NEW QUESTION # 54

Which law includes a provision permitting the wiretapping of VoIP calls?

- A. Stored Communications Act
- B. Electronic Communications Privacy Act (ECPA)
- C. Health Insurance Portability and Accountability Act (HIPAA)
- **D. Communications Assistance to Law Enforcement Act (CALEA)**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Communications Assistance to Law Enforcement Act (CALEA) mandates telecommunications carriers to assist law enforcement in executing authorized wiretaps, including on Voice over IP (VoIP) calls, ensuring lawful interception capabilities.

* CALEA requires built-in surveillance capabilities in communications systems.

* It balances privacy rights with law enforcement needs.

Reference: CALEA is cited in digital forensics and cybersecurity standards relating to lawful interception capabilities.

NEW QUESTION # 55

What is one purpose of steganography?

- A. To delete files securely
- **B. To deliver information secretly**
- C. To compress large files
- D. To encrypt data for security

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Steganography is used to conceal information within other seemingly innocuous data, such as embedding messages inside image files, allowing secret delivery of information without detection.

* Unlike encryption, steganography hides the existence of the message itself.

* It is an anti-forensic technique used to evade detection.

Reference:NIST and digital forensics literature describe steganography as covert communication methodology.

NEW QUESTION # 56

Which law requires both parties to consent to the recording of a conversation?

- A. Stored Communications Act
- B. Wiretap Act
- C. Health Insurance Portability and Accountability Act (HIPAA)
- **D. Electronic Communications Privacy Act (ECPA)**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Electronic Communications Privacy Act (ECPA) regulates interception and recording of electronic communications and generally requires the consent of both parties involved in a conversation for legal recordings.

* This consent requirement protects privacy rights during investigations.

* Non-compliance can lead to evidence being inadmissible or legal penalties.

Reference:ECPA provisions are detailed in legal frameworks governing digital privacy and forensics.

NEW QUESTION # 57

How is the Windows swap file, also known as page file, used?

- A. Primarily for security
- B. Replaces bad sectors
- **C. Augments the RAM**
- D. Reserved for system files

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The Windows swap file, or page file, is a system file used to extend physical memory by storing data that cannot fit into the RAM. When RAM is full, the OS swaps inactive data pages to this file, thus augmenting RAM capacity.

* It does not replace bad sectors; that function is for disk management utilities.

* It is not primarily for security but for memory management.

* It is not reserved exclusively for system files but is used dynamically for memory paging.

Reference:Microsoft's official documentation and forensic guides like NIST SP 800-86 describe the page file's role in virtual memory management and its importance in forensic analysis because it may contain fragments of memory and sensitive information.

NEW QUESTION # 58

An employee is suspected of using a company Apple iPhone 4 for inappropriate activities.

Which utility should the company use to access the iPhone without knowing the passcode?

- **A. Device Seizure**
- B. Data Doctor
- C. Autopsy
- D. Forensic Toolkit (FTK)

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Device Seizure is a specialized mobile forensic acquisition tool capable of extracting data from locked mobile devices, including older Apple iPhone models such as the iPhone 4. It supports physical and logical acquisition, bypassing certain lock restrictions depending on model and OS version.

* Device Seizure is widely used in law enforcement mobile forensics.

* FTK is primarily a computer forensics suite, not designed for bypassing mobile passcodes.

* Data Doctor does not support advanced mobile device extraction.

Reference: NIST mobile forensics guidelines and approved forensic tool references list Device Seizure as a tool capable of acquiring data from locked mobile devices.
