the new revision without allocating traffic initially, you ensure

that the current functionality remains intact for all users.

Traffic Splitting: After deployment, you can easily configure traffic splitting between the current service and the new revision, allowing you to test the new field with 10% of your clients while the majority continue using the stable version.

Ease of Implementation: This approach minimizes disruptions and allows you to control the rollout gradually, which is essential for testing and validation.

NEW QUESTION # 225

A computer service technician says, "I don't use ESD precautions and have never had a problem." Which of the following is the correct response to this statement?

- A. ESD happens only to inexperienced technicians.
- **B. ESD only occurs in very rare circumstances.**
- C. ESD damage may not appear immediately.
- D. ESD damage is really not as bad as everyone thinks.

Answer: B

Explanation:

NEW QUESTION # 226

You have an application written in Python running in production on Cloud Run. Your application needs to read/write data stored in a Cloud Storage bucket in the same project. You want to grant access to your application following the principle of least privilege. What should you do?

- **A. Create a user-managed service account with a custom Identity and Access Management (IAM) role.**
- B. Create a user-managed service account with the Storage Admin Identity and Access Management (IAM) role.
- C. Use the default service account linked to the Cloud Run revision in production.
- D. Create a user-managed service account with the Project Editor Identity and Access Management (IAM) role.

Answer: A

NEW QUESTION # 227

.....

Keep reading because we have discussed specifications of Google Certified Professional - Cloud Developer Professional-Cloud-Developer PDF format, desktop Google Certified Professional - Cloud Developer Professional-Cloud-Developer practice exam software, and Google Certified Professional - Cloud Developer Professional-Cloud-Developer web-based practice test. ActualPDF is aware that many Professional-Cloud-Developer exam applicants can't sit in front of a computer for many hours to study for the Professional-Cloud-Developer examination. If you are one of those Google Certified Professional - Cloud Developer Professional-Cloud-Developer exam candidates, don't worry because we have a portable file of Google Google Certified Professional - Cloud Developer PDF Questions for you. Google Certified Professional - Cloud Developer Professional-Cloud-Developer PDF format works smoothly on all smart devices.
